DEPARTMENT OF PARKS.

REPORT FOR THE QUARTER ENDING JUNE 30, 1908, BOROUGHES OF BROOKLYN AND QUEENS.

Department of Parks, Boroughs of Brooklyn and Queens,
Litchfield Mansion, Prospect Park,
Brooklyn, July 1, 1908.

Hon. GEORGE B. McCLELLAN, Mayor of The City of New York:

Sir—I have the honor to submit to you herewith, in accordance with the provisions of section 1544 of the Charter, a quarterly report of the proceedings and finances of the Department of Parks, Boroughs of Brooklyn and Queens, from April 1 to June 30, 1908, inclusive.

Very truly yours,

M. J. KENNEDY, Commissioner.

Statement of Work Performed by the Department of Parks of the Boroughs of Brooklyn and Queens, during the Three Months from April 1 to June 30, 1908.

During the quarter ending June 30 the efforts of the Department were mainly directed toward getting all the parks and parkways in the system in good condition for the summer season. In addition, many improvements of a permanent character were made. Trees, shrubbery and flowers were planted, new asphalt tile walks were laid in several parks, and the roads in Prospect and other parks and parkways were repaired.

Prospect Park.

Prospect Park, the principal park in the system, was completely overhauled, the trees and shrubbery cleaned, repairs to the roadways and drives made, buildings were repaired and other work of a similar character performed.

The croquet shelter was enlarged, and new brick gutters on concrete foundation were constructed along the West Drive from a point near the Litchfield Mansion to the Main Entrance. Over six thousand (6,000) flowering plants and shrubs, twelve hundred (1,200) evergreens and sixteen hundred (1,600) azaleas of different varieties were planted. One hundred thousand (100,000) feet of sod were laid. The work of reseeding the worn spots on the lawns and around the plantations was continued, and as a result it is now in excellent condition.

Forest Park.

Forest Park had its roads resurfaced and rolled, the gutters cleaned, and the golf course was thoroughly repaired and put in good condition. The greenhouses in this park furnished the major part of the flowering plants, etc., set out in the small parks and in Prospect Park during the spring and early summer season.

Highland Park.

A large amount of regrading and reseeding was done in this park. The flower garden received a number of fine new plants and is in a flourishing condition. All the roadways were repaired and resurfaced, and the one leading from the park proper to Jamaica avenue was practically rebuilt.

Fort Greene Park.

A large portion of this park, particularly that part fronting on Myrtle avenue, is in the hands of the contractor who is erecting the Prison Ship Martyrs' Monument and its appurtenances. This work is unfinished, and as a result very little could be done on this portion of the park. The remainder has been kept in good condition. Borders were hedged, and considerable sodding, seeding and other work was performed throughout the park.

Sunset Park.

The grounds around the new shelter were graded, sodded and seeded. The territory adjoining the newly laid tile walks was treated in a similar manner, the edges being sodded and the larger areas seeded down. A contract has been awarded for the construction of the boundary wall on Forty-fourth street and Seventh avenue and part of Fifth avenue. When this is completed the park will be planted and placed in a finished condition.

Seaside Park.

Seaside Park, at Coney Island, received a thorough overhauling. New flower beds were laid out, the walks were paved with asphalt tile pavement, and the plantations adjoining the walks were resodded, sodded and seeded.

Irving Square, Saratoga Square, Rushwick, Cooper, Bedford and Fulton Parks had their interior walks remodeled and paved with asphalt tiles. The lawns bordering these walks were reshaped, covered with topsoil, the edges sodded and the remainder seeded.

Winthrop Park.

Winthrop Park is now in course of transformation by having its interior walks paved with tiles. About six thousand (6,000) cubic yards of topsoil have been spread in this park preparatory to the laying of the new walks.

The remaining small parks have been carefully looked after and all of them are in good condition.

Athletics on Parade Ground.

The parade ground was opened early in April, and devotees of baseball, cricket and other sports were afforded an opportunity to indulge in their favorite pastime. The tennis grounds were formally opened on Decoration Day and since then have been largely used. The space allowed for that sport has been somewhat enlarged, and there has been a vast increase in the number of players.

Music in the Parks.

The first concert of the season was given on Sunday, May 31. The following Sunday the United German Singers of Brooklyn, numbering over five hundred (500), gave an excellent concert, which was attended by a crowd variously estimated as between twenty-five thousand (25,000) and thirty-five thousand (35,000) people. Concerts will be given every Saturday and Sunday until the middle of October in Prospect Park, and in several of the small parks every Sunday until the middle of September. Owing to the location of Highland Park and its popularity the concert season was started in June.

Altogether forty (40) concerts are to be given in Prospect Park and fifty-two (52) in the smaller parks.

The trees in all the parks and on the parkways were pruned, cleaned and sprayed. All the dead trees were removed and new ones planted instead. Much attention was given to this work, and as a result the parks were singularly free from the insect pests that visited other sections.

Parkways.

Ocean Parkway was thoroughly overhauled. Repairs to the traffic road were made wherever necessary, the cycle path was partly resurfaced with limestone screenings, the trees were cleaned and the grass borders put in good condition. A large portion of the Eastern Parkway Extension was resurfaced with limestone screenings and limestone, and the asphalt portions were repaired and partly resurfaced.

Glennmore avenue was thoroughly repaired and put in good condition. The remainder of the streets in the Twenty-sixth Ward of the Borough of Brooklyn under the care of this Department, paved with asphalt, were repaired and cleaned.

Bay Parkway—The work of resurfacing this parkway with limestone and Hudson River gravel has been started, and it is expected that it will be finished by August 1.

