RAPID TRANSIT RAILWAY.

Brooklyn Bridge and Fulton Street Connection (Borough of Brooklyn).

Consideration of the communication from the Board of Rapid Transit Railroad Commissioners, transmitting resolutions as to route and general plan of a rapid transit railway along certain streets in the Borough of Brooklyn, and known as "Brooklyn Bridge and Fulton Street Connection (Borough of Brooklyn)," which, by resolution duly adopted November 16, 1906, was fixed for this day.

The Secretary presented the following:

BOARD OF ESTIMATE AND APPORTIONMENT,
BUREAU OF FRANCHISES, ROOM 79, NO. 280 BROADWAY,
November 17, 1906.

Hon. GEORGE B. MCCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—The Board of Rapid Transit Railroad Commissioners in and for The City of New York, under the authority of the Laws of 1891, chapter 4, section 4, has considered and determined that it is for the interest of the public and of The City of New York that a rapid transit railway for the conveyance and transportation of passengers and property should be established therein, and has adopted a route and a general plan of construction thereof; the copies of which route and general plan, duly certified under date of November 1, 1906, are attached to the communication dated November 7, 1906, received from the said Board on the 9th day of November, in the said year. And further, in conformity with said act, section 5 thereof, said Board of Rapid Transit Railroad Commissioners has transmitted to the Board of Estimate and Apportionment the said certified copy routes and general plan, entitled "Brooklyn Bridge and Fulton Street Connection (Borough of Brooklyn)," together with said communication, referring to the purpose which influenced the decision of the said Board in these words:

"The railway now proposed is intended to enable these subways to make physical connection with the Bridge tracks,"

—and requesting the Board of Estimate and Apportionment to approve said action of their Board for the reason that the railway proposed "will enable the City to contract for the construction of a subway system in the Borough of Brooklyn and Manhattan which shall utilize the bridges."

The communication deals in detail with the route and its connections, and states that the entire railway "is only about 1,800 feet in length, of which one-half is within the storage yard of the Brooklyn Bridge and one-half in Washington street."

According to section 5 of said act, the Board of Estimate and Apportionment, on receipt of said plans and conclusions, must appoint a day not less than one week nor more than ten days after the receipt thereof, for consideration of such plans and conclusions, and in consequence did appoint Friday, November 23, 1906, as such date, and that the Secretary of the Board of Estimate and Apportionment was directed to cause notice of the same to be published in the CITY RECORD.

The Board of Rapid Transit Railroad Commissioners has made, on a scale, a map of the said route and general plan, which map is entitled:

"Loop No. 9B, Brooklyn No. 5, Sheet No. 1,"

—and accompanies the communication.

There has been, as I am informed by the Secretary of the Board of Rapid Transit Railroad Commissioners, however, no written report made by the engineer as to the said proposed route or general plan, showing the cost of construction or the time that would probably be required for the completion of such work. It appears, however, from a study of said map, that this proposed connection will in no way interfere with the usual current of traffic on the Brooklyn Bridge, and will not require any material change in the approach to said Bridge, which is now used by other railroads, trolley companies or general traffic. The subway trains, when on the Bridge proper, will use the present Bridge railroad tracks, and can only descend to the subway route known as "No. 90," on the Manhattan side, after the radical changes are made at a cost of about \$600,000, which were outlined in a letter to the Board of Estimate and Apportionment, dated September 22, 1906, by the Commissioner of Bridges.

When this route and plan were on the calendar of the Board of Rapid Transit Railroad Commissioners for a public hearing, no one appeared in favor of or in opposition to the proposition. However, the resolution was adopted by unanimous vote of the Commissioners present.

I have no objections to offer to the route as proposed, and would recommend its adoption by the Board of Estimate and Apportionment.

Respectfully,

HARRY P. NICHOLS, Assistant Engineer.

The following was offered:

Whereas, The Board of Rapid Transit Railroad Commissioners for The City of New York, constituted pursuant to the provisions of chapter 4 of the Laws of 1891 and the acts amendatory thereof, has duly determined upon a route or routes and general plan of construction of a rapid transit railway for the conveyance of persons and property, to be established in said City, in addition to the already existing lines, and did, by resolution of October 18, 1906, adopt such route or routes and general plan, being more particularly described as "Brooklyn Bridge and Fulton Street Connection (Borough of Brooklyn)"; and

Whereas, Thereafter said Board of Rapid Transit Railroad Commissioners did transmit to the Board of Estimate and Apportionment of The City of New York a copy of the plans and conclusions for said route or routes as adopted, which plans and

conclusions were received by said Board of Estimate and Apportionment on the 16th day of November, 1906, at a meeting of said Board of Estimate and Apportionment, duly held on such day; and

Whereas, Said Board of Estimate and Apportionment, by resolution duly adopted at said meeting, did appoint a day not less than one week nor more than ten days after the receipt thereof for the consideration of such plans and conclusions, to wit: the 23d day of November, 1906, at 10.30 o'clock a. m.; and has proceeded with such consideration; and

Whereas, The plans and conclusions are duly set forth in the resolutions of said Board of Rapid Transit Railroad Commissioners, adopted October 18, 1906, and which resolutions are as follows:

BROOKLYN BRIDGE AND FULTON STREET CONNECTION (BOROUGH OF BROOKLYN).

Whereas, The Board of Rapid Transit Railroad Commissioners for The City of New York has determined that a rapid transit railway or railways for the conveyance and transportation of persons and property in addition to those already existing, authorized or proposed are necessary for the interest of the public and of The City of New York, and should be established therein as hereinafter provided; and

Whereas, This Board has duly made the inquest and investigation necessary or proper in the premises and all such inquests and investigations as are necessary or proper for such determination;

Now, therefore, This Board, by the concurrent votes of at least six members, does hereby adopt the following route or routes for an additional rapid transit railway or railways in The City of New York, and does hereby determine and establish the said additional route or routes thereof as follows, and does hereby adopt a general plan of construction of the said railway or railways, the route or routes of which are herein provided, and does in such general plan hereby adopted show the general mode of operation and such details as to the manner of construction as may be necessary to show the extent to which any street, avenue or other public place is to be encroached upon and the property abutting thereon affected.

Route.

A route lying wholly within the Borough of Brooklyn, the centre line of which shall begin at a suitable point near the southwesterly corner of Washington street and Nassau street, within the storage yard of the Brooklyn Bridge, at which a connection can conveniently be made with the railroad tracks leading from the said yard to and across the said bridge; running thence southerly through the said bridge storage yard parallel with Washington street, or nearly so, and descending from the level of the said bridge tracks to a point in the northerly side of Tillary street westerly from and near its intersection with the westerly side of Washington street; thence passing under and across Tillary street to a point at or near the intersection of the southerly side of Tillary street with the westerly side of Washington street; thence running southerly under private property to Washington street and under Washington street to a point or points in Fulton street southerly and easterly from its intersection with Myrtle avenue, at which a suitable connection or suitable connections can be made either with the subway now under construction, which passes through Joralemon street and Fulton street, or else with a subway to be hereafter constructed pursuant to the route and general plans adopted by this Board on May 25, 1905, which provide for a rapid transit railway running through Willoughby street, Fulton street and other streets in the Borough of Brooklyn.

Plan of Construction.

The general plan of construction hereby adopted is as follows:

For the whole of the route above described there shall be two tracks.

The above mentioned tracks shall be substantially parallel with each other and on substantially the same level, except that near the intersection of Washington street with Willoughby street and Fulton street the tracks shall be at such levels and on such alignments as to permit of proper connections with the other subways above mentioned, and except also that wherever else required by special necessities of surface or subsurface structures or other special or local necessities, or for the purpose of avoiding grade crossings, any one or more of the tracks may be elevated above or depressed below the other track or tracks so far as may be necessary.

The tracks shall be placed in tunnels or subways, except that from the point of junction with the bridge railroad tracks to the point where the said tracks pass into and under Washington street, the tracks hereby authorized to be laid shall be upon a descending grade passing through and under the bridge storage yards partly through an open cut below the said storage yard and partly upon a viaduct or elevated structure. Where the said tracks cross the centre line of Concord street they will be approximately at the present level of the said street and in order to avoid a grade crossing it will be necessary to close Concord street between the westerly side or line of Washington street and a point not exceeding fifty feet westerly therefrom and between Washington and Liberty streets.

