NOTES

- This report is presented in accordance with the requirements set forth in section 17-199.12 of the administrative code of the city of New York.
- The report reflects data from the New York City Early Intervention Program (EI) for the period July 1, 2021 through June 30, 2022 (FY2022).
- The EI Program provides developmental services to children ages birth to three with developmental delays and disabilities.
- The EI Program does not provide medical services, nursing services, psychological services, or health services.
- This report includes all data required per section 17-199.12 of the New York City Administrative Code except the following items, which the New York Early Intervention System (NYEIS) does not capture:
 - Classification of children by housing status (e.g., homeless, residing in temporary housing)
 - Classification of homeless shelters, childcare providers, and nonprofit organizations as referral sources
 - IFSP Recommendations for sign language or cued language services
 - Service authorization data for children who have transferred to another NY EI jurisdiction
- If a category contains between one and five children or allows another category to be narrowed to between one and five children, the number has been replaced with an asterisk. A category that contains zero children has been reported as zero, unless such reporting would violate any applicable provision of federal, state, or local law relating to personally identifiable information.

INTRODUCTION

The Early Intervention (EI) Program is a federal entitlement program created as Part C of the Individuals with Disabilities Education Act to provide services to children under three years old with developmental delays and disabilities. In New York City, the EI Program is administered by the NYC Department of Health and Mental Hygiene (NYC Health Department). EI services, which are provided through a network of agencies in contract with the NYS Department of Health, are available regardless of families' income or immigration status, at no cost to them.

The NYC Health Department is committed to ensuring that all eligible children have access to EI services and addressing historical racial disparities. Disparities are greatest for Black children who represent 21% of the birth to three years population in New York City but only 19% of children referred to EI. However, 19% is an improvement from 17% observed in 2019, reflecting the Bureau's concentrated efforts in this area. In recent years, the Bureau has strengthened its community outreach and developed partnerships with community organizations, collective impact groups, and other City agencies to address misconceptions and stigma about the EI Program. In 2021-2022, partnerships with pediatric primary care practices at hospital systems serving communities with low rates of referral focused on increasing referral at younger ages with higher rates of retention. The Bureau also continues its academic collaborations with CUNY and SUNY, encouraging dissemination of best practices and engagement of graduating students to work in the Early Intervention Program.

FY2022 Highlights

After referrals to the Program decreased during the COVID-19 pandemic from 35,111 in FY2019 to 29,275 in FY2020, they began rebounding in FY2021. And in FY2022, the NYC Early Intervention Program received 34,639 referrals despite a 4% decline in the total population of children under 3 years of age. The number of multidisciplinary evaluations submitted increased from 24,313 in FY2021 to 27,375 in FY2022 and the number of children receiving services increased from 30,393 to 31,341. However, during this time families' preference for in-person services has grown, while interventionists have continued to prefer teletherapy, this has contributed to an increase in the average time from Individualized Family Service Plan (IFSP) meeting to first service from 15.9 days in FY2021 to 21.6 days in FY2022. There has also been a smaller decrease in the proportion of children who received all services within 30 days of IFSP meeting, from 54% in FY2021 to 52% in FY2022.

REFERRALS – REPORTING ITEM 1

Item 1. The number of referrals for initial evaluations in total and disaggregated by referral source

There were 34,639 referrals to the EI Program in FY2022, up from 31,992 in FY2021. Child and family trends were consistent with previous years. Nearly two-thirds of referrals were boys, which is consistent with scientific and clinical knowledge of the prevalence of disability in the population. English was the dominant language for 67% of families referred. About half of the remaining referrals (17%) were from Spanish-speaking families. Data on source of referral are unreliable because there is no way to know if the referral “source” was acting at the recommendation of a pediatrician or childcare provider. Most referrals were from EI provider agencies (60%) and parents/families (19%).

