**STATE INDUSTRIAL COMMISSION—DEPARTMENT OF LABOR.****Public Notices.**

Whereas, public hearings have been held upon a proposed revision of Rule 375 of the Industrial Code relating to fire alarm signal systems in factory buildings, which hearings were held at the office of the Industrial Commission, N. Y. City, on March 6, 1916; at the office of the Commission in the City of Albany on March 8, 1916; at the office of the Commission in the City of Utica on March 9, 1916; at the office of the Commission in the City of Syracuse on March 10, 1916; at the office of the Commission in the City of Buffalo on March 13, 1916; at the office of the Commission in the City of Rochester on March 14, 1916, and a further hearing held at the office of the Commission in N. Y. City on May 9, 1916, due notice of which hearings was duly published at least ten days prior to such hearings in various papers designated by the Commission in accordance with law; and

Whereas, the said proposed revision of Rule 375 of the Industrial Code was duly submitted to the Industrial Council for their consideration and advice; and

Whereas, the Industrial Council duly considered the said proposed revision of Rule 375 of the Industrial Code at a regular meeting held at the Capitol, Albany, on May 10, 1916, and duly advised the Industrial Commission with regard thereto;

Be it resolved by the Industrial Commission, State of New York, that Rule 375 of the Industrial Code, relating to fire alarm signal systems of factory buildings be and the same hereby is amended and adopted as so amended so as to read as follows:

**RULE 375.**

**General.**  
All devices and equipment constructed and installed under these specifications shall conform to the requirements of the State Industrial Commission.

The Fire Commissioner in the City of New York and the State Industrial Commission in all other parts of the State are designated by law as the supervising authorities.  
Full information as required by the supervising authorities shall be furnished the supervising authorities and approved by them before the installation is begun.

All systems to be installed in a workmanlike manner and in accordance with the requirements of the supervising authority, but not inconsistent with these specifications.  
Fire alarm installations heretofore made in New York City and approved by the Fire Department of said city shall be accepted by the State Industrial Commission. Other installations heretofore made may be accepted in the discretion of the State Industrial Commission, upon formal application for such approval.

Systems other than those specified herein may be accepted by the State Industrial Commission when after examination such systems are found reliable and workable in a manner satisfactory to the State Industrial Commission.

All material shall be rigidly secured in position, and when attached to masonry walls shall be properly fastened by through bolts, metal expansion shields or toggle bolts. Wooden plugs shall not be accepted. When deemed necessary by the supervising authority to mount fire alarm apparatus upon a back board, such back board shall be not less than seven-eighths of an inch (7/8") in thickness, filled with a non-absorbent compound with an air space of at least one-quarter of an inch (1/4") behind the back board for the free circulation of air.

There shall be a Board of Approval to consist of two representatives of the State Industrial Commission, to be designated by it, one of whom shall be a deputy commissioner from the Bureau of Industrial Code; and a representative of the Fire Commissioner of the City of New York, to be designated by him.

The Board of Approval shall pass upon all devices and apparatus for use in approved installations. Such Board of Approval shall submit reports to the State Industrial Commission for consideration and final approval.

**Tests.**  
The owner or contractor shall, upon the completion of the fire alarm system, make a satisfactory test of the entire equipment in the presence of and under the direction of the supervising authorities or their authorized agent, before final approval and acceptance. All electrical systems shall show an insulation resistance of not less than fifty (50) megohms.

The owner or contractor shall if required furnish all the necessary tools and instruments to conduct this test.

**Guarantee.****(Recommended.)**

It is suggested that the entire system, including all alarm boxes, signals, wiring, batteries, bells, whistles, horns and other devices, shall be guaranteed against any defects in material, workmanship or operation for a period of two years from the day of acceptance by the supervising authority; any defects which may develop in the equipment during this period to be remedied by the contractor without expense to the owner.

It is recommended that contracts for installation of systems contain a clause stating that the final payment shall be withheld until acceptance by the supervising authority.

**Equipment.**

Approved fire alarm equipment is manufactured by and can be procured from the leading manufacturers and electrical supply jobbers in the principal cities. Manufacturers must submit to the State Industrial Commission, for general approval, samples of their devices and equipment constructed for use under these requirements. Apparatus so submitted and approved shall again be subject to inspection upon installation and shall be rejected if working unsatisfactorily or if different from the sample submitted for general approval.

**Accessories.**

Automatically operated circuit breakers and engine stops for shutting down machinery in extremely noisy or hazardous premises may be required, connected with and made a part of the fire alarm system, but in no case shall such circuit breakers or engine stops be installed in such a manner as to cut off the power for lighting current or for operating elevators.

**Approval of Systems.**

Systems shall be approved as follows:  
**Class A**—For installation in buildings not exceeding four stories in height, occupied by not more than one factory tenant, in which not more than one hundred persons are employed above the ground floor.

**Class B**—For installation in buildings not exceeding six stories in height, occupied by not more than one factory tenant, in which not more than one hundred and fifty persons are employed above the ground floor.

**Class C**—For installation in all buildings not specified under Classes A and B. (Note—Class C system may be installed in any building.) Where a building is divided by fire walls, each section may, in the discretion of the supervising authority, be deemed a separate building for the purposes of these requirements.

**Description of Systems.**

**Class A**—Whistles, bells, gongs or horns, mechanically or electrically, automatically or manually operated from all floors, and sufficient in number and size to be clearly audible to all occupants under conditions which prevail when the factory is in full operation. Where electrically operated the systems must conform to the requirements for Class B and C installations.

