NUMBER 262.

LAW DEPARTMENT.

OPINIONS OF THE COUNSEL TO THE CORPORATION.

The authority of the Fire Department to purchase implements convenient to the extinguishment of fires, is amply secured by law, and extends to the purchase of rights secured by the patent laws of the United States.

The provisions of the Charter requiring contracts for supplies to be awarded to the lowest bidder, upon opportunity for competition, do not apply to the acquisition of the right to manufacture an invention, unique and distinctive in its character, covered by letters patent.

The 115th section of the Charter providing that except for repairs no patented pavement shall be laid, and no patented article shall be advertised for, contracted for or purchased, except upon competition, cannot be construed to deprive the Fire Department of authority to purchase, without advertising for proposals, the right to use a patented and unique invention.

Provisions of law, however useful, which relate to the mere mode of proceeding to reach an end, must be regarded as sufficiently flexible to give way when a most important object is to be achieved, going to the very purpose of the maintenance of a municipal department.

LAW DEPARTMENT, OFFICE OF THE
COUNSEL TO THE CORPORATION,
NEW YORK, April 28, 1874.

Hon. Andrew H. Green, Comptroller:

SIR:—You transmit for my examination a bill of Mary Bella Scott Uda, dated February 11th, 1874, for \$25,000, which the Fire Department has agreed to pay, for an assignment and license, under United States Patent No. 142,349, of the right to manufacture and use for municipal purposes an improved fire escape and "aerial ladder." Accompanying the bill is the letter patent granted by the United States, a certificate of the Commissioner of Patents relating thereto, the assignment of the inventor, and a power of attorney from Michelo Uda to the claimant. You request my opinion upon the following propositions:

First.—Is the purchase by the Commissioners of the Fire Department of a right under letters patent, and the expenditure of the amount in question, authorized by law?

Second.—If yea, should not the validity of the patent be assured or in some manner established before consummating the purchase by the payment of the money?

Under the authority conferred upon the present Fire Department by section 79 of the act called the charter of 1873, sufficient authority is in my judgment conferred to purchase the patent in question, if in the opinion of that department such purchase would be for the benefit of the city, and provided the appropriation to that department be not thereby exceeded. (Laws of 1873, chap. 335, § 79.) The act of 1865, creating the Metropolitan Fire Department, gave the Board of Fire Commissioners full power to provide for the City of New York supplies, houses, tools, implements and apparatus of every kind to be used in the extinguishment of fires. (Laws of 1865, chap. 249, § 6.) The amended charter of 1870 empowered the Fire Commissioners to exercise all the powers theretofore conferred by law upon the Metropolitan Fire Department, and also to provide supplies, houses, tools, implements and apparatus, together with fire telegraphs, and to buy, sell, construct, repair and care for the same, and take such action in the premises as might be reasonable, necessary and proper. (Laws of 1870, chap. 137, § 84.) The 79th section of the charter of 1873, already referred to, provides that the Board of Fire Commissioners shall possess all the powers conferred by chapter 249 of the laws of 1865, and by any act of the Legislature amendatory thereof, not inconsistent with the provisions of the charter.

There can be no doubt that the Commissioners

have authority to purchase the right to use the "aerial ladder," and for that purpose to acquire by assignment the rights which the patent confers.

The 91st section of the charter, prescribing forms for the observance of the departments in making contracts, has no application here. In the nature of the case the provisions of that section cannot be applied. The principle of those provisions is that contracts for the purchase of supplies and for the performance of work must be awarded to the lowest bidder after opportunity for competition. This requirement is useful and salutary; but it cannot be interpreted to annul the authority so amply conferred by law upon the Fire Department to acquire whatever implements may be necessary to the prompt and most efficient performance of their duties. This useful invention stands by itself, protected by a patent, and cannot be made serviceable, except by the purchase of the rights secured by the Government of the United States. (See the case of the Harlem Gaslight Company vs. The Mayor, etc., 33 N. Y. Reports 309.) In case of Nickel vs. The Mayor, etc., not reported, the Court of Common Pleas, at a General Term, held that the Common Council had the right in 1860 to buy the patent of a fire escape for the then Fire Department. This was under the charter of 1857 and before the creation of a Metropolitan Fire Department. Since the organization of the Fire Department, the Commissioners have had the same power to purchase apparatus as was previously possessed by the Common Council. It is clear that if there be any fund to the credit of the Department the claim should be paid.

The 115th section of the Charter, after providing that no street which has been once paved at the expense of the owners of adjoining property, shall be repaved at their cost, unless petitioned for by a majority of the owners on the line, goes on to enact, that except for repairs no patented pavement shall be laid, and no patented article shall be advertised for, contracted for, or purchased, except under such circumstances that there can be a fair opportunity for competition, the conditions to secure which shall be prescribed by the Board of Estimate and Apportionment.