The tracks shall be placed in general under the central part of the longitudinal streets forming a portion of the route above described so far as may be practicable and convenient; but wherever required by special or local necessities or for curves the tracks or any one or more of them may be diverted as far as necessary to one side or the other of such streets or any of them, and any part of the said streets may be occupied so far as the purposes of this general plan require.

Wherever necessary for the proper support of the surface of a street the roof of the tunnels shall be of iron or steel, with brick or concrete arches, supported, when necessary, by iron or steel or masonry columns and resting upon masonry walls; or the roof shall be a masonry structure, or the whole of the lining may be of metal.

The roof of the tunnels when under a street shall be as near the surface as street conditions and grades will conveniently permit.

The tunnels shall in no case be less than thirteen feet in height in the clear.

There shall be a width in the tunnels not exceeding fifteen feet for each track in addition to the thickness of the supporting walls, except that at stations, switches, turnouts, curves and crossovers the width may be increased.

The tracks shall be of standard gauge, that is to say, of the width of four feet and eight and a half inches between the rails.

Adjacent tracks shall be connected by necessary and suitable switches and connections, and an additional track for siding accommodations may be constructed not to exceed in length one-quarter of a mile for each mile of roadway.

The tracks, wherever constructed below the surface, may at any point of the route be placed in the same tunnel; or there may be separate tunnels for one or more tracks, as shall be most convenient.

If any station is built on the route herein described, such station and the necessary station approaches shall, in general, be at the intersections of streets and shall be built under, or, if the position of the tracks so require, over the streets and immediately adjoining private abutting property, or through private property to be acquired for the purpose, or both under or over streets and through private property as aforesaid. The streets under which stations or station approaches shall be built may include

cross streets, but no part of any cross street shall be used for a station approach at a distance greater than seventy-five feet from the exterior line or side of the longitudinal street of the route.

Wherever along any part of the routes above described it shall be necessary for the proper maintenance or accommodation of pipes, wires, sewers or other subsurface structures the removal, construction or reconstruction of which shall be rendered necessary by the construction of the railway, the width of any tunnel or subway may be enlarged on either or both sides by an additional width on each side of the route, not to exceed fifteen feet on either side, provided always that the limits hereinbefore provided as to the longitudinal streets of the route shall be observed. All or any pipes, wires, sewers or other subsurface structures may be placed in suitable galleries to be constructed within the additional widths hereinbefore permitted. At each cross street where accommodation for pipes, wires, sewers and other subsurface structures shall be those provided within the tunnels or subways, such tunnels or subways, in order to provide convenient access to the same, may have, within the limit of the sides or exterior lines of such cross streets or such lines produced, an additional width on each side of the routes not to exceed fifteen feet.

Pipes, wires, sewers, street railway tracks, poles for electric wires and other surface and subsurface structures at any part of the said routes shall be removed or disturbed only when necessary for the construction and operation of the railway above referred to, and if removed or disturbed shall be placed over, upon or under the several streets in such manner and in such location that the use and service thereof shall not be impaired. All pipes, wires, sewers and other subsurface structures shall be left or shall be so arranged as to give free access for their repair or alteration, or for the placing with them, so far as there may be space, of new pipes, wires, sewers and other like structures, and for making connections between the same and abutting buildings at any time.

The manner of construction shall be by tunnelling or open excavation.

Mode of Operation.

The general mode of operation of the route or routes above described shall be by electricity or some other power not requiring combustion within the tunnels, and the motors shall be capable of moving trains at a speed of not less than forty miles per hour for long distances, exclusive of stops.

Definitions.

The word "street" wherever used herein shall include an avenue or public place.

The words "Rapid Transit Act" wherever used herein shall be taken and held to mean chapter 4 of the Laws of 1891, entitled "An Act to provide for Rapid Transit railroads in cities of over one million inhabitants," as amended by chapter 752 of the Laws of 1894 and other acts of the Legislature.

Maps and Drawings.

It is further

Resolved, That the map and profile entitled "Board of Rapid Transit Railroad Commissioners of The City of New York—Routes and General Plan, Brooklyn No. 5, sheet No. 1," be and it is hereby adopted as showing the foregoing route and general plan, for convenience merely, and that said map and profile is not to be deemed a part of the description of the route or a part of the general plan, for any purpose whatever.

Now, therefore be it

Resolved, That the Board of Estimate and Apportionment of The City of New York, by a majority vote according to the number of votes by law pertaining to each member of the Board, hereby approves such plans and conclusions and consents to the construction of a railway or railways in accordance therewith.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Bush Terminal Railroad Company.

The Secretary presented the following:

To the Honorable Board of Estimate and Apportionment of The City of New York: The petition of the Bush Terminal Railroad Company of the Borough of Brooklyn, City of New York, respectfully shows:

1. Your petitioner is a street surface railroad corporation duly organized and existing under the laws of the State of New York, having filed its certificate of incorporation in the office of the Secretary of State on the 17th day of January, 1903, and in the office of the Clerk of the County of Kings on the 19th day of January, 1903.

2. By an ordinance of the Board of Aldermen, approved by the Mayor of The City of New York on the 14th day of February, 1905, the right or franchise to construct and operate a street surface railway in, upon and along certain streets, avenues and highways in The City of New York, was duly granted to your petitioner. The said franchise or right was described in the ordinance as follows: Commencing at a point where the centre line of Twenty-eighth street, if extended, would meet the centre line of Second avenue, if extended; running thence southerly upon and along Second avenue, if extended, to the former tide water line just north of Thirty-eighth street; thence southerly upon and along Second avenue to Forty-first street; thence westerly upon and along Forty-first street to First avenue, and thence southerly upon and along First avenue to the southerly side of Sixty-fifth street; together with the necessary connections, switches, sidings, turnouts, turntables, crossovers and suitable stands for the convenient operation of said surface railway, and for the accommodation of the cars of the said Bush Terminal Railroad Company which may be run over said railway tracks by the said Bush Terminal Railroad Company, its successors or assigns, as may be subsequently permitted by the Board of Estimate and Apportionment, or its successors in authority. The said route was shown upon a map filed with the Board of Estimate entitled "Map showing plan of tracks of Bush Terminal Railroad Company."

3. It was provided in section 1 of the said ordinance that deviations from the right of way and additional switches, crossovers and spurs, which are consistent with the foregoing section and the other provisions of this franchise, may be permitted by resolution of the Board of Estimate and Apportionment.

4. The construction of the road as authorized by the said ordinance has been completed by the Bush Terminal Railroad Company, and all the conditions and terms contained in said ordinance have been fully complied with.

5. Your petitioner now desires to construct two crossovers as provided in section 1 of said ordinance as follows:

First—Beginning at a point in the easterly track of your petitioner on its property on the westerly side of First avenue which point is opposite Forty-ninth street at the intersection of First avenue and Forty-ninth street; crossing northeasterly across First avenue and across the tracks of your petitioner to a point in the land of your petitioner on the easterly side of First avenue distant eighty feet, more or less, from the northerly side of Forty-ninth street.

Second—Beginning at a point in the easterly track of your petitioner on its property on the westerly side of First avenue at a point distant twenty feet, more or less, southerly from the point where the southerly side of Fiftieth street, if prolonged, would meet the westerly side of First avenue; running thence across First avenue and across the tracks of your petitioner into the land of your petitioner on the easterly side of First avenue at a point fifty feet, more or less, northerly from the northerly side of Fiftieth street.

The said crossovers are fully and completely shown upon the plans and profiles attached hereto and filed herewith, signed by W. H. Arnold, Chief Engineer, which plans and profiles are deemed to be part of this petition.

Wherefore your petitioner prays that a resolution may be passed by the Board of Estimate and Apportionment permitting the Bush Terminal Railroad Company to construct the additional turnouts as above described.

BOARD OF ESTIMATE AND APPORTIONMENT,
BUREAU OF FRANCHISES, ROOM 79, NO. 280 BROADWAY,
November 19, 1906.

Hon. GEORGE B. MCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—The Bush Terminal Railroad Company has made application to the Board of Estimate and Apportionment by verified petition, acknowledged September 28, 1906, signed by Irving T. Bush, President, for permission to construct and operate two crossover tracks in First avenue, in the Borough of Brooklyn, as an extension of their surface railroad.