**Class B**—Open circuit electric systems with gongs or horns and sending stations on all floors, not necessarily sending coded rounds of signals. The methods of construction and the materials used shall be in accordance with the requirements for Class C systems, except as they apply to sending stations, gong and supervisory apparatus.

**Class C**—Systems employing boxes and signaling devices giving rounds of signals, and operating entirely on closed circuits.

For all closed circuits.—The system shall be so constructed and maintained to make it possible to have a current flow of at least 50 per cent, in excess of the minimum current capacity of transmitting a fire alarm signal; a weaker current to constantly supervise each closed circuit may be permitted under conditions acceptable to the Board of Approval.

A milliammeter or other approved current indicator shall be provided in every closed circuit. With Class C.—When an alarm has been sent in from any one of the alarm boxes, all the signaling devices on the various floors of the building shall automatically sound the number indicating the floor from which the alarm was sent at least four times.

The fire alarm system shall not be used for any other purpose, except that daily exit signals may be given on it if approved by the supervising authorities.

All alarm boxes, relay boxes and alarm box enclosing cases shall be finished in red to distinguish them from other signaling apparatus.

**Trouble Signals.**

A trouble bell shall be provided in connection with each closed circuit, to ring continuously in case of weak batteries or an opening of the circuit. The bell, which shall be of an approved design of the vibrating type, must be placed in the engine room or other approved central point. At least four cells of open circuit battery of approved make and type shall be provided for the bell. The bell and battery shall connect with the contacts of a relay having its magnet windings in series with each closed circuit.

The armatures of all relays shall primarily depend on gravity for their operation, but operation may be assisted by springs if approved by the Board of Approval.

**Maintenance.**

The system shall be tested every morning immediately after the hour of starting work in the building to insure the system being in an operative condition.

Daily dismissal signals, if permitted, shall not take the place of the test specified above.

Each sending station shall be operated at least once every month to prove that mechanical and electrical equipment is in perfect working order. The use of the system for drill purposes may constitute a test of those parts of the system actually used.

All apparatus requiring winding shall be rewound after each operation and kept in normal condition.

A complete record shall be kept of the monthly tests and of all drills, which record will be subject to inspection by the supervising authority, or their authorized agent.

**Fire Alarm Sending Stations and Operating Mechanism.**

There shall be one or more fire alarm sending stations on each floor of the building and located in a natural path of escape from fire at a readily accessible point which always shall be kept clear. Sufficient sending stations shall be installed so that no point on any floor shall be more than 100 feet from the nearest sending station on that floor.

**Class A**—Where signal devices are operated mechanically, substantial cabinets of ample size shall enclose the operating mechanism. All operating devices shall be of metal and shall be protected against corrosion and mechanical injury. The "pull" required at any sending station to operate system shall not exceed twenty-five (25) pounds. The operating mechanism shall have a factor of safety of not less than ten (10) based upon the maximum strain to which any part of the mechanism may be subjected. When pull wires or chains are used they shall be enclosed in rigid conduit. All pulleys, springs, cranks, expansion joints, and other vital parts of the system shall be placed in readily accessible position for inspection.

**Class B**—Stations shall have contact surface of sufficient capacity to carry the maximum current which may flow for at least one hour without appreciable heating. The contact shall be ample in size and mechanical strength in addition to the above requirement. These stations shall be of the break glass type arranged so that

the breaking of the glass permits the contacts to close automatically or may be other approved type. The contact shall be of the scraping type. All current carrying parts shall be insulated from parts of opposite or lower polarities in an approved manner, only approved insulating materials being used. The metal case enclosing the movement shall conform to the requirements for Class C stations, except where inconsistent. Switches when used to transmit signals shall be constructed so as positively to break circuits at one hundred per cent. greater than the normal operating voltage.

**Class C.**—Boxes shall be of an approved type and make and may be operated by a lever or by breaking glass. The box should be so designed that when once started the proper transmission of a complete set of signals cannot be interfered with by manipulation of its starting devices. Each box shall be arranged to send a definite code of signals to indicate the floor or portion of same on which it is located. Not less than three taps or blasts shall be sounded at each revolution of the break wheel.

Whenever fire alarm boxes are made a part of a system in which electro-mechanical gongs are employed, break wheels should be so designed that the signal duration shall be not less than one-half second with silent interval of not less than one-half second between signals, except between numbers consisting of two or more digits and silent period between rounds.

Lever boxes, except succession boxes, shall be designed to automatically wind when lever is pulled from alarm. All parts of the mechanism shall be of the best grade and workmanship. Contact points operated by a break wheel and contact points on testing devices shall be of platinum, silver, or other approved material, and shall be of the scraping type. All current carrying parts shall be properly insulated. All contact points shall be secured in a substantial manner to phosphor bronze springs. The contacts shall be so constructed as to positively break a circuit carrying one-tenth ampere at a voltage of 250 volts under actual working conditions. All stations shall be provided with means of testing, comprising arrangements to make such tests without operating the break wheel of the box. Provision shall also be made for a silent test of the box mechanism without operating the signaling devices. The testing device shall be of a design which will prevent any person except those in authority from operating same. Testing devices must be so designed as to prevent the possibility of box being left inoperative.