The Shore road has been overhauled and repaired where necessary. Sections of the same were recoated with trap rock and screenings.

Fort Hamilton Avenue—The pavement of this parkway is the poorest of any under the jurisdiction of the Department. Money for the repaving of this thoroughfare has been asked for on several occasions, but no funds have been provided. It is impossible to keep it in a satisfactory condition, although constant repairs to the macadam are being made. Owing to the building operations in this section the macadam pavement which was laid about ten years ago is inadequate to take care of the exceedingly heavy traffic.

Care of Trees in City Streets.

The work of caring for the trees in the city streets has been continued with vigor. In consequence of the siege of the Tussock moth the elm leaf beetle and other destructive insects the efforts of the Department were in the main directed to combat the same. Shortly after the care and preservation of the trees on all the city streets were placed under the control of this Department, and an approximate estimate was made of the cost of cleaning and pruning the trees in the two boroughs, a request was made to the Board of Estimate and Apportionment for a sum sufficient to begin the treatment of the trees in a systematic manner. The amounts allowed from time to time have not been adequate to properly protect and treat the street trees. A scheme of treatment was evolved which had for its primary object the preservation of the trees in and surrounding the larger parks in the Borough of Brooklyn. A systematic treatment was accorded to the sections immediately adjoining Prospect, Fort Greene and a few of the other parks. The trees in these areas were cleaned of all insects, egg masses, and the dead wood removed and carted away. The spring and early summer seasons, however, demonstrated that the force available for the purpose of looking after the trees was entirely too small. Both boroughs were overrun with enormous

masses of insects. Some species that have not appeared in the city for forty years were prevalent this year, and the Department, in order to preserve the good work which had been previously done, was compelled to increase its force of employees. In spite of this increase and the most earnest efforts it was impossible to prevent the ravages of the Tussock moth and elm leaf beetle to any great extent.

Early in the spring the work of pruning the trees was started and continued as long as it was practical to do so. Then the spraying began. An idea of the magnitude of the work done is shown by the following figures:

	Trees.

Revenue from Parks and Parkways.

During the three months from April 1 to June 30, 1908, inclusive, the sum of five thousand two hundred and eleven dollars and fifty-eight cents (\$5,211.58) was received from rents of houses, revenue from park privileges and bay window permits, which amount was turned over to the Hon. James J. Martin, City Chamberlain, for deposit to the credit of the "Revenue Fund."

Finances.

On the following pages will be found a statement of the finances up to and including June 30, 1908.

The buildings and appurtenances thereto will be sold to the highest bidder, who must pay immediately cash or a certified check drawn to the order of the Comptroller of the City of New York, and must also, at the time of the sale, give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of Fifty Dollars the sum of fifty dollars shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City of New York to the cost of completing any other work required under the contract, but unfinished at the expiration of the contract period.

All the materials of the buildings, sheds, walks, structures and cellars of whatever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the sidewalk and curb in front of said buildings extending within the described area and down to the level of the cellar bottom, shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises except old mortar or plaster only which may be left, but not higher at any point than two feet below the curb opposite that point; also the foundation walls of all classes shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building.

The purchaser at the sale shall also withdraw and remove all abandoned water taps and old service mains, and in place thereof cause to be inserted a brass plug in the main water pipe in the street, in compliance with the rules and regulations of the Department of Water Supply, Gas and Electricity, and furnish the Department of Finance with a certificate from the Department of Water Supply, Gas and Electricity that this has been performed; but this provision shall not apply where portions only of buildings are removed.

The purchaser at the sale shall also remove all house sewer connections to the main sewer in the street, and the opening of the main sewer in street shall be properly closed in compliance with the direction of the Bureau of Sewers, Borough of Manhattan, and furnish the Department of Finance with a certificate from the Bureau of Sewers that the work has been properly performed; but this provision shall not apply where portions only of buildings are removed.

The permits for all openings to the street to be obtained by and at the expense of the purchaser of the building.

Failure to remove said buildings, appurtenances, or any portion thereof within sixty days from the day of the sale, will work forfeiture of ownership of such buildings, appurtenances or portion as shall then be left standing, together with all moneys paid by said purchaser on account thereof at the time of the sale, and the bidders' assent to the above conditions being understood to be implied by the act of bidding, and the City of New York will, without notice to the purchaser, cause the same to be removed at the cost and expense thereof charged against the security above mentioned.

The work of removal must be carried on in very respect in a thorough and workmanlike manner and must be completed within sixty days from the day of sale, and the successful bidder will provide and furnish all materials of labor and machinery necessary thereto, and will place proper and sufficient guards and fences and arming signs by day and night for the protection of accidents, and will indemnify and be harmless to the City of New York, its officers, agents and servants and each of them, against any and all suits and actions, claims and demands of every name and description brought against it, them or any of them, and against all from all damage and costs to which it, they or any of them may be put by reason of injury to the person or property of another, resulting from negligence or carelessness in the performance of the work, or in guarding the same, or on any improper or defective materials or machinery, implements or appliances used in the removal of the said buildings.

Party walls and fences, when existing against adjacent property not sold, shall not be taken down. All furnishings, plaster, chimneys, projecting iron, etc., on the faces of such party walls are to be taken down and removed. The walls shall be made permanently self-supporting, beam-ends, c. r. in, and the walls pointed and made exclude wind and rain and present a clean exterior. The roofs of the adjacent buildings shall be properly flashed and painted and made tight where they have been disturbed by a operation of the contractor.

The Public Service Commission for the First District reserves the right on the day of sale to withdraw from sale any of the buildings, parts of buildings and machinery included therein, or to reject any and all bids.