The first of these begins at a point in the easterly track of the applicant on its property on the westerly side of First avenue, opposite Forty-ninth street, at the intersection of First avenue and Forty-ninth street, crossing northeasterly across First avenue and across the tracks of the company to a point in the land of the company on the easterly side of First avenue, distant about 80 feet northerly from the northerly line of Forty-ninth street; the second crossover begins at a point in the easterly track of the applicant on its property on the westerly side of First avenue at a point about 20 feet southerly from where the southerly side of Fiftieth street if prolonged would meet the westerly line of First avenue, crossing northeasterly across First avenue and across the tracks of the company to a point in the land of the company on the easterly side of First avenue about 50 feet northerly from the northerly line of Fiftieth street.

The location of these crossovers is shown upon plans accompanying the petition and entitled:

First—"Plan showing location of proposed crossover track to be constructed in First avenue at Forty-ninth street, Borough of Brooklyn, to accompany application of Bush Terminal Railroad Company to the Board of Estimate and Apportionment, City of New York, dated September 28, 1906,"—signed Bush Terminal Railroad Company, by Irving T. Bush, President.

Second—"Plan showing location of proposed crossover track to be constructed in First avenue at Fiftieth street, Borough of Brooklyn, to accompany application of Bush Terminal Railroad Company to the Board of Estimate and Apportionment, City of New York, dated September 28, 1906,"—signed Bush Terminal Railroad Company, by Irving T. Bush, President.

Under the ordinance adopted by the Board of Aldermen January 31, 1905, which became effective February 14, 1905, the Bush Terminal Railroad Company was granted, subject to certain conditions, the franchises, rights and privilege to construct and operate a double track surface railroad, with certain turnouts and crossovers, upon and along certain streets in the Borough of Brooklyn, of which First avenue is a part, together with the necessary connections, switches, sidings and turnouts for the operation of the railroad and accommodation of the cars of the Bush Terminal Railroad Company, or its successors or assigns, which may be run over its tracks, as may be subsequently permitted by the Board of Estimate and Apportionment, or its successors in authority.

At the time of the presentation of the applications dated May 23, 1906, and June 22, 1906, for permission to construct spur tracks in Forty-first street and in First avenue at Fifty-fourth and at Fifty-eighth streets, a report dated July 5, 1906, was made to the Board as to status of the railroad regarding its construction, maintenance and operation, and as to whether the various conditions of the franchise have been complied with. That report will apply to the condition of the road at the present time, with the addition that the street pavement is in good condition as far south as Sixty-third street, the present terminus of the tracks, the paving between the tracks having been relaid.

Copies of the application of September 28, 1906, and of the accompanying plans were forwarded to the President of the Borough of Brooklyn and to the Commissioner of Water Supply, Gas and Electricity with a request that these officials have the project examined by the respective Bureaus in their Departments, with a view to ascertaining if there were any objections to granting the application.

The reports received from the President of the Borough of Brooklyn stated that there were no objections to the construction of the proposed tracks.

The Commissioner of Water Supply, Gas and Electricity stated that he had no objections to granting permission for the tracks, but called attention to a report from the Electrical Engineer of the Borough of Brooklyn, which stated that steam power was being used to move cars on the present crossovers in First avenue, which are similar in character to those it is proposed to construct, this being in violation of section 1 of the ordinance passed by the Board of Aldermen on January 31, 1905, which prohibits the operation of the railroad by steam or horse power.

An investigation made by this Bureau on November 8, 1906, developed the fact that the crossovers leading from the yards on the west side of First avenue, across the street, to the warehouses on the east side had been only partially electrified and that steam switching engines were frequently used to move cars over these tracks.

The attention of the Bush Terminal Railroad Company was called to this fact, and a communication has been received from the vice-president of the company in which he states that a contract was placed some two months ago with parties for the construction and delivery of an additional electric locomotive, but that the company cannot get delivery before May 1, 1907, and that after June 1 there will be no occasion to use steam locomotives, because the supply of electric locomotives will be sufficient to do the work.

He further states that the business of the company has increased very rapidly recently, and in order to handle the freight coming to it the company has been obliged to use the steam locomotives occasionally in shifting cars across First avenue, since they could not obtain the electric locomotive to do the work from the makers.

Under this understanding, I have no objection to offer regarding the construction of the two crossovers for which application is made, and would suggest that favorable action be taken by the Board, provided, however, that when the crossovers are constructed they shall be completely electrified in a thorough manner, and that a penalty of fifty dollars (\$50) be imposed for each and every violation of the condition forbidding the operation of any and all the tracks within the limits of First avenue, by steam power, on and after June 1, 1907, and provided, further, that the Bush Terminal Railroad Company shall within thirty (30) days after the approval of this consent by the Mayor, pay into the treasury of The City of New York the sum of fifty dollars (\$50) to cover the cost of examination and publication of the additional rights granted, and provided also that an agreement be filed by the Bush Terminal Railroad Company with the Board of Estimate and Apportionment stipulating that the granting of this consent shall in no way affect the terms, conditions and provisions of the ordinance as originally passed by the Board of Aldermen, January 31, 1905.

I submit herewith a resolution for your consideration and action.

Respectfully,

HARRY P. NICHOLS, Assistant Engineer.

The following was offered:

Whereas, The City of New York, by ordinance passed by the Board of Aldermen on January 31, 1905, which became effective February 14, 1905, granted to the Bush Terminal Railroad Company the right to construct and operate a double track surface railroad, with connections, turnouts and crossovers, in and upon certain streets in the Borough of Brooklyn, among which was First avenue, all as shown on certain maps filed with the application and entitled:

"Map showing plan of tracks of Bush Terminal Railroad Company in application for franchise from City of New York, July, 1904;" and

Whereas, The said railroad company may, under the terms of the ordinance, construct such necessary connections, turnouts and sidings as may be subsequently permitted by the Board of Estimate and Apportionment, or its successor in authority; and

Whereas, The Bush Terminal Railroad Company has petitioned the Board of Estimate and Apportionment, under a verified application dated September 28, 1906, for consent to construct additional crossovers in First avenue at or near Forty-ninth street and at or near Fiftieth street, as shown on plans accompanying the petition and entitled:

First—"Plan showing location of proposed crossover track to be constructed in First avenue, at Forty-ninth street, Borough of Brooklyn, to accompany application of Bush Terminal Railroad Company to the Board of Estimate and Apportionment, City of New York, dated September 28, 1906,"

—and signed Bush Terminal Railroad Company, by Irving T. Bush, President.

Second—"Plan showing location of proposed crossover track to be constructed in First avenue, at Fiftieth street, Borough of Brooklyn, to accompany application of Bush Terminal Railroad Company to the Board of Estimate and Apportionment, City of New York, dated September 28, 1906,"

—and signed Bush Terminal Railroad Company, by Irving T. Bush, President.

Resolved, That the Board of Estimate and Apportionment of The City of New York hereby consents to the construction and operation of the two crossover tracks in First avenue, as requested in the said application dated September 28, 1906, and shown upon the maps or plans filed therewith, as above described, upon the terms and conditions imposed under the ordinance adopted by the Board of Aldermen on January 31, 1905, as though the said crossover tracks were included in said grant, provided that the said crossover tracks shall be completely equipped with the overhead electrical system at the time of their construction, and provided also, that the said Bush Terminal Railroad Company shall be liable on and after June 1, 1907, to a penalty of fifty dollars (\$50) for each and every violation of the provisions in said ordinance prohibiting the use of steam power within the limits of First avenue, which penalties may be deducted from the deposit made pursuant to section 11 of said ordinance of January 31, 1905, or may be recovered by action by the Corporation Counsel in the name of The City of New York, as in the case of other penalties and for the benefit of the City Treasury; and provided further, that the said Bush Terminal Railroad Company shall duly execute, under its corporate seal, an instrument in writing to the satisfaction of the Board of Estimate and Apportionment and file the same in the office of said Board within thirty (30) days from the approval of this consent by the Mayor, wherein the said company shall promise, covenant and agree that this consent so given shall not in any wise change, alter or amend any of the terms, conditions and requirements in said ordinance adopted by the Board of Aldermen, January 31, 1905, and which became effective February 14, 1905, fixed and contained, which said ordinance shall remain in full force and effect; and provided further, that the said Bush Terminal Railroad Company shall pay into the treasury of The City of New York, within thirty (30) days after the approval of this consent by the Mayor, the sum of fifty dollars (\$50) to cover the cost of the examination and publication of the additional rights granted.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

James S. Maher.