Table 1(a-d): Number of referrals to the NYC Early Intervention Program during the period of July 1, 2021 through June 30, 2022

Table 1a. Number of Referrals by Race

Race	Referrals	
	#	%
Total	34,639	100%
White	10,231	30%
Black	6,661	19%
Latinx	13,171	38%
Asian/PI/NA ¹	4,576	13%

¹ PI = Pacific Islander, NA = Native American

Table 1b. Number of Referrals by Gender

Gender	Referrals	
	#	%
Female	13,013	38%
Male	21,625	62%

Table 1c. Number of Referrals by Language

Dominant Language	Referrals

English	23,282	67%
Spanish	5,781	17%
Other ¹	4,951	14%
Unknown	624	2%

¹ Of other languages, the top 5 are Russian, Yiddish, Chinese, Bengali, and Arabic.

Table 1d. Number of Referrals by Source

Referral Source ¹	Referrals	
	#	%
EI Provider	20,743	60%
Parent or Family	6,569	19%
Hospital	3,242	9%
Doctor	1,828	5%
EI Developmental Monitoring Unit	872	3%
Foster Care Agency or ACS	515	1%
Other	870	3%

¹Data on referral source are unreliable.

INITIAL EVALUATIONS – REPORTING ITEM 2

Item 2. The number of initial evaluations conducted, including the number of such evaluations that resulted in a determination that the child was eligible for the Early Intervention Program.

A Multidisciplinary Evaluation (MDE) is performed by a team of qualified professionals from different disciplines who assess the child's functioning in the five developmental domains: physical, cognitive, communication, social-emotional, and adaptive. The results of the MDE will be used to determine the child's eligibility for the EI Program, based on eligibility criteria established by New York State.

During FY2022, 27,375 MDEs were completed. More than half (59%) of the children evaluated were determined eligible for the program. Eligibility was higher among White and Black children (59% and 65%, respectively), than among Latinx (56%) and Asian/Pacific Islander/Native American (55%) children. Slightly more boys than girls were determined eligible (61% vs 54%), and eligibility was highest among children whose dominant language was neither English nor Spanish.

Table 2 (a-2): Number of MDEs submitted, including the number of such evaluations that resulted in a determination that the child was eligible for the Early Intervention Program during the period of July 1, 2021 through June 30, 2022.

Notes:

- Number of MDEs are reported based on the date of submission.

Table 2a. Number of MDEs and Number and Percent Found Eligible by Race

Race	Total # of MDEs	Child was Found Eligible	
		#	%
Total	27,375	16,033	59%
White	8,919	5,254	59%
Black	4,644	3,022	65%
Latinx	9,947	5,612	56%
Asian/PI/NA ¹	3,865	2,145	55%

Table 2b. Number of MDEs and Percent Found Eligible by Gender

Gender	Total # of MDEs	Child was Found Eligible	
		#	%
Female	10,151	5,482	54%
Male	17,224	10,551	61%

Table 2c. Number of MDEs and Percent Found Eligible by Language

Dominant Language	Total # of MDEs	Child was Found Eligible	
		#	%
English	18,133	10,474	58%
Spanish	4,369	2,462	56%
Other ¹	4,322	2,806	65%
Unknown	551	291	53%

¹ Of other languages, the top 5 are Russian, Yiddish, Chinese, Bengali, and Arabic.

IFSP MEETINGS – REPORTING ITEMS 3-4

Item 3. The number of IFSP meetings convened less than or equal to 45 calendar days from the date of referral.

Item 4. The number of IFSP meetings that were convened more than 45 calendar days from the date of referral.

The Individualized Family Service Plan (IFSP) is a written plan that identifies the EI services the child and family will receive. Federal law requires that the initial IFSP meeting (during which the IFSP is developed) must be convened within 45 calendar days of the date the child is referred to the EI Program.

During FY2022, there were 12,873 initial IFSP meetings, of which 86% occurred within 45 days of the date of referral; or at a later date due to family reasons, as defined by Federal regulations. IFSPs delayed beyond 45 days for reasons that were not family-driven occurred most often among Black children (18%), and least often among Asian children (11%). Delayed IFSP meetings were less common among children who speak Spanish (11%).

