Hon. PEVER J. DOOLING, Deputy and Acting Commissioner :

Six—In accordance with your instructions I submit herewith a report of the transactions of this office for the quarter ending March 31, 1900, including work under the heads of building construction, maintenance of heating and power plants in public buildings and public lighting of

where and haildings.

Work on the new Hall of Records has been in progress during the quarter. In laying brick and concrete the Contractor has used 17 carloads of Portland cement. Daily tests of this cement have been made with average results as shown in the following tables:

Standard hot-miter maters, placed during 1500 to the primapil and and now a plants have given an opportunity to less the relative efficiency of each plants arows by the number of pound of water evaporated per pound of coal consumert. This value fetwers the times of five and eight

pounds.

In the Criminal Court-house these meters measure water emerged by builders at a compensative of aheat 175 degrees Fahrenheit, and have been used in compens the relative fact values of different grades of cools. From 1,500 grass long of red are required annually under the four 130 horse-power techniar bodiers of this landding. Grains have been placed to be no charger grades, and preliminary tests medicate a net saving of 35 per cool. Wheel across scales have been introduced at this building and o cold to check on a large scale the one can, a fair and discombinable matter in the coal received. These tests have been confirmed by taliarative been and appear to be of value in combining both Companion and Department to know with ever piece to equality of coal which is being fitted for its following table shows a axing data or a quality of coal which is being fitted for its following table shows a axing data or a quality of grades of a st. This is due largely to the introduction of Wishord 1 ght and other improved appliances, and in part to the core every of in the different budding to as a wall business of a grade and the adjacent are liquid about 250 miles of the Wishord I ght and other improved appliances, and in part to the core every of in the different budding to as a wall business and the adjacent are liquid about 250 miles of the Wishord Far House, and experiment made with apparatus devess for the purp have shown many of the equal to be upperficued.

At the beginning of the quarter server the combinated, and limite the quarter 184 more, thereby effecting at amount as any as 500,000.