There shall be a metal case enclosing the movement completely and made dustproof as far as possible for the use of gaskets or other suitable means. The metal case shall be drilled and tapped to receive standard conduit at top and bottom. All pull box cases shall be fitted with a glass panel or a door which can readily be opened, so constructed as to protect the pull lever against accidental injury and on which a handle is rigidly secured. The wording, "In case of fire open door and pull down lever as far as it will go," or equivalent instructions must appear on the door. If used in exposed places the box shall be enclosed in a suitable weatherproof outer shell. Approved types of break-glass boxes will be acceptable with no additional protection, except where made necessary by weather conditions; and all break-glass type fire alarm boxes shall be provided with suitable hammers on chains which shall be attached to or near the boxes so that the glass can readily be broken. All break-glass boxes shall have lettered on the front the words, "Fire Alarm—In Case of Fire Break Glass." #### Signaling Devices.

##### General.

Signaling devices may consist of bells, gongs, whistles, or horns, of approved type, or other devices acceptable to the Board of Approval.

For all electrically operated systems. There shall be installed on each floor of the building one or more alarm devices, sufficient in number and efficiency to be plainly heard throughout the floor, above the noise of the machinery and other sounds. Where floors are divided by fire walls each section may in the discretion of the supervising authority be deemed a separate floor for the purposes of these requirements. Systems consisting of several types of sounding apparatus should be avoided. The number of signal devices on a circuit may be limited at the discretion of the supervising authority.

**Class A.**—Whistles, bells, gongs, and horns shall be of approved type, and shall be placed at accessible points. When placed on exterior of building approval must be secured from supervising authority.

The reliability of steam or air supply shall be demonstrated to the satisfaction of the supervising authority.

For all electrically operated systems. All signaling devices shall be of an approved type and the movement enclosed in a dustproof metal casing insulated from all current-carrying parts. Where conditions require it damp-proof casings shall be installed. Signaling devices shall be placed with their lowest parts about eight feet from floor. Wherever there is danger of mechanical injury, the entire device shall be enclosed in a protecting case made of approved metal, netting or perforated metal. This casing shall be insulated from all current-carrying parts, but grounded to conduit.

Magnet windings shall be impregnated with an insulating moisture repelling compound or shall be of enameled wire. All internal connections must be properly protected, securely made, and where subject to motion to be of standard flexible wire with substantial insulation. Binding posts shall be of such a character that wire is held between two flat surfaces; posts employing a set screw the end of which is used to pinch or bind the wire will not be accepted.

Gongs shall be of a high grade of cast bell metal or other approved material.

Adjustments must be of such a character that they can be securely locked in an approved manner.

Contact points shall be ample in area, not only to take care of current used in operation, but to insure long life, and shall be of pure silver, platinum, or other approved material.

Wherever necessary hammer rod shall be suitably protected against mechanical injury or derangement by the use of a guard or other suitable means.

#### Relays.

All relays shall be of an approved type and make. Magnet windings shall be impregnated with an insulating moisture repelling compound or shall be of an enameled wire. All relays shall be enclosed in an approved metal case under lock and key and located where there is no danger of sparking contacts igniting inflammable gases or flyings.

Relays shall be mounted where they will be least affected by vibration in the building, and in no case shall they be mounted on the same back board with sounding apparatus, or so that they will be affected by the vibration caused by such sounding apparatus, and shall be marked plainly with the maximum and minimum operating current values to which such relays will safely respond.

#### Wiring.

The following methods of and materials for the wiring of the system will be approved:

All conductors shall be run in approved metallic conduits, except that armored cable may be

used when approved by the supervising authorities.

The conduit system shall be permanently and effectively grounded.

All conductor wires used shall be of copper, rubber covered and braided, National Electrical Code standard. The coil shall bear manufacturer's name and month and year of manufacture.

Wiring in all systems shall be installed after the manner prescribed under National Electrical Code rules as applying to conduit and armored cable installation for light and power circuits.

In vertical risers no splices will be permitted. All splices shall be made secure, electrically and mechanically, and be soldered without the use of an acid flux, and insulated with rubber and friction tape. All splices shall be in junction or terminal boxes.

No conductor of less than fourteen (14) B. & S. gauge nor having a rubber insulation wall of less than 3-64" thick will be approved. Multiple conductor cables not complying with the above requirements shall be subject to special approval.

Where wires pass from one building to another underground, they must be enclosed in conduit between buildings, and lead enclosed.

Wires between buildings when not run in conduit must be at least equivalent in conductivity and tensile strength to No. 12 B. & S. copper for box and signaling circuits. They must be supported at least every Seventy-five feet on approved glass insulators and brackets. As far as possible they should be run under rather than over electric light or power wires and be provided with safety devices in accordance with the National Electrical Code rules.

**Sources of Electrical Energy.**

The following sources of energy may be employed:

1. Storage Batteries.

2. Electric light and power systems (public service or isolated plants), voltage not to exceed 250.

3. Primary batteries.

Duplicate sources of energy shall be provided for all electrically operated systems when required by the supervising authority.

**Storage Batteries.**

Storage batteries may be employed in under competent supervision and equipped with reliable charging and controlling devices. The following rules apply to such installations:

A sufficient number of storage cells shall be provided in battery to secure maximum efficiency in operation, the required number in each installation to be approved by the supervising authority.

Complete details of installation may be filed in duplicate for approval before the installation is begun.

Storage batteries shall be of approved make and type. Each set of batteries to be capable of maintaining the system efficiently for three days without recharging.

Storage batteries shall be installed in an approved manner in properly ventilated protecting cabinets and wherever possible shall be placed in a room separate from that containing other fire alarm apparatus. If these batteries are placed in a separate room with proper ventilation and where they will not be subject to mechanical injury, protecting cabinets will not be required. The battery in service shall not be disconnected from the fire alarm system during working hours in a factory.

A difference of potential of more than one hundred and fifteen (115) volts will not be allowed on working circuits of storage battery systems when the current flow at any time through any part of the system is more than one ampere.