The Secretary presented the following:

NEW YORK, November 14, 1906.

To the Honorable Board of Estimate and Apportionment, No. 277 Broadway, New York City:

GENTLEMEN—I hereby petition your Honorable Board for permission to transfer all my right, title and interest in the three (3) tunnels running under Brook avenue, between Rose and Grove streets, Borough of The Bronx, which I have completed under a permit granted me by your Honorable Board upon May 25, 1906, and signed by the Mayor of New York City upon June 5, 1906, said transfers to be allotted as follows:

Tunnel No. 1, to Swift & Co., and Nelson Morris & Co.

Tunnel No. 2, to Armour & Co.

Tunnel No. 3, to Conron Bros. Company and Schwarzschild and Sulzberger Company.

The accompanying plan will show said tunnels numbered 1, 2 and 3, and the manner in which same are connected with the adjoining property.

This application is made in compliance with paragraph No. 4 of the resolution adopted by your Honorable Board upon May 25, 1906, and the object in assigning them to the said companies is to give them the legal privilege to use these tunnels for transferring beef and other merchandise from the railroad yards into their respective buildings, which are being erected upon the connecting property they have purchased from me, as shown upon the accompanying plan.

It is understood that the above firms as my successors will agree to abide by and perform all the terms, conditions and requirements of the said consent, and will deposit with the Comptroller of The City of New York such bonds, securities, etc., as shall be considered necessary to replace all deposits made by me upon account of said operation.

Yours truly,

JAMES S. MAHER.

BOARD OF ESTIMATE AND APPORTIONMENT,
BUREAU OF FRANCHISES, ROOM 79, NO. 280 BROADWAY,
November 20, 1906.

Hon. GEORGE B. McCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—James S. Maher, formerly owning property on the west side of Brook avenue, north of Rose street, was granted permission by resolution passed by the Board of Estimate and Apportionment May 25, 1906, and approved by the Mayor, June 5, 1906, being known as Approved Resolution No. 14, to construct, maintain and operate or use three tunnels under and across the roadway of Brook avenue, the purpose of the tunnels being to transfer freight from the cars in the freight yard of the New York and Harlem Railroad on the opposite side of the street, to buildings about to be erected on his property.

Under a resolution of the Board, adopted September 14, 1906, approved by the Mayor September 19, 1906, being Approved Resolution No. 33, James S. Maher was allowed to change the location of the tunnels so that the centre line of each tunnel would be 48 feet, 138 feet and 240 feet, respectively, from the northerly corner of Rose street and Brook avenue, and was given an extension of time in which to complete the three tunnels up to and including November 4, 1906.

A further extension of time for the completion of the tunnels was granted by resolution of the Board adopted October 26, 1906, and approved by the Mayor October 29, 1906, being Approved Resolution No. 37, the extension terminating December 4, 1906.

In an application dated November 14, 1906, James S. Maher states that the property on the west side of Brook avenue has been purchased by the following parties: Swift & Co., Nelson Morris & Co., Armour & Co., Conron Brothers Company and Schwarzschild & Sulzberger Company, and that they are having buildings erected upon the property, and requests permission from the Board of Estimate and Apportionment as provided in section 4 of the consent granted by resolution of May 25, 1906, to transfer his right, title and interest in the three tunnels now completed to these parties as follows:

Tunnel No. 1, to Swift & Co., and to Nelson Morris & Co., jointly.

Tunnel No. 2, to Armour & Co.

Tunnel No. 3, to Conron Brothers Company and Schwarzschild & Sulzberger Company, jointly.

The location of the property and the tunnels is shown upon a plan entitled:

"Plan showing location of Brook Avenue Tunnels to be transferred by James S. Maher, in accordance with accompanying application to the Board of Estimate and Apportionment, dated November 14, 1906,"

—signed by James S. Maher.

There would seem to be no objection to offer to the transfer and assignment by James S. Maher, of his right, title and interests in the three tunnels as proposed upon the following terms and conditions:

The compensation to be paid by the assignees should be the same as stipulated in the consent granted to James S. Maher, and should commence on the date at which the title in the property passes to them.

That the assignees shall duly execute and acknowledge an instrument in writing, and file the same with the Board of Estimate and Apportionment, whereby they promise and agree to perform and abide by each and all of the terms and conditions named in or amended by the resolutions of May 25, 1906, September 14, 1906, and October 26, 1906, being Approved Resolutions Nos. 14, 33 and 37, respectively, granting consents to said Maher; that Swift & Co. and Nelson Morris & Co. shall jointly on account of Tunnel No. 1; Armour & Co., on account of Tunnel No. 2, and Conron Brothers Company, and Schwarzschild & Sulzberger Company, jointly, on account of Tunnel No. 3, deposit with the Comptroller the sum of five hundred dollars (\$500) in money or securities to be approved by him, for the faithful performance of all the terms and conditions fixed and contained in the several resolutions aforesaid, and this consent; and that the assignees as named above, and on account of each tunnel as above described, shall pay into the treasury of The City of New York the sum of twenty-five dollars (\$25), to pay the cost of examination and publication of this assignment.

I would also recommend that the deposit of fifteen hundred dollars (\$1,500) made by James S. Maher with the Comptroller, as security for the performance of all the terms and conditions of the consent granted to him, shall be refunded to him when the written agreement is filed and the security deposit is made and the compensation paid by the assignees above mentioned.

Transmitted herewith is a form of resolution covering the above recommendations for consideration and adoption.

Respectfully,

HARRY P. NICHOLS, Assistant Engineer.

The following was offered:

Whereas, James S. Maher has made application, dated May 1, 1906, to the Board of Estimate and Apportionment of The City of New York for permission to construct, maintain and use three separate tunnels under Brook avenue, Borough of The Bronx, and the consent of the Corporation of The City of New York by resolution of the Board of Estimate and Apportionment was given to said James S. Maher, the owner of lands on the westerly side of Brook avenue, north of Rose street, Borough of The Bronx, City of New York, to construct said three tunnels under and across the roadway of said Brook avenue to connect buildings, to be erected on the property, with the railroad yards on the opposite or easterly side of Brook avenue, and which lands and tunnels are shown on a plan entitled

—which application further states that the same is made in compliance with paragraph numbered 4 of the approved resolution numbered 14, and that the object of the assignments of the right of the said James S. Maher in said tunnels, and to use the same, to the said persons, is to give them the legal privilege to use said tunnels for transferring beef and other merchandise from the railroad yards to their respective buildings, and which are being erected upon the connecting property now or formerly of said James S. American Express Company.

In the matter of the application of the American Express Company for permission to construct, maintain and operate a single track railroad spur to connect the premises of the petitioner on the east side of Webster avenue, approximately 400 feet south of the Southern Boulevard, with the existing tracks of the Union Railway Company in front of said premises, in the Borough of The Bronx, which was presented at the meeting of October 12, 1906, and referred to the Bureau of Franchises.

Report and form of resolution was submitted by the Bureau of Franchises.

The Chair stated he was in receipt of a communication from the Corporation Counsel, advising him that there was some litigation pending relative to the right of the Board to grant such privileges, and that without objection the application would be referred back to the Bureau of Franchises, pending the result of such litigation.

There being no objection, this course was pursued.

Interborough Rapid Transit Company.

In the matter of the petition of the Interborough Rapid Transit Company for the right to maintain existing tunnels under West Fifty-eighth street, between Eleventh avenue and the easterly line of Twelfth avenue, also under the bed of Twelfth avenue, between the easterly and westerly lines thereof, at Fifty-eighth street, in the Borough of Manhattan.

The petition was printed in full in the minutes of November 9, 1906.

The Secretary presented the following:

BOARD OF ESTIMATE AND APPORTIONMENT,
BUREAU OF FRANCHISES, ROOM 79, NO. 280 BROADWAY,
November 20, 1906.

