

2024 - Con Edison Equipment Stray Voltage Check

For the year of 2024, the Department of Transportations Energy Services Unit along with the Department of Transportations Electrical Inspectons Unit randomly surveyed locations for stray voltage pursuant to NYC Administrative Code Section 19-153 (Local Law 44 of 2004). These locations were at or around Con Edison equipment. Each location was tested using two methods:

- 1) Using HD electric LU-5 low voltage contact detector.
- 2) Using a Fluke 373 clamp meter with a verified good ground 50 ft. outside tested locaton.

All five boroughs were surveyed. Stray voltage locations checked can be found below

2024 CON EDISON EQUIPMENT STRAY VOLTAGE CHECK