A full description of the operation of each system, together with instructions for its proper care and maintenance, must be posted in a conspicuous place and in a substantial manner near a point where the person in charge of the system is generally employed.

The potential of the charging circuits shall not be over 250 volts and these circuits shall be installed in compliance with the rules of the National Electrical Code.

**Charging Boards.**

A suitable charging switchboard of slate, marble or other approved material shall be provided, constructed in accordance with National Electrical Code rules, and shall be provided with not less than the following equipment:

For direct current. A main double pole, National Electrical Code, fused-knife switch of proper capacity arranged for enclosed National Electrical Code fuses, except that fuses of one-half ampere capacity or less need not be enclosed if properly guarded. These fuses to be approximately 10 per cent. in excess of maximum charging rate of batteries.

Underload circuit breaker of approved type.

Ammeter, arranged to read charging rate.

Milliammeter, arranged to read current flow through closed circuit or circuits.

Double throw switch for changing from one set of batteries to the other so arranged that the working circuits cannot be opened during the process of shifting.

Double pole, double throw charging switch.

Fixed Resistance—Fixed resistance units approved by the Board of Approval shall be provided, one in each leg of the charging circuit of such a value as the operating conditions may warrant, but in no case shall the charging rate be in excess of two-thirds of the normal charging rate of the storage cells unless a variable charging rate is required. (See Variable Resistance.)

Variable Resistance—One-third of the total resistance to be used shall be fixed in each leg of the charging circuit, and the balance provided with approved shifting device for varying the charging rate; the medium resistance to be such that the batteries cannot be charged in excess of their normal charging rate. Resistance in any case shall not unduly heat. Each circuit shall be provided with fuses of a capacity 50 per cent. in excess of the combined charging rate.

Motor Generators—Motor generators of suitable capacity and standard design may be used, and when used shall be installed in accordance with National Electrical Code rules and a proper field regulator provided in addition to regular switchboard equipment referred to above, except that resistance in charging circuit will not be required.

For Alternating Current—When only alternating current is available in connection with storage battery installations, approved motor generator or rectifying sets with necessary transformer, National Electrical Code standard, shall be provided, together with approved switchboard equipment.

WHEREAS, By contract dated May 4, 1914, the Board granted to the Company the franchise, right and privilege to construct, maintain and operate certain railroad tracks at or in the vicinity of Hollis, in the Fourth Ward of the Borough of Queens, as follows:

(a) Sixteen (16) tracks across Hamilton Street (Winston Avenue), between Fulton Street (Jamaica Avenue) and South Street (Liberty Avenue), adjoining the two existing main line tracks of the Company.

"(a) The Company shall construct a bridge or archway of sufficient width and capacity to accommodate the sixteen (16) tracks hereby authorized and also the two (2) main line tracks of the Company, now laid and existing on the surface of Hamilton Street, between Fulton and South Streets. Said bridge or archway shall have a span of at least thirty-two (32) feet and a clearance of at least fourteen (14) feet over the surface of Hamilton Street at the centre line thereof. For the purpose of constructing said bridge or archway with the prescribed clearance the Company shall depress the surface of Hamilton Street as now existing between Fulton and South Streets. The method of constructing said bridge or archway and of depressing the street grades shall be subject to the approval of the Board and the Company shall submit to the Board for its approval plans showing the method of such work. The grades of said bridge or archway and of Hamilton Street shall be as shown on the map and profile attached to and made part of this contract or as may be hereafter fixed by the Board."

"(b) That portion of Hamilton Street under the bridge or archway and for a distance of fifty (50) feet outside the same at either end thereof shall be well and sufficiently lighted at the expense of the Company during such hours of the day and night and by such lighting system as may be prescribed by the President of the Borough of Queens and to his entire satisfaction.

"(c) Hamilton Street for its entire length from Fulton Street to South Street, the depression of which is made necessary by the construction of the said bridge or archway, shall be drained by the Company with such suitable and adequate drainage system, with proper outlets therefor, as may be prescribed by the President of the Borough of Queens, and to his entire satisfaction. And the Company shall pave the surface of Hamilton Street for its entire length from Fulton to South Streets, including its intersection with such streets, with such material as may be prescribed by the President of the Borough of Queens.

"(d) The work of constructing the said bridge or archway, changing the street grades and the drainage system, providing drainage outlets and paving the street, as above provided, shall be done at the sole cost and expense of the Company. The Company shall also, at its own entire cost and expense, and for the entire term of this contract, whether original or renewal, maintain the said bridge or archway and the piers and abutments thereof in good order and repair.

"(e) The construction of said bridge or archway shall be completed in no event later than the day two (2) years after the date of the execution of this contract by the Mayor. During the period of such two (2) years and pending the construction of said bridge or archway the Company may construct, maintain and operate the tracks hereby authorized across Hamilton Street, at the same grade as the surface of said street; provided, however, that the Board may by resolution direct the removal of such tracks from the surface of Hamilton Street and the construction of the bridge or archway across said street before the expiration of such two-year period.

"The Company shall complete the construction of the bridge or archway hereinafter provided for on or before the expiration of the two-year period or within the time fixed by the Board, should the Board direct the prior removal of the surface tracks, and the Company shall, before such expiration, or within such time, as the case may be, remove from the surface of Hamilton Street the sixteen (16) tracks hereby authorized, and the said two (2) main line tracks and thereafter maintain and operate the same upon said bridge or archway, subject to the terms and conditions of this contract.