The case we are considering is not the purchase of a patented article, but simply the acquirement of a right to manufacture as many of certain patented articles as the Fire Commissioners may deem necessary. We must, if possible, construe the various unrepelled provisions of law, whether appearing in the charter or otherwise, in such a way as to give effect to all of them and carry out the plain intention of the Legislature, that the great object for which a certain department is established or continued may be carried out. If there were several patented articles, all designed to serve the same purpose, it would be within the power of the Department to invite competition; but invoking the light to be derived from the facts here, an examination of the papers before me, and proper inquiry, unite in demonstrating that this patent is for an article quite distinct from any apparatus yet invented to reach the tops of high buildings. The right and duty of the Fire Department to supply themselves with an apparatus like this cannot be questioned. It is reiterated by repeated statutes. This contrivance cannot be made available except by the purchase of the patent.

Provisions of law, however useful, which relate to the mere mode of proceeding to reach an end, must be regarded as sufficiently flexible to give way when a most important object is to be achieved, going to the very purpose of the maintenance of a municipal department.

With regard to your second question, the assignment of this patent was drawn in this office, and I then took occasion to examine the papers. I have also recently been furnished with an abstract of the title of the patent, and with other documents which I have read. There is no question as to the validity of the patent.

I enclose herewith, in two parcels, the abstract and documents last referred to, which should be carefully preserved; or if delivered to the claimant, copies should be deposited with the Comptroller.

I am, Sir, very respectfully yours,
E. DELAFIELD SMITH,
Counsel to the Corporation.

By order of the Board.

EMMONS CLARK,
Secretary.

HEALTH DEPARTMENT OF THE
CITY OF NEW YORK.

Bureau of Vital Statistics, April 27, 1874.

To the Secretary of the Board of Health:

SIR:—In the week that ended on Saturday, the 20th inst., there were 479 deaths reported in this city, against 558 deaths that actually occurred in the preceding week. The mortality records for the week just ended exhibited a marked decrease in fatality from diphtheria, croup and pneumonia, the number of deaths from these three causes being 40 less than in the previous week as respects fatal cases reported in the respective weeks. Infant mortality decreased in a similarly marked degree. The mean temperature last week was 44.4 degrees Fahr., and the range was from 36 to 57, or 21 degrees.

The death rate, which had risen to 29.15 per 1,000 annual rate, the second week in April, was at 27.90 in the week ending on the 18th inst., and, by the reported list of deaths last week, was equal to 23.95 per 1,000.

The presence and increase of small-pox in several quarters of the city is one of the significant results of the want of an adequate system of continual watchfulness and record that shall duly present to all unvaccinated persons the invitation and facilities to be vaccinated, and thereby protected against the most loathsome contagion. The invasion of the city by vagrant and ignorant persons the past four months has done its share in the propagation of small-pox.

Respectfully submitted.

ELISHA HARRIS, M. D.,
Registrar of Vital Statistics.

The leases will be made to conform to the requirements of the laws relative to ferries, and subject to such regulations, ordinances or by-laws, as now are or hereafter may be made or passed by the Common Council or State Legislature, and the leases will also provide that the lessees shall take and assume at their own costs and charges all or any responsibilities and liabilities of the Corporation of the City of New York to the present lessees of ferries in relation to boats, fixtures, &c., belonging to such lessees at the respective ferries.

The minimum rate for which the ferry franchise or license to operate ferries shall be used or enjoyed, has been appraised and set by the Commissioners of the Sinking Fund, at two and one-half per centum of the gross receipts for ferriage, that shall hereafter accrue at each separate ferry, to be paid quarterly yearly to the Corporation, and a covenant will be contained in each lease requiring the lessees to make and deliver to the Comptroller of the City of New York, quarterly, a statement in writing verified by oath or affirmation of the actual total gross receipts for ferriage received by such lessee during the preceding three months, and also that the lessees shall keep regular books of account showing the daily gross receipts of the ferry leased, and allow said Comptroller or any person designated by him to examine such books.

The Department of Docks of the City of New York, has fixed and established the rent for which it will lease the property in wharves, piers, slips and lands under water belonging to the Corporation, at the several ferries to be leased to the parties or persons to whom the lease of the ferry franchise shall be awarded by the Commissioners of the Sinking Fund, for the term specified for the lease of the franchise at the rates set forth hereafter, and no deviation will be made from the same, and covenants will be contained in such leases for construction, maintenance and surrender of all necessary fixtures and appurtenances to the wharf and pier property belonging to the City used by such respective ferries.

Proposals for the lease or license to use the ferry franchise at the respective ferries, to state the maximum percentage on gross receipts which the person or parties offering to take each ferry will pay in addition to the rent fixed by the Department of Docks for the use of the pier or wharf property belonging to the city, but no lease will be given at less than the minimum rate of 2½ per cent. on the gross receipts.

Security satisfactory to the Comptroller will be required for the punctual performance by the lessees of the covenants of the lease of the franchise in their behalf.