Table 3-4(a-c): Number and percent of initial IFSP meetings convened within or after 45 calendar days from the date of referral during the period of July 1, 2021 through June 30, 2022.

Notes:

- Includes all initial IFSP meetings convened during July 1, 2021 to June 30, 2022.
- Days are counted from the date of referral to the date of initial IFSP meeting.

Table 3-4a. Timeliness of Initial IFSP Meetings by Race

Race	Initial IFSP Meetings Convened ≤45 Days		Initial IFSP Meetings Convened >45 Days		Total
	#	%	#	%	#
Total	12,873	86%	2,098	14%	14,971
White	4,246	84%	788	16%	5,034
Black	2,269	82%	484	18%	2,753

Female	4,407	86%	710	14%	5,117
Male	8,466	86%	1,388	14%	9,854

Table 3-4c. Timeliness of Initial IFSP Meetings by Language

Dominant Language	Initial IFSP Meetings Convened <=45 Days		Initial IFSP Meetings Convened >45 Days		Total
	#	%	#	%	#
English	8,382	86%	1,408	14%	9,790
Spanish	2,029	89%	239	11%	2,268
Other ¹	2,195	84%	431	16%	2,626
Unknown	267	93%	20	7%	287

¹ Of other languages, the top 5 are Russian, Yiddish, Chinese, Bengali, and Arabic.

ACTIVE IFSP – REPORTING ITEM 5

Item 5. The total number of children who have an active IFSP (i) during the reporting period and (ii) as of June 30 of the reporting period.

A total of 31,367 children had an active IFSP in FY2022, of whom 18,104 were active on June 30, 2022. White and Latinx children each comprised approximately one-third of children with active IFSPs.

Table 5(a-c): Number of children who have an active IFSP (i) during July 1, 2021 and June 30, 2022 and (ii) as of June 30, 2022

Table 5a. Number of Children who have an Active IFSP in FY2022 and on June 30, 2021 by Race

Race	Children with an Active IFSP	
	FY2022 #	June 30, 2022 #
Total	31,367	18,104
White	11,412	6,914
Black	5,414	3,041
Latinx	10,547	5,951
Asian/PI/NA ¹	3,994	2,198

¹ PI = Pacific Islander, NA = Native American

Table 5c. Number of Children who have an Active IFSP in FY2022 and on June 30, 2022 by Language

Unknown	474	275

¹ Of other languages, the top 5 are Russian, Yiddish, Chinese, Bengali, and Arabic.

Table 5b. Number of Children who have an Active IFSP in FY2022 and on June 30, 2022 by Gender

Gender	Children with an Active IFSP	
	FY2022 #	June 30, 2022 #
Female	10,896	6,411
Male	20,471	11,693

TIME TO FIRST SERVICE – REPORTING ITEM 6

Item 6. The average number of calendar days between the date of the initial IFSP meeting and the date children begin receiving Early Intervention services.

On average, children began receiving EI services within 21.6 days of their initial IFSP meeting. Compared to White children, average time to service was five days longer for Black and Latinx children and three days shorter for Asian/Pacific Islander/Native American children. It was longer for children who speak Spanish (25.1 days) or English (21.7 days) than for children who speak other languages (19.0 days).

Table 6 (a-c): Average number of calendar days between the date of the initial IFSP meeting and the date children begin receiving early intervention services during the period of July 1, 2021 through June 30, 2022.

Notes:

- Includes all initial IFSPs with a start date falling between July 1, 2021 and June 30, 2022.

Table 6a. Time to Service by Race

Race	Average # of Days from Initial IFSP to First Service
Total	21.6
White	19.3
Black	24.9
Latinx	24.2
Asian/PI/NA ¹	16.3

¹ PI = Pacific Islander, NA = Native American

Table 6b. Time to Service by Gender

Gender	Average # of Days from Initial IFSP to First Service
Female	21.9
Male	21.5

Table 6c. Time to Service by Language

Language	Average # of Days from Initial IFSP to First Service
English	21.7
Spanish	25.1
Other ¹	19.0
Unknown ²	14.5

¹ Of other languages, the top 5 are Russian, Yiddish, Chinese, Bengali, and Arabic.