"Should the Company fail or neglect to complete the construction of the said bridge or archway within the two-year period hereinafter specified, or within the period fixed by the Board, should it direct the prior removal of the surface tracks, as the case may be, or should the Company, within the same time, fail to remove from the surface of Hamilton Street the sixteen (16) tracks hereby authorized and also the said two (2) main line tracks, the right and privilege hereby granted to construct, maintain and operate sixteen (16) tracks across Hamilton Street shall cease and determine upon the termination of such two-year period, or on the date fixed for the prior removal of the surface tracks.

"Should the Company not take advantage of the privilege to construct, maintain and operate the tracks hereby authorized upon the surface of Hamilton Street, as hereinafter provided, and fail to complete the construction of the said bridge or archway within two (2) years from the date of the execution of this contract by the Mayor, as hereinafter provided, the right and privilege hereby granted to construct, maintain and operate sixteen (16) tracks across Hamilton Street shall cease and determine upon the termination of such two-year period."

—and

WHEREAS, Section 2, Tenth, of said contract provides as follows:

"Tenth—Tracks across Farmers Avenue. The three (3) tracks hereby authorized across Farmers avenue shall be constructed and maintained over and above the surface of such avenue in the manner and subject to the terms and conditions hereinafter named:

"(a) The Company shall construct a bridge of sufficient width and capacity to accommodate the three (3) tracks hereby authorized, and also the two (2) main line tracks of the Company now laid and existing across Farmers avenue on the surface thereof, carrying said Farmers avenue said bridge at the width shown the tentative plan for this territory, and upon the completion of said bridge, shall remove from the surface of said Farmers avenue, the three (3) unauthorized tracks and the said two (2) main line tracks now constructed thereon, and shall thereafter maintain the said tracks on said bridge.

For the purpose of constructing said bridge with the prescribed clearance, the Company shall perform all the work of changing the street grades and the drainage system and of providing the drainage outlets made necessary by the construction of said bridge, and shall also replace or restore the street pavement which may be disturbed during such work; all to be done under the supervision and subject to the approval of the President of the Borough of Queens. The method of constructing said bridge and changing the street grades shall be subject to the approval of the Board. Before commencing work, the Company shall submit to the Board for its approval a plan showing the methods of such work. The grade of said bridge and of Farmers avenue shall be as shown on the map and profile attached to and made a part of this contract or as may be hereafter fixed by the Board.

"(c) The Company shall commence and complete the work of constructing said bridge and of changing the street grades and drainage system, as above provided, within one (1) year after the date of the execution of this contract by the Mayor, and shall within the same period remove from the surface of Farmers avenue the three (3) unauthorized tracks and the two (2) main line tracks now constructed thereon; otherwise the right and privilege hereby granted to construct, maintain and operate three (3) tracks across Farmers avenue shall cease and determine, unless said period shall be extended, as hereinafter provided.

"(d) The Company shall bear the entire cost and expense of constructing said bridge, changing the street grades and the drainage system, providing drainage outlets and replacing or restoring the street pavement, as above provided, and shall also pay all damages to property owners, resulting from change of street grades, except as to such portion of such cost and such damages as would relate to or result from the elimination of the crossing at grade of the two (2) existing main line tracks. Said last named portion shall be apportioned in the manner provided by the Railroad Law for the elimination of existing grade crossings, except that in no event shall the City's share of such portion exceed the sum of forty-eight thousand five hundred dollars (\$48,500), and the Company agrees to assume and repay to the City any sum in excess of the said forty-eight thousand five hundred dollars (\$48,500), which the City may be required to pay as its share of such portion. The Company shall at its own entire cost and expense, for the entire

term of this contract, whether original or renewal, maintain the said bridge and the piers and abutments thereof in good order and repair."

—and

"It is provided that the periods herein fixed for completing the reconstruction of the bridge across South Street and performing the work in connection therewith, and for completing the construction of the bridge across Farmers avenue, removing the surface tracks from the said avenue and performing the work in connection therewith, may be extended by the Board, but the total extension of time in the case of either of said streets shall not exceed in the aggregate one (1) year, and provided further that when the commencement or completion of such construction or reconstruction shall be prevented by legal proceedings in any court, or by works of public improvement, or from other causes not within the control of the Company, the time for the commencement or completion of such construction may be extended for the period of such prevention, but no delay shall be allowed for unless the court proceedings shall be diligently prosecuted by the Company; and provided further that in no case shall such delay be deemed to begin until the Company shall have given notice to the Board of any such court proceedings or other occasion of delay and delivered to the Board copies of any injunction or other orders and the papers upon which the same shall have been granted, and unless, upon the request of the Board, the Company shall, in writing, consent that the Board, either in its own name as a party or in the name of the City as a party, may intervene in any such proceedings."

—and

WHEREAS, Pursuant to section 2, Sixth, as above, the period for the completion of construction of the bridge across Hamilton Street and the work in connection therewith is about to expire—i. e., on May 4, 1916; and

WHEREAS, Pursuant to section 2, Tenth, as above, the time for the completion of construction of the bridge across Farmers Avenue and the work in connection therewith expired on May 4, 1915; and pursuant to Section 2, Seventeenth, as above, the Board, on the application of the Company and by resolution adopted April 30, 1915, and approved by the Mayor May 4, 1915, granted an extension of time up to and including May 4, 1916, within which to complete the construction of the bridge across Farmers Avenue and the work in connection therewith, which period is about to expire; and

The aforesaid district being more particularly shown on a map entitled

"Map showing District applied for by The Manhattan Refrigerating Company to accompany petition dated Dec. 8, 1915, to the Board of Estimate and Apportionment, City of New York."

