CITY OF NEW YORK-BOROUGH OF BROOKLYN, OFFICE OF THE PRESIDENT,

# Board of Public Improvements :

Board of Public Improvements: GENTLEMEN-In September of last year the attention of your Board was called to two separate proceedings for the improvement of Regent place, between Flatbush and Ocean avenues, which were commenced prior to consolidation. The first proceeding was for the grading and paving, curbing and guttering three feet on each side with belgian blocks, which was confirmed by the Common Council of the City of Brooklyn on September 14, 1896 (see Minutes Common Council, volume 3, 1896, page 361). Subsequently the property-owners requested that an asphalt pavement be laid on the block, and proceedings were instituted in accordance with that request and carried to the point of confirmation of the assessment (see Minutes Common Council, City of Brooklyn, volume 4, 1897, pages 1098 and 1099). This proceeding provided simply for the paving of the block with asphalt, it being the opinion of those interested that the contracts to grade, pave, curb and gutter three feet on each side with belgian blocks and to pave with asphalt could be made simultaneously and the improvements carried out at the same time. This the Department of Highways reported as impracticable (see Minutes Board of Public Improvements, September 7, 1898, page 713), for the reason that a three-foot belgian-block gutter would not be suitable for a street paved with asphalt. The Corporation Counsel, in an opinion addressed to the Board of Public Improvements under date of May 23, 1899, stated that either one of the proceedings referred to above could be discon-tinued and the other prosecuted to completion. I think, however, it would be better to dis-continue both proceedings, for the reason that in the proceeding to pave with asphalt no pro-vision is made for grading the street, so that one could not be prosecuted alone. As the property-owners desire an asphalt pavement, it is not advisable to prosecute the proceeding for grading and paving, curbing and guttering three feet on each side with belgian blocks. I acco