Hon. GEORGE B. McCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—On June 8, 1906, the Interborough Rapid Transit Company (hereinafter called the Company) presented an application to the Board of Estimate and Apportionment for the right to maintain existing tunnels under West Fifty-eighth street, between Eleventh and Twelfth avenues, in the Borough of Manhattan, for the conveyance of coal and water from the pier at Fifty-eighth street and the Hudson river to the Company's power house on the block bounded by Eleventh avenue, Fifty-eighth street, Twelfth avenue and Fifty-ninth street.

The Company was immediately informed by this Bureau that the application should also include those portions of the tunnels under Twelfth avenue, from the easterly to the westerly side thereof. After some discussion with the attorneys for the Company, and at their request the Corporation Counsel was asked for an opinion on the matter, and the Hon. William B. Ellison, in a communication dated October 11, 1906, entirely sustained the position taken by this Bureau.

In consequence, the Company has presented an amended petition, dated October 17, 1906, to the Board of Estimate and Apportionment, for the right to maintain the existing tunnels under West Fifty-eighth street, between Eleventh avenue and the westerly line of Twelfth avenue, in the Borough of Manhattan.

This application is accompanied by a plan entitled:

"Map to accompany application of October, 1906, from the Interborough Rapid Transit Company to the Board of Estimate and Apportionment, for the right to maintain and operate condensing water conduits and a coal conveyor or tunnel under Fifty-eighth street and Twelfth avenue"; and signed by Geo. H. Pegram, Chief Engineer, and E. P. Bryan, Vice-President.

As this matter presents some unusual features, a brief recital of the facts leading up to the application seems in order. In October, 1905, I became aware of the existence of conduits and a coal conveyor under Twelfth avenue and West Fifty-eighth street, running from the company's power house on the block bounded by West Fifty-eighth street, Eleventh avenue, West Fifty-ninth street and Twelfth avenue, to the pier at the foot of West Fifty-eighth street, leased to John B. McDonald by the Commissioner of the Department of Docks, under the approval of the Commissioners of the Sinking Fund, granted October 16, 1903.

Search of the records of the various City departments revealed the following facts:

No permit was ever issued for the construction of the said tunnels under the roadway of Twelfth avenue or West Fifty-eighth street;

On December 30, 1901, the Bureau of Highways issued Permit No. 618 to the Rapid Transit Subway Construction Company for vault space 15 by 270, for a coal conveyor under the sidewalk at the northeast corner of Fifty-eighth street and Twelfth avenue.

On May 27, 1902, the Local Board of the Hudson River District passed a resolution asking that the petition of John B. McDonald, verified April 7, 1902, and pre-

sent to the President of the Borough of Manhattan, be granted, and that conduits and a coal conveyor be constructed in accordance with said petition under Twelfth avenue and West Fifty-eighth street, from the pier at Fifty-eighth street and the Hudson river to the company's power house.

On August 22, 1902, a report to the Comptroller pointed out that this matter was not within the province of the Local Board, and that the applicants should apply to the Board of Aldermen for permission to construct the conduits and coal conveyor. This report also recommended certain annual charges for the privilege.

At a meeting of the Commissioners of the Sinking Fund, held September 17, 1902, papers with regard to the leasing to John B. McDonald of the pier at the foot of West Fifty-eighth street, Hudson river, together with certain tunnel and conduit privileges, under the marginal street, were presented, and on October 16, 1903, upon the presentation of further reports on the matter, the Commissioners of the Sinking Fund approved of the execution by the Commissioner of Docks of a lease to John B. McDonald.

In response to repeated letters of inquiry, Comptroller Edward M. Grout was informed by the company, under date of December 28, 1905, that the coal conveyor and conduits were appurtenant to the power house of the Rapid Transit Railroad, constructed under and by authority of the Rapid Transit Act, chapter 4, Laws of 1891, and the acts amendatory thereof and supplemental thereto.

On December 29, 1905, the Comptroller addressed a letter to the President of the Board of Rapid Transit Railroad Commissioners, requesting to be informed if the coal conveyor and conduits were constructed under the authority of the Board, and if so, what clause or clauses of the Rapid Transit Act were claimed to authorize their existence. Receipt of this communication was acknowledged, and at meetings of the Board of Rapid Transit Railroad Commissioners, held on January 11, 1906, and February 8, 1906, reports of the Chief Engineer and counsel were presented as a reply to the above-mentioned letter, and the Secretary was instructed to transmit copies of counsel's reports to the Comptroller. These reports do not show any authorization from the said Board for the construction and maintenance of the tunnels in question.

DISCUSSION OF THE PETITION.

The petition states that it "became necessary to construct and your petitioner did construct and now maintains" the conduits and coal conveyor. This is hardly an exact statement, as it was possible to have handled the coal and ashes by cart or wagon and the water could have been obtained from the City's mains or by artesian wells. The construction of the tunnels was not actually a necessity, but it cannot be denied that the tunnels were an economic necessity, as by their use the company has undoubtedly been able to save a large amount of money.

The petition further states that the said tunnels were built in accordance with plans approved by the Board of Rapid Transit Railroad Commissioners on September 27, 1901. The tunnels, conduit or coal conveyor are not mentioned or referred to in the general plans as printed in the minutes of the said Board of September 27, 1901, and approved on the same date.

In spite of the before mentioned Corporation Counsel's opinion to the contrary, the petition claims that the tunnel and conduit rights under Twelfth avenue or West Fifty-eighth street, west of the easterly line of Twelfth avenue, are held by virtue of the lease of the West Fifty-eighth street pier, made to John B. McDonald.

The opinion of the various City Departments having jurisdiction has been obtained, and as the use of the conduits and coal conveyor by the company since September 1, 1904, has developed no objection, there seems to be no good reason why the requested permission should not be granted.

I would suggest that the privilege be granted for a term not exceeding twenty-five (25) years, but, as has been customary in granting such consents, revocable at the pleasure of the Board of Estimate and Apportionment, or its successors in authority, upon six months' notice in writing, and that the sum of ten thousand dollars (\$10,000), in money or securities to be approved by the Comptroller, be deposited with him for the faithful performance of the terms and conditions of the consent.

On the rental basis usually adopted by the Board in similar franchise cases, viz.: 8 per cent. per annum of the assessed valuation of the area occupied by tunnels used for the movement of goods, etc., and 4 per cent. per annum where the tunnels are used to hold pipes, etc., the first annual charge would be \$2,400. With a 5 per cent. increase for each succeeding term of five years, this gives

For the first five years, \$2,400 per annum;
For the second five years, \$2,520 per annum;
For the third five years, \$2,646 per annum;
For the fourth five years, \$2,778 per annum;
For the fifth five years, \$2,917 per annum.

These payments should be made from the date when the company commenced the construction of the tunnels, which, I am informed, was October 1, 1902.

The portion of the coal conveyor tunnel under the sidewalk of West Fifty-eighth street cannot rightfully be considered a vault, and so it has been included in the above estimate.

On March 22, 1905, the Commissioners of the Sinking Fund granted a refund of \$1,886 to the Rapid Transit Subway Construction Company on account of overpayment for street vault permit at the northeast corner of Fifty-eighth street and Twelfth avenue. Upon acceptance of this consent the company can apply to the same Commission for a further refund of the sum of \$2,164, being the remaining amount paid by the company for the said street vault permit.

I herewith append the usual form of resolution for adoption.

Respectfully,

HARRY P. NICHOLS, Assistant Engineer.

The following was offered:

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to the Interborough Rapid Transit Company, the owner of certain lands in the block bounded by Twelfth avenue, West Fifty-eighth street, Eleventh avenue and West Fifty-ninth street, in the Borough of Manhattan, City of New York, to maintain and operate a tunnel and two conduits under and across the roadway of Twelfth avenue, and under the roadway and sidewalk of West Fifty-eighth street, to connect its power house on the said block with a tunnel and two conduits under the marginal street, and thus to establish connection with the pier at West Fifty-eighth street, all as shown on plan entitled:

"Map to accompany application of October, 1906, from the Interborough Rapid Transit Company to the Board of Estimate and Apportionment, for the right to maintain and operate condensing water conduits and a coal conveyor tunnel under Fifty-eighth street and Twelfth avenue"; and signed by Geo. W. Pegram, Chief Engineer, and E. P. Bryan, Vice-President;

—a copy of which is attached hereto and made a part hereof, upon the following terms and conditions:

1. Said consent shall be for a term not exceeding twenty-five (25) years from October 1, 1902, provided, however, that the consent for the tunnel, or either of the conduits, or all three herein authorized, may be canceled and annulled upon six (6) months' notice in writing to the said Interborough Rapid Transit Company, its successors or assigns, by the Board of Estimate and Apportionment, or its successors in authority, and thereupon all rights of the said grantee, its successors or assigns, for such tunnel or conduits or both, in and upon the aforesaid portions of Twelfth avenue and West Fifty-eighth street, shall cease and determine.