—signed by T. A. Adams, President, a copy of which is hereto annexed and made a part of this contract.

Section 2. The grant of this privilege is subject to the following conditions, which shall be complied with by the Company:

First—The said right to construct, maintain and operate said conduits shall be held and enjoyed by the Company for the term of fifteen (15) years from August 1, 1916, with the privilege of renewal of said contract for the further period of ten (10) years upon a fair revaluation of such right and privilege.

If the company shall determine to exercise its privilege of renewal it shall make application to the Board, or any authority which shall be authorized by law to act for the City in place of the Board. Such application shall be made at any time not earlier than two (2) years and not later than one (1) year before the expiration of the original term of this contract. The determination of the revaluation shall be sufficient if agreed to in writing by the Company and the Board, but in no case shall the annual rate of compensation to the City be fixed at a less amount than the sum required to be paid during the last year prior to the termination of the original term of this contract.

If the company and the Board shall not reach such agreement on or before the day one (1) year before the expiration of the original term of this contract, then the annual rate of compensation for such succeeding ten (10) years shall be reasonable and either the City (by the Board) or the Company shall be bound upon request of the other to enter into a written agreement with each other fixing the rate of such compensation at such amount as shall be reasonable, but in no case shall the annual rate so fixed be less than the sum required to be paid for the last year prior to the termination of the original term of this contract and if the parties shall not forthwith agree upon what is reasonable then the parties shall enter into a written agreement fixing such annual rate and at such amount as shall be determined by three disinterested persons selected in the following manner:

One disinterested person shall be chosen by the Board; one disinterested person shall be chosen by the Company; these two shall choose a third disinterested person, and the three so chosen shall act as appraisers and shall make the revaluation aforesaid. Such appraisers shall be chosen at least six (6) months prior to the expiration of the original term of this contract, and their report shall be filed with the Board within three (3) months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations, without the presence of either party. They shall have the right to examine any of the books of the Company and its officers under oath. The valuation so ascertained fixed and determined shall be conclusive upon both parties, but no annual sum shall in any event be less than the sum required to be paid for the last year of the original term of this contract. If in any case the annual rate shall not be fixed prior to the termination of the original term of this contract, then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company each paying one-half thereof.

Second—The Company shall pay to the City for the privilege hereby granted the following sums of money:

(a) The sum of one thousand dollars (\$1,000) in cash within one (1) month after the date on which this contract is signed by the Mayor and before anything is done in exercise of the privilege hereby granted.

(b) During the first term of five years, an annual sum which shall be equal to two (2) per cent. of its gross annual receipts, but which sum shall not be less than two hundred and fifty dollars (\$250).

During the second term of five years, an annual sum which shall be equal to four (4) per cent. of its gross annual receipts, but which sum shall not be less than four hundred dollars (\$400).

During the third term of five years, an annual sum which shall be equal to four (4) per cent. of its gross annual receipts, but which sum shall not be less than six hundred dollars (\$600).

The gross receipts mentioned above shall be the total receipts of the Company or any subsidiary of the Company or of any purchaser of refrigeration from the Company for purpose of resale from all business of furnishing refrigeration to consumers except those located in West Washington Market.

(c) An annual payment for each linear foot of conduit constructed within the limits of the streets under the franchise hereby granted (excepting, however, such conduits as are constructed within the vault space or vault spaces of any building or buildings used or occupied exclusively by the Company for the purpose of its business) as follows:

For conduits of outside dimensions, including insulation and other covering, not exceeding 30 inches by 18 inches—twenty-five cents (25c).

For conduits of outside dimensions, including insulation and other covering, exceeding 30 inches by 18 inches—but not exceeding 35 inches by 20 inches—thirty cents (30c).

An annual payment of two dollars (\$2) for each manhole constructed within the limits of the streets under the franchise hereby granted. The annual charges shall commence on August 1, 1916.

All annual charges as above shall be paid into the Treasury of the City on February 1 of each year and shall be for the amount due to December 31, next preceding. Provided that the first annual payment shall be only for that proportion of the first annual charge as the time between August 1, 1916, and December 31, 1916, shall bear to the whole of one year.

Any and all payments to be made by the terms of this contract to the City by the Company shall not be considered in any manner in the nature of a tax, but such payments shall be made in addition to any and all taxes of whatever kind or description, now or hereafter required to be paid by any ordinance of the City, or resolution of the Board, or any law of the State of New York.

Third—The annual charges or payments shall continue throughout the whole term of this contract (whether original or renewal) notwithstanding any clause in any statute or in the charter of any other company providing for payments for refrigerating rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted (whether original or renewal), or of any part thereof or of any of the streets, avenues or highways included within the district herein described or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all conditions of this contract, and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said conditions as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter and that it will not claim by reason thereof or otherwise exemption from liability to perform each and all of the conditions of this contract.

Fourth—Nothing in this contract shall be deemed to affect in any way the right of the City to grant to any individual, firm or other corporation a similar right or privilege upon the same or other terms and conditions in the same streets, avenues, highways and other property of the City included within the district hereinbefore described.

Fifth—The rights and privileges hereby granted shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall the title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever either by the act of the Company, or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of the City, acting by the Board, evidenced by an instrument under seal, anything herein contained to the contrary thereof in anywise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Sixth—Upon the termination of the original term of this contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination or forfeiture of the rights hereby granted for any cause, or upon the dissolution of the Company before such termination, the conduits, pipes and appurtenances of the company constructed pursuant to this contract within the streets, avenues, highways and other property of the City shall become the property of the City without cost, and the same may be used or disposed of by the City for any purpose whatsoever, or the same may be leased to any company or individual.