² Due to the small size of children whose language is unknown (<2% of total), the average number of days reported is not stable.

AUTHORIZED SERVICES – REPORTING ITEM 7

Item 7. The number and percentage of children with IFSPs who, (i) during the reporting period and (ii) as of June 30 of the reporting period, have IFSPs that recommend certain authorized services.

All children with IFSPs received service coordination. In FY2022, the most frequently authorized services included speech-language pathology (86% of children), special instruction or applied behavior analysis (86%), occupational therapy (OT) (53%) and physical therapy (PT) (31%). Transportation services, provided to facilitate the child's receipt of center-based group developmental services, were the next most common service (8%), with each of the other enumerated services used by fewer than 5% of children.

- Higher percentages of White children received PT and lower percentages received speech-language pathology and special instruction compared to children of other races.
- Higher percentages of boys than girls received OT, special instruction, and speech-language pathology, and a lower percentage received PT.
- Higher percentages of children from English-dominant families received OT compared to children whose families speak other languages.
- Compared to children from English-dominant families, a lower percentage of children from Spanish-speaking families received PT, and higher percentages received special instruction and speech-language pathology.

Table 7(a-f): The number and percentage of active children recommended for enumerated services (i) during the reporting period and (ii) as of June 30 of the reporting period.

Notes:

- Active children are defined as children who have an open IFSP during the reporting period.
- June 30th data includes IFSPs active on June 30, 2022.
- Applied Behavior Analysis (ABA) is identified by either a code of ABA, or a diagnosis of ASD and ≥ 5 hours of special instruction per week. Approximately one-third of families choose to receive ABA services for 5 - 10 hours per week and two-thirds choose to receive ABA services for 10 or more hours per week.
- The EI Program does not provide medical services, nursing services, psychological services, or health services.
- Data pertaining to sign language or cued language services are not available.
- Data pertaining to homelessness (status as a student in temporary housing) are not available.

Table 7a. Number and Percent of Children with Authorized Services in FY2022 and on June 30, 2022

	FY2022		June 30, 2022	
	#	%	#	%

TIMELINESS OF ALL SERVICES – REPORTING ITEM 8

Item 8. The number and percentage of children with IFSPs who were, during the reporting period, receiving in full the early intervention authorized services as recommended in their IFSPs within 30 days of the meeting; the number and percentage of children with IFSPs who were receiving in part such services within 30 days of such meeting and the number and percentage of children with IFSPs who were awaiting the provision of such services after 30 days of such meeting.

Almost all children (95%) start services within 30 days of their IFSP meeting, but only 52% receive their full package of services within that time frame. Among Black children, 42% receive their full package of services within that time frame. Higher percentages of girls (54% vs 51% for boys) and of children who speak languages other than English or Spanish (59% vs 51% for English-speaking and 51% for Spanish-speaking children) received their full package of services within 30 days of IFSP. Reasons for children not receiving all services in 30 days include authorizations for team meetings for interventionists, which do not occur until the child has been receiving services for some time, as well as large service packages with multiple services to be staffed.

Table 8(a-c): Number and percent of children receiving all, some and no EI services within 30 days of IFSP meeting

Notes:

- Percentage is calculated as percent of row total.
- Includes all IFSPs (initial and ongoing) with a start date falling between July 1, 2021 and June 30, 2022.
- Days are counted from the start date of IFSP to the date of service, or from the start date of the service authorization (SA) to the date of service, if a service is added between IFSPs.
- A child will often have multiple IFSPs in one fiscal year.
 - If a child receives all services listed on ALL IFSPs within 30 days, they belong to the category of receiving full services within 30 days.
 - If a child does not receive any service listed on any IFSP within 30 days (receives service after 30 days or does not receive service at all), he/she belongs to the category of not receiving any services within 30 days.
 - Others belong to the category of receiving some services within 30 days.