2. The said Interborough Rapid Transit Company, its successors or assigns, shall pay into the treasury of The City of New York, for the tunnel and the two conduits, the following sums of money as compensation:

During the first five years, the annual sum of \$2,400;
During the second five years, the annual sum of \$2,520.
During the third five years, the annual sum of \$2,646.
During the fourth five years, the annual sum of \$2,778.
During the fifth five years, the annual sum of \$2,917.

Such sums shall be paid in advance into the treasury of The City of New York on November 1 of each year, provided, however, that the first payment shall be the amount due from October 1, 1902, to November 1, 1907, which payment shall be made within sixty (60) days after the approval hereof by the Mayor. No part of this compensation shall be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of The City of New York or by any law of the State of New York.

3. Upon the revocation or termination by limitation of this consent, the said grantee, its successors or assigns, shall, at its own cost, cause all of the said tunnel and conduits to be removed, and all that portion of Twelfth avenue and West Fifty-eighth street affected by this permission to be restored to its proper and original condition, if required so to do by The City of New York, or its duly authorized representatives. If the tunnel and conduits to be maintained by the said grantee under this permit shall not be required to be removed, it is agreed that they shall become the property of The City of New York.

4. The consent hereby given shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever, either by acts of said grantee, its successors or assigns, or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment, or its successors in authority.

5. The said grantee shall pay the entire cost of

- (a) The maintenance of said tunnel and conduits;
- (b) The protection of all surface and subsurface structures which have in any way been disturbed by the construction of said tunnel and conduits;
- (c) All changes in sewer or other subsurface structures made necessary by the construction and maintenance of said tunnel and conduits, including the laying or relaying of pipes, conduits, sewers or other structures;
- (d) The replacing or restoring of the pavement in said Twelfth avenue and West Fifty-eighth street, which may be disturbed by the maintenance and operation of said tunnel and conduits;
- (e) Each and every item of the increased cost of any future subsurface structure caused by the presence of said tunnel and conduits, whose existence is permitted under this consent;
- (f) The inspection of all work during the maintenance, operation, repair or removal of said tunnel and conduits, as herein provided, which may be required by the President of the Borough of Manhattan, and the Commissioner of Water Supply, Gas and Electricity.

6. Before any repairs or changes affecting the tunnel structures shall be commenced, the grantee shall obtain permits to do the work from the President of the Borough of Manhattan and from the Commissioner of Water Supply, Gas and Electricity. Said grantee shall perform all the duties which may be imposed by these officials as conditions of said permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to these officials working plans which shall include and show in detail the method of repair of said tunnel and conduits, and the mode of protection or changes in all subsurface structures required by the said repairs.

7. The said tunnel and conduits shall be maintained and operated subject to the supervision, control and inspection of the proper authorities of The City of New York who have jurisdiction in such matters under the Charter of The City of New York.

8. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in or on said Twelfth avenue and West Fifty-eighth street.

9. Said grantee shall be liable for all damages to persons or property, including the street and subsurface structures therein, by reason of the construction, maintenance or operation of said tunnel and conduits, and it is a condition of this consent that The City of New York assumes no liability to either persons or property on account of this consent.

10. This consent is granted on the further and express condition that all laws and ordinances now in force or which may hereafter be adopted, shall be strictly complied with.

11. This consent is granted upon the express condition that the said grantee, within thirty (30) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, shall deposit with the Comptroller of The City of New York the sum of ten thousand dollars (\$10,000), either in money or in securities to be approved by him, which fund shall be security for the performance of all the terms and conditions of this consent, especially those which relate to the payment of the annual charge and the repairs of the street pavement. In case of default in the performance by said grantee of any of such terms or conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days notice in writing, and shall collect the reasonable cost thereof from the said fund without legal proceedings; or in case of default in the annual charges, shall collect the same, with interest, from such fund after ten (10) days notice in writing to said grantee.

In case of any drafts so made upon the security fund, the said grantee shall, within thirty (30) days after the date of written notice, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of ten thousand dollars (\$10,000), and in default of the payment thereof, the consent hereby given may be canceled and annulled at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceedings or rights under the provisions of this section shall affect any other legal rights or causes of action belonging to The City of New York.

12. This consent shall not become operative until said grantee shall duly execute an instrument in writing, wherein said grantee shall promise, covenant and agree on its part to conform to, abide by and perform all the terms, conditions and requirements of this consent fixed and contained, and file the same in the office of the Comptroller of The City of New York within thirty (30) days after the approval by the Mayor.

And the said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, maintenance or operation of the tunnels and conduits herein authorized.

A representative of George W. Wickersham, general counsel of the company, appeared and requested the matter be laid over for two weeks.

The Chair stated that without objection the matter would be referred back to the Bureau of Franchises.

There being no objection, it was so ordered.

Stalling of Trains on Eleventh Avenue, from Forty-seventh to Fifty-third Streets, Borough of Manhattan.

At the meeting of September 28, 1906, a communication was received from the Secretary of the Rapid Transit Committee of the West Side Taxpayers' Association, protesting against the running of long trains and stalling of same on Eleventh avenue, from Forty-seventh to Fifty-third streets, by the New York Central and Hudson River Railroad Company, and the matter was referred to the Bureau of Franchises.

The Secretary presented the following:

BOARD OF ESTIMATE AND APPORTIONMENT,
BUREAU OF FRANCHISES, ROOM 79, NO. 280 BROADWAY,
November 17, 1906.

Hon. GEORGE B. McCLELLAN, Mayor, Chairman of the Board of Estimate and Apportionment:

SIR—At a meeting of the Board of Estimate and Apportionment, held September 28, 1906, a communication was received from H. G. Schneider, Secretary of the Rapid Transit Committee of the West Side Taxpayers' Association, complaining of the operation by the New York Central Railroad Company of its line on Eleventh avenue, and submitting a copy of a petition which he stated had been signed by over six hundred residents of the West Side, calling upon all City officials to compel the railroad company to obey the existing laws, and for the planning of a subway, in order that the tracks might be removed from the surface of the street.

A second communication, dated November 10, 1906, from Mr. Schneider, as Secretary, inclosed a copy of the findings of the Board of Railroad Commissioners of the State, in regard to certain complaints which had been made by the West Side Taxpayers' Association, which findings were made on October 31, 1906, and stated that the railroad company had persistently violated the orders of the said commission.

In regard to these two communications, I would state that chapter 109 of the Laws of 1906, which became a law March 26, 1906, and is commonly known as the "Saxe Bill," provides for the removal of the tracks upon the avenue to a subway, and calls upon the Board of Rapid Transit Railroad Commissioners to prepare plans and to enter into an agreement with the railroad company for the building of such subway and the removal of the tracks of the same, and in case such agreement is not entered into, authorizing the City to acquire the rights of the company on the surface of the streets. That part of the Act which requires preparation of plans has been taken up during the past summer, and on November 15, 1906, a report was presented to the Board of Rapid Transit Railroad Commissioners, by its Chief Engineer, accompanied by general plans for the construction of such subway. The Chief Engineer proposes two alternative routes for the accommodation of the trains now operated over the Eleventh avenue surface tracks. One route follows the present lines south to Canal and West streets, and proceeds then down West street to Franklin; the other route is under either Twelfth or Thirteenth avenue and marginal street to West street, and thence south under West street.

If an agreement should subsequently be entered into between the Rapid Transit Commission and the railroad company, the nuisance complained of would eventually be abated. This, however, cannot be expected to be accomplished in less time than two years, even with the full co-operation of the railroad company.