If, however, at the termination of this contract as above, the Board shall so order by resolution, the Company shall upon thirty (30) days' notice from the Board, remove any and all of its conduits and appurtenances constructed pursuant to this contract and the said streets, avenues, highways and other property of the City shall be restored to their original condition at the sole cost and expense of the Company.

Seventh—The grant of this privilege is subject to whatever right, title or interest the owners of abutting property or others may have in and to the streets, avenues, highways and other property of the City in which the Company is hereby authorized to operate.

Eighth—All construction which shall be made under this grant shall be done in a manner solely upon the terms and conditions hereafter to be imposed by the President of the Borough of Manhattan and the Commissioner of Water Supply, Gas and Electricity, or their respective successors in authority. The said Company shall submit a working plan of construction to the said President and to the said Commissioner, which shall include and show in detail the method of construction of said conduit lines, connections, manholes and other appurtenances, and the mode of protection of all subsurface construction under the street in which the Company is hereby authorized to operate.

Ninth—Any alteration to the sewerage or drainage system, or to any other subsurface or to any surface structures in the streets, avenues, highways and other property of the City, required on account of the construction or operation of the conduits of the Company, shall be made at the sole cost of the Company, and in such manner as the proper City officials may prescribe.

Tenth—It is agreed that the right hereby granted shall not be in preference or in hindrance to public work of the City, and should the said conduits in any way interfere with the construction or maintenance of public works in the streets, avenues, highways and other property of the City, wherever the same is done by the City directly or by a contractor for the City, the Company shall, at its own expense, protect or move the conduits and appurtenances in the

manner directed by the City officials having jurisdiction over such public work.

**Eleventh**—The Company shall bear the expense of keeping in repair for one year after it has been replaced, all pavements which may at any time be removed by said Company, either for the purpose of construction or for repairing of the conduit line and its appurtenances.

**Twelfth**—The Company shall bear the expense of inspection which may be required by the President of the Borough of Manhattan and the Commissioner of Water Supply, Gas and Electricity, and of all work of construction.

**Thirteenth**—The Company shall, at its own expense, remove from beneath the surface of Tenth Avenue the unused conduits, pipes and appurtenances now existing therein from a point at or near the southerly line of Bloomfield Street to a point at or near the southerly line of 14th Street, as shown by the hatched broken black line on the map hereto attached. The work of removal shall be done whenever the street is being repaved and within such reasonable time as may be fixed by the President of the Borough of Manhattan and under his supervision. In case of the Company's failure to comply with the above provision, the Borough President shall remove the conduits, pipes and appurtenances at the Company's expense.

**Fourteenth**—The Company shall cause a test to be made of the pipes to be contained within the conduits hereby authorized, whenever required by and under the supervision of the Commissioner of Water Supply, Gas and Electricity. The conditions of such test shall be as follows:

(a) If the test be made in the foundry where the pipes are manufactured, such pipes shall be subjected to a pressure of three hundred (300) pounds per square inch.

(b) If the test be made in the field, of pipes in use or ready for use, such pipes shall be subjected to a pressure of two hundred (200) pounds per square inch.

A certificate showing that such a test has been made without injury to the pipes shall be executed by an officer of the Company, and indorsed by the Commissioner of Water Supply, Gas and Electricity, and filed with the Board.

**Fifteenth**—The Company shall not charge consumers more than the following rates for refrigeration to be furnished to boxes properly insulated at a temperature of not lower than 32 degrees Fahrenheit.

Four (4) cents per month per cubic foot for boxes of not over 500 cubic feet.

Two (2) cents per month per cubic foot for boxes of over 500 cubic feet, but less than 1,500 cubic feet.

One (1) cent per month per cubic foot for boxes of 1,500 cubic feet and over.

These rates to apply to boxes located not above the first floor of any building.

During the term of this contract the Board shall have absolute power to regulate the maximum and minimum rates for all refrigeration, and the Company agrees to abide by such rates provided that such rates shall be reasonable and fair.

**Sixteenth**—The Company, upon the application for refrigeration of any person, firm or corporation whose premises are located within the district within which the Company is hereby authorized to operate, shall extend its conduits to such premises and furnish to said applicant refrigeration at rates not exceeding those herein prescribed or hereafter fixed by the Board as herein provided, on condition that before any such extension shall be made, such person, firm or corporation shall agree, in writing, to accept and pay for such service for a reasonable time not exceeding one (1) year. The Company shall not be required, however, to furnish refrigeration to applicants before October 1, 1916, nor to applicants whose premises are located above the first floor of any building.

**Seventeenth**—A correct map shall be furnished to the Board by the Company on the first day of February, 1917, showing the exact location of all conduit lines and manholes constructed, with reference to the street lines, the curb lines and the street surface, together with a statement of the total length of such conduit. On the same date of each succeeding year, during the term of this contract, a supplementary map shall be furnished the Board showing all conduits laid during the preceding year.

**Eighteenth**—The conduit lines hereby authorized shall be used only by The Manhattan Refrigerating Company, and for no other purpose than supplying refrigeration.

In case the Company fails to appear, action may be taken by the Board forthwith.

