

Con Edison Equipment Stray Voltage Check

For the year of 2020, the Department of Transportation Electrical Inspection Unit randomly surveyed locations for stray voltage pursuant to NYC Administrative Code Section 19-153 (Local Law 44 of 2004). These locations were at or around Con Edison equipment. The device used was the Tool Experts Voltage Detector Model 3215. All five boroughs were surveyed. No locations were found to have stray voltage and no such reports were made to Con Edison.

Date of Inspection, Borough, Location, type of Con Edison equipment, and whether stray voltage was found at the location are indicated below.