It appears from the statements made by Mr. Schneider that the State Board of Railroad Commissioners has issued certain orders, which it is alleged have not been obeyed, and it is further alleged that the State Board has neither power nor authority to compel obedience to its orders, but that, as a matter of fact, these so-called orders are simply recommendations. With this phase of the situation I am not familiar. It would seem that the same might be properly submitted to the Corporation Counsel for his opinion thereon.

A question as to how far the City authorities have jurisdiction in this matter would seem to be pertinent at this time, and I submit the following in regard thereto:

The Hudson River Railroad Company received its charter and franchise from the State of New York, pursuant to the provisions of chapter 216 of the Laws of 1846. This franchise, granted by the State, could only be exercised within the limits of the City of New York when the company had received the consent of the local authorities. Such consent or license to operate within the limits of the City of New York was given by ordinance adopted by the Common Council on April 30, 1847, and approved by the Mayor May 6, 1847. This ordinance provided that it should not become effective unless accepted by the company under its corporate seal, which was done under date of August 12, 1847, which acceptance is on file in this Bureau.

Further ordinances have from time to time been adopted affecting the New York Central and Hudson River Railroad Company as the successor of the Hudson River Railroad Company.

The question now arises as to how far the local authorities, as represented by the Board of Estimate and Apportionment, may control the operation of this railroad company in the streets of New York, and whether any resolutions adopted by the Board, affecting the operation of such railroad company, could be enforced, supposing the Board should take such action.

Should the Board desire to take up this matter, I would suggest that it be referred to the Corporation Counsel, in order that any action taken by the Board may be after competent legal advice.

Respectfully,

HARRY P. NICHOLS, Assistant Engineer.

Francis J. Lantry, Fire Commissioner. The Committee was thereupon discharged.

Submission 486.

The Committee on Whitehall Ferry Terminal recommended that the designs submitted (on request of the Mayor) by Hon. John A. Bense, Commissioner of Docks and Ferries, be approved.

John A. Bense, Commissioner of Docks and Ferries. The Committee was thereupon discharged.

Submission 484.

On motion, the following resolution was unanimously adopted:

Certificate 492.

The Committee was thereupon discharged.

The following Committees reported progress:

Committee on Catalogue of Works of Art belonging to the City.

Committee on Redecoration of Governor's Room.

Committee on Quarters and Staff.

The attention of the Commission having been called to the situation of the portraits in the Governor's Room pending alterations in progress and the probable injury thereto unless proper care is to be taken of them, upon motion and after discussion, in which it was made apparent that the Art Commission was not responsible for the matter, the President was unanimously authorized to write to President Ahearn, calling his attention to these conditions and suggesting that steps be immediately taken to protect the paintings from injury.

The President reported that, as a result of the disapproval of designs for drinking fountains which had been deemed inappropriate by the Commission, and the desirability of erecting drinking fountains of suitable design throughout the City, the plan

had been carried out through private generosity of securing suitable designs by a competition under the direction of Professor A. D. F. Hamlin, of Columbia University; and that as the result of this competition a large number of designs had been submitted, one of which had received first prize and others had been commended; and he suggested that the Commission could examine informally several of these designs and in so far as they met approval could informally indicate their readiness to favorably consider any one of them for erection in some suitable location to be approved by the Commission. The effect of such action would in no sense bind the Commission to favorable approval of any design, but would encourage donors of fountains to give them pursuant to one or more of such designs and facilitate the erection in the City of drinking fountains at private cost.

The Commission, pursuant to this suggestion, expressed its willingness to favorably consider those of the designs numbered 10, 13 and 15, when submitted to the Commission in regular form for approval, at a suitable location.

On motion, the meeting adjourned.

MILO R. MALTBY, Assistant Secretary.

PUBLIC NOTICE IS HEREBY GIVEN that at a meeting of the Board of Estimate and Apportionment, held November 9, 1906, the following petition was received:

In the matter of the application of the Long Island Railroad Company, as lessee of the Nassau Electric Railroad Company, and said Nassau Electric Railroad Company, for the construction of an electric railroad on portions of Atlantic avenue, in the Borough of Brooklyn, City of New York.

To the Board of Estimate and Apportionment:

The petition of the undersigned respectfully shows:

First—By chapter 256 of the Laws of 1832, the Brooklyn and Jamaica Railroad Company was organized and empowered to construct a railroad, "with such appendages as may be deemed necessary for the convenient use of the same," between Brooklyn and Jamaica.

In addition to the general powers given by law, the corporation was authorized to prescribe the manner in which the railroad should be used, and by what force the carriages to be used thereon may be propelled.

Second—That thereafter it constructed a steam surface railroad upon a right of way which it acquired by purchase or condemnation proceedings, portions of which line were included within the limits of what is now Atlantic avenue.

Third—By chapter 178 of the Laws of 1834 the Long Island Railroad Company was organized and empowered to construct a railroad from Greenport to a point on the waters adjacent to Brooklyn, "with such appendages as may be deemed necessary for the convenient use of the same," with power to prescribe the manner in which its road shall be used, and by what force the carriages to be used thereon may be propelled.

Fourth—By chapter 94 of the Laws of 1836 the Brooklyn and Jamaica Railroad Company was authorized to lease its railroad from Brooklyn to Jamaica to the Long Island Railroad Company, and it was provided that the use of the said Brooklyn and Jamaica Railroad, under such lease, should be taken as a performance of the obligations on the part of the Long Island Railroad Company to construct its road from Greenport to Brooklyn.

Fifth—This lease was made of all the corporate rights and franchises of the said Brooklyn and Jamaica Railroad Company, and has been extended from time to time, and now has seventy (70) years to run. The Long Island Railroad Company under it and under its own charter has been for many years operating a double-track steam railroad over the right of way formerly of the Brooklyn and Jamaica Railroad Company, situated in the centre of what is now Atlantic avenue, from the junction of Atlantic and Flatbush avenues, in the Borough of Brooklyn to Jamaica and points eastward thereof.

Sixth—The Brooklyn and Jamaica Railroad Company was foreclosed and its property conveyed to the Atlantic Avenue Railroad Company or Brooklyn, and said Atlantic Avenue Railroad Company of Brooklyn was, on or about January 26, 1899, merged with the Nassau Electric Railroad Company, and the Nassau Electric Railroad Company is now possessed of all its property and franchises.

Seventh—By chapter 499 of the Laws of 1897, for the improvement of Atlantic avenue and for the removal of the steam railroad of the Long Island Railroad Company from the surface, it was provided that the railroad of the Atlantic Avenue Railroad Company of Brooklyn, "now leased and operated by the Long Island Railroad Company," between Flatbush avenue and Atkins avenue, should be changed by said companies "by depressing the same from Flatbush avenue to near the easterly side of Bedford avenue, so as to leave the surface free from the steam railroad tracks, fences and gates of the steam railroad of the Long Island Railroad Company then existing thereon."

From this point the right of way of the railroad should be operated in an open cut, to a point between Bedford and Nostrand avenues. From there running east the tracks should be raised and run on an elevated structure to the easterly side of Ralph avenue. From Ralph avenue the tracks were to descend to the grade of Atlantic avenue, at a point between Ralph and Howard avenues. From there they were to be operated in an open cut to the west side of Cooper place. From there they were to be placed below the surface of the street to a point near the easterly side of Jardine place, where it should coincide with the grade of Atlantic avenue. From there eastward it should be operated on a surface grade to near the easterly side of Snediker avenue. At this point the tracks were to be elevated, passing over Williams avenue at a height of eight feet, and over Alabama avenue at a height of twelve feet, and from the easterly side of Alabama avenue the tracks should be operated over an elevated structure to a point near Linwood avenue. From there they should descend to the grade of Atlantic avenue, near Atkins avenue, and from that point eastward should be operated on the existing grade.

Eighth—Said act also provided that when completed the Long Island Railroad Company, as lessee of the Atlantic Avenue Railroad Company of Brooklyn, was authorized and directed to run its trains "over such improvement and the road of such railroad as constructed and authorized by law," and no cars of other companies, without permission of the said Long Island Railroad Company, shall be run thereon or thereunder.