**Twenty-second**—If the Company shall fail to give efficient public service at rates not exceeding those herein or hereafter fixed, or fail to maintain its conduits and appurtenances as herein provided in good condition throughout the whole term of this contract, the Board may give notice to the Company, specifying any default on the part of the Company, and requiring the Company to remedy the same within a reasonable time; and upon failure of the Company to remedy such default within a reasonable time, the Company shall, for each day thereafter during which the default or defect remains, pay to the City the sum of fifty dollars (\$50) as fixed or liquidated damages, or the Board, in case such conduits or appurtenances which may affect the surface of the street shall not be put in good condition within a reasonable time after notice by the Board as aforesaid, shall have the right to make all needed repairs at the expense of the Company, in which case the Company shall pay to the City the amount of the cost of such repairs, with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided for.

The Board, on complaint made, shall give notice to the Company, directing its President or other officer to appear before the Board on a certain day not less than ten (10) days after the date of such notice, to show cause why the Company should not be required to pay such liquidated damages in accordance with the foregoing provisions. If the Company fails to make an appearance, or after a hearing appears in the judgment of the Board to be in fault, said Board shall forthwith require the payment of said sums herein provided for, or where the damages are not liquidated by the terms of this contract such amount as appears to the Board to be just, and without legal procedure direct the Comptroller to withdraw such amount from the security fund deposited with him. The finding of the Board as to the amount to be paid by the Company shall be final and can only be attacked on the ground of fraud or mistake. In case of any default made upon the security fund, the Company shall, upon ten (10) days' notice in writing, pay to the City a sum sufficient to restore said security fund to the original amount of two thousand five hundred dollars (\$2,500), and in default thereof, this contract shall be canceled and annulled at the option of the Board, acting in behalf of the City. No action or proceeding or right under the provisions of this contract shall affect any other legal rights, remedies or causes of action belonging to the City.

These provisions for the recovery of such damages are in addition to the right to forfeit the franchise, conferred by section 3, subdivision Twenty-first, of this contract.

**Twenty-fifth**—The grant of this franchise, so far as it shall include or affect the so-called Gansevoort Market Lands in the block bounded by Little West 12th Street, Washington Street, Gansevoort Street, West Street and Tenth Avenue, is and shall be subject to such other or further conditions, restrictions, agreement or consent as the Comptroller of the City may see fit to impose or require, pursuant to the authority and control over such lands vested in him by the Charter of the City.

**Twenty-sixth**—The words "notice" or "direction," wherever used in this contract, shall be deemed to mean a written notice or direction. Every such notice or direction to be served upon the Company shall be delivered at such office in the City as shall have been designated by the Company, or if no such office shall have been designated, or if such designation shall have for any reason become inoperative, shall be mailed in the City, postage prepaid, addressed to the Company at the City. Delivery or mailing of such notice or direction as and when

above provided shall be equivalent to direct personal notice or direction, and shall be deemed to have been given at the time of delivery or mailing.

**Twenty-seventh**—The words "streets or avenues" and "streets and avenues" wherever used in this contract shall be deemed to mean streets, avenues, highways, parkways, driveways, concourses, boulevards, bridges, viaducts, tunnels, public places or any other property to which the City has title or over which the public has an easement included in the district hereinabove described, and under the surface of or in which authority is hereby given to the Company to construct or maintain its conduits.

**Twenty-eighth**—If at any time the powers of the Board or any other of the authorities herein mentioned or intended to be mentioned, shall be transferred by law to any other Board, authority, officer or officers, then and in such case such other Board, authority, officer or officers shall have all the powers, rights and duties herein reserved to or prescribed for the Board or other authorities, officer or officers.

### NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale, and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such buildings by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their contents, between the time of the sale and the time of the delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstances of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations, the sidewalks and curb in front of said buildings, extending within the described area, shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building. Where there is no curb the elevation of the surrounding ground shall be considered curb level. All wells, cesspools, sinks, etc., existing on the property must be filled to the level of the surrounding ground with clean earth.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Water Supply, Gas and Electricity that this has been performed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street and the openings of the main sewer in street shall be properly closed in compliance with the directions of the Bureau of Sewers in the Borough in which the buildings are situated, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed.

The permit for all openings in the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurte-

nances, or any part thereof, within thirty days from the day of possession will work forfeiture of ownership of such buildings, appurtenances or portions as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidder's assets to the above conditions being understood to be implied by the act of bidding, and The City of New York will, without notice to the purchaser, cause the same to be removed, and the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in every respect in a thorough and workmanlike manner, and must be completed within thirty days from the day of possession, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and warning signs by day and night for the prevention of accidents, and will indemnify and save harmless The City of New York, its officers, agents and servants, and each of them against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against and from all damage and costs to which it, they or any of them be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or from any improper or defective materials or machinery, implements or appliances used in the removal of said buildings.

Where party walls are found to exist between buildings purchased by different bidders, the materials of said party walls shall be understood to be equally divided between the separate purchasers.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furrings, plaster, chimneys, projecting bricks, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam holes, etc., bricked up, and the wall pointed and made to exclude wind and rain and present a clean exterior. The roofs and adjacent buildings shall be properly flashed and painted and made watertight where they have been disturbed by the operations of the Contractor.

No buildings, parts of buildings, fixtures or machinery sold for removal under these terms and conditions shall in any case be re-located or re-erected within the lines of any proposed street or other public improvement, and if any such buildings, parts of buildings, fixtures or machinery, etc., shall be re-located or re-erected within the lines of any proposed street or other public improvement, title thereto shall thereupon become vested in The City of New York and a resale at public or private sale may be made in the same manner as if no prior sale thereof had been made.

The Comptroller of The City of New York reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids; and be it further

Resolved, That while the said sale is held under the supervision of the Commissioners of the Sinking Fund, the Comptroller is authorized to cause the sale to be advertised and to direct the sale thereof as financial officer of the City.