Ninth—By chapter 497 of the Laws of 1899 it is provided that whenever any right of way, grade or tracks of any steam railroad in any street, in any city of the first class, are required by

law to be changed or altered by elevating or depressing the same for the purpose of discontinuing the use of steam power upon the surface of said highway or street, such alteration or change of grade shall not be deemed to curtail or affect any right which such company, or its lessees or assigns, may have to maintain and operate a surface passenger railroad within the limits of the right of way so depressed or elevated, and over or under the railroad tracks so depressed or elevated, with all turnouts, sidings or tracks necessary to secure the continuous connection of portions of such surface railroad. In the event that any such turnouts, sidings or tracks shall extend beyond the lines of the right of way of such railroad corporation whose tracks have been so depressed or elevated in or upon any of the streets or highways aforesaid, such turnouts, sidings or tracks so extending beyond the lines of such right of way shall only be constructed upon condition that the consent of the owners of one-half in value of the property bounded, and the consent also of the local authorities having the control of that portion of such street or highway upon which it is proposed to construct such turnout, siding or tracks, shall be first obtained. No such railroad shall be operated by steam locomotives, and shall not be used except for passenger traffic.

Tenth—That the change of grade provided in and by the aforesaid acts for the improvement of Atlantic avenue has been duly made, such portions of the aforesaid track required by said act to be depressed below the surface of the street have been so depressed, and such portions as were required to be elevated have been elevated, that the connections between the same have been constructed, and the trains of the Long Island Railroad Company are now being operated thereon by electricity.

Eleventh—That the tracks for an electrical railroad have been laid upon the aforesaid right of way of the said railroad, over or under the said improvement, with the exception of the following portions thereof, viz:

1. From the westerly side of Bedford avenue to a point midway between Nostrand avenue and New York avenue.

2. From a point opposite Columbus place to a point near Louis place.

3. From a point opposite Olive place to a point nearly opposite Alabama avenue, with the exception of the portion of the south side of Atlantic avenue, between Snediker and Georgia avenues, occupied by the tracks of the Brooklyn and Rockaway Beach Railroad Company, over which the Long Island Railroad Company has the right to operate.

At these points, where either the cuts are located (being the portions of said right of way by which the trains from the depressed subway reach the surface), or the inclined portion of the elevated structure extends from the grade of the avenue to a place where there is sufficient headroom for the cars to pass thereunder. At these points the existence of these obstacles make it impossible to operate a continuous railroad upon the surface of said right of way.

Twelfth—That in order to secure a continuous connection and operation of said surface railroad, it is necessary that a turnout or siding, consisting of a single track on each side of said right of way, should be constructed in the various portions of Atlantic avenue lying between the points aforesaid, and also that the same should be connected with the tracks of the street surface railroads intersecting the same. That such sidings and connections have been duly located, and that the portions of the streets proposed to be occupied thereby are, and the general line of the improvement is designated on the blue print hereto annexed, marked "A." Drawing No. R-4. Maps showing each one of such sidings in detail are also hereto annexed, marked "B," "C," "D," "E" and "F" show the location of the poles carrying the electric wires.

Thirteenth—That your petitioners are advised and believe that under the statutes aforesaid, and under the provisions of law relative to the subject, your petitioners are authorized to construct said turnouts and sidings and to operate an electric railroad over the same in connection with the line constructed upon the surface of the aforesaid right of way as aforesaid, upon obtaining the consent of the local authorities of The City of New York, and the consent of the majority of the owners of the property abutting on said sidings, or, in lieu of the latter, the consent of the Appellate Division of the Supreme Court.

Fourteenth—That your petitioners have used diligent efforts to obtain the consent of the majority of said abutting owners, but have been unable so to do, and are now about to apply to the Appellate Division for its consent in lieu thereof.

Fifteenth—That the portions of Atlantic avenue over which the petitioners desire to obtain the consent of the City to operate is only a very small portion of the entire route of the proposed railroad, the remainder being upon the property of your petitioners.

That this proposed railroad will be a trolley railroad of the most modern character, and its construction and operation will be a great public convenience, and will, as your petitioners are informed and believe, largely enhance the value of the property abutting on Atlantic avenue, and of that in the vicinity. That your petitioners believe that a rental of one hundred dollars (\$100) a year for a franchise to operate each of four turnouts, or the aggregate annual rent of four hundred dollars (\$400) (which represents a capitalization of four per centum of \$10,000), would be a reasonable rent to pay for such privileges, and your petitioners hereby offer to pay the same to the City for its consent to such construction.

Wherefore, your petitioners respectfully pray that the Board of Estimate and Apportionment will grant to the Nassau Electric Railroad Company and the Long Island Railroad Company, as lessee of the Nassau Electric Railroad Company, the consent of The City of New York for the construction of a double track electrical railroad to be laid on the surface of Atlantic avenue in the Borough of Brooklyn, City of New York, one track thereof to be laid on each side of said avenue in the portions thereof adjoining the places where the right of way of the Long Island Railroad Company above mentioned is obstructed by the elevated and depressed tracks, to wit:

1. Leaving the said right of way at a point forty (40) feet westerly from the westerly side of Bedford avenue, and thence running with a single track on each side of the line of the said right of way and the inner rail of said tracks to be about four (4) feet distant therefrom, to a point about one hundred and fifty (150) feet easterly from the easterly line of Nostrand avenue, and thence curving inward, intersecting the said right of way and connecting with the tracks thereon.

2. Leaving the said right of way at a point about opposite the easterly line (if extended) of Columbus place, and running with a single track on each side of the line of the said right of way and the inner rail of said tracks to be about four (4) feet distant therefrom, to a point about opposite to the easterly side of Cooper place (if extended), and thence curving inward, intersecting the said right of way, and connecting with the tracks thereon.

3. Leaving the said right of way at a point approximately at the centre of Stone avenue, or

Eastern Parkway Extension, and running with a single track on each side of the line of the said right of way, to a point about opposite the easterly curb line of Alabama avenue (excepting the portion of the southern side of Atlantic avenue between Snediker and Alabama avenues, occupied by the existing tracks of the Brooklyn and Rockaway Beach Railroad Company, over which the Long Island Railroad Company has the right to operate); thence curving inward into the said right of way and connecting with the tracks laid thereon.

4. Together with the right to erect and maintain the necessary poles, wires and appurtenances, the poles supporting the wires by which said cars are to be operated to be placed as far as practicable within the limits of the right of way aforesaid.

NOTICE TO CONTRACTORS.

GENERAL INSTRUCTIONS TO BIDDERS.

The person or persons making a bid or estimate for any services, work, materials or supplies for The City of New York, or for any of its departments, bureaus or offices, shall furnish the same in a sealed envelope, indorsed with the title of the supplies, materials, work or services for which the bid or estimate is made, with his or their name or names and the date of presentation to the President or Board or to the head of the Department at his or its office, on or before the date and hour named in the advertisement for the same, at which time and place the estimates received will be publicly opened by the President or Board or head of said Department and read, and the award of the contract made according to law as soon thereafter as practicable.

Each bid or estimate shall contain the name and place of residence of the person making the same, and names of all persons interested with him therein, and, if no other person be so interested, it shall distinctly state that fact; also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud, and that no member of the Board of Aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of The City of New York is, shall be or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated herein are in all respects true.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in The City of New York, or of a guaranty or surety company duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

No bid or estimate will be considered unless, as a condition precedent to the reception or consideration of any proposal, it be accompanied by a certified check upon one of the State or National banks of The City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the bond required, as provided in section 420 of the Greater New York Charter.

The certified check or money should not be inclosed in the envelope containing the bid or estimate, but should be either inclosed in a separate envelope addressed to the head of the Department, President or Board, or submitted personally upon the presentation of the bid or estimate.

For particulars as to the quantity and quality of the supplies, or the nature and extent of the work, reference must be made to the specifications, schedules, plans, etc., on file in the said office of the President, Board or Department.

No bid shall be accepted from or contract awarded to any person who is in arrears to The City of New York upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the City.

The contract must be bid for separately. The right is reserved in each case to reject all bids or estimates if it is deemed to be for the interest of the City so to do.

Bidders will write out the amount of their bids or estimates in addition to inserting the same in figures.

Bidders are requested to make their bids or estimates upon the blank forms prepared and furnished by the City, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Department for which the work is to be done. Plans and drawings of construction work may also be seen there.
