#### FIRE DEPARTMENT.

HEADQUARTERS FIRE DEPARTMENT, NOS. 157 AND 159 EAST SIXTY-SEVENTH STREET, NEW YORK, April 16, 1897.

#### TO CONTRACTORS.

SEALED PROPOSALS FOR FURNISHING THE materials and labor and doing the work required in building, completing and delivering a fire-boat for this Department, will be received by the Board of Commissioners at the head of the Fire Department, at the office of said Department Nos. 157 and 159 East Sixty-seventh street, until 10.30 o'clock A. M., on Friday, April 30, 1897, at which time and place they will be publicly opened by the head of said Department and read.

For information as to the amount and kind of work to be done, bidders are referred to the drawings and specifications prepared by H. de B. Parsons, Supervising Engineer, said specifications and drawings forming part of these proposals.

Copies of the forms of agreement, showing the manner of payment for the work, and copies of the specifications and forms of proposal, may be obtained and the drawings may be seen at the office of the Department, as above, or at the office of the Supervising Engineer, No. 22 William street.

No estimate will be received or considered after the hour named.

Proposals must be made for all the work contained in the specifications.

Bidders will write out the amount of their estimate in addition to inserting the same in figures.

The fire-boat is to be completed and delivered within the one hundred and eighty-fifth (185th) day after the execution of the contract.

The damages to be paid by the contractor for each day that the contract may be unfulfilled after the time specified for the completion thereof shall have expired are fixed and liquidated at twenty-five (25) dollars.

The award of the contract will be made as soon as practicable after the opening of the bids.

Any person making an estimate for the work shall present the same in a sealed envelope to said Board at said office, on or before the day and hour above named, which envelope shall be indorsed with the name or names of the person or persons presenting the same, the date of its presentation, and a statement of the work to which it relates.

The Fire Department reserves the right to decline any and all bids or estimates if deemed to be for the public interest. No bid or estimate will be accepted from, or contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same; the names of all persons interested with him or them therein; and if no other person be so interested it shall distinctly state that fact; that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair and without collusion or fraud; and that no member of the Common Council, head of a department, chief of a bureau, deputy thereof or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate, that the several matters stated therein are in all respects true. Where more than one person is interested it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders of the City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will on its being so awarded, become bound as sureties for its faithful performance in the sum of Twenty-four Thousand (\$24,000) Dollars, and that if he shall omit or refuse to execute the same, they will pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same, that he is a householder or freeholder in the City of New York, and is worth the amount of the security required for the completion of this contract, over and above his liabilities as bail, surety or otherwise; and that he has offered himself as a surety in good faith and with the intention to execute the bond required by law. The adequacy and sufficiency of the security offered is to be approved by the Comptroller of the City of New York before the award is made and prior to the signing of the contract.

No estimate will be considered unless accompanied by either a certified check upon one of the banks of the City of New York, drawn to the order of the Comptroller, or money to the amount of Three Hundred and Fifty (350) Dollars. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate-book, and no estimate can be deposited in said book until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited to and retained by the City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid, the amount of his deposit will be returned to him.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept the contract within five days after written notice that the same has been awarded to his or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as having abandoned it and as in default to the Corporation, and the contract will be readvertised and relet as provided by law.

JAMES R. SHEFFIELD, O. H. LA GRANGE, and THOMAS STURGIS, Commissioners.

1st. Bidders must satisfy themselves by personal examination of the location of the proposed work, and by such other means as they may prefer, as to the accuracy of the foregoing estimate, and shall not at any time after the submission of an estimate dispute or complain of the above statement of quantities, nor assert that there was any misunderstanding in regard to the nature or amount of the work to be done.

2d. Bidders will be required to complete the entire work to the satisfaction of the Commissioner of Street Cleaning, and in substantial accordance with the specifications of the contract and the plans therein referred to. No extra compensation beyond the amount payable for the work before mentioned, which shall be actually performed, at the prices therefor, to be specified by the lowest bidder, shall be due or payable for the entire work.

The work to be done under the contract is to be commenced within five days after the date of execution of the contract, and all the work to be done under the contract is to be fully completed within three calendar months from the date of said execution of this contract, or within such further time as may be allowed by the Commissioner of Street Cleaning for such performance and completion, and the damages to be paid by the contractor for each day that the contract may be unfulfilled after the time fixed for the fulfillment thereof has expired, are, by a clause in the contract, determined, fixed and liquidated at Fifty Dollars per day.

Bidders will state in their estimates a price for the whole of the work to be done in conformity with the approved form of agreement and the specifications therein set forth, by which price the bids will be tested. This price is to cover all expenses of every kind involved in or incidental to the fulfillment of the contract, including any claim that may arise through delay, from any cause, in the performing of the work thereunder. The award of the contract, if awarded, will be made to the bidder who is the lowest for doing the whole of the work, and whose estimate is regular in all respects.

Bidders will distinctly write out, both in words and in figures, the amount of their estimates for doing each class of the work.

The person or persons to whom the contract may be awarded will be required to attend at this office, with the sureties offered by him or them, and execute the contract within five days from the date of the service of a notice to that effect; and in case of failure or neglect so to do, he or they will be considered as having abandoned it, and as in default to the Corporation; and the contract will be re-awarded and relet and so on until it be accepted and executed.

Bidders are required to state in their estimates their names and places of residence; the names of all persons interested with them therein, and if no other person be so interested, the estimate shall distinctly state the fact; also that the estimate is made without any connection with any other person or persons making an estimate for the same purpose, and is in all respects fair and without collusion or fraud; and also that no member of the Common Council, head of a department, chief of a bureau, deputy thereof or clerk therein, or any other officer or employee of the Corporation or of the City of New York, or any of its departments, is directly or indirectly interested in the estimate, or in the supplies or work to which it relates, or in any portion of the profits thereof; which estimate must be verified by the oath, in writing, of the party making the estimate, that the several matters stated therein are in all respects true. *Where more than one person is interested, it is requisite that the verification be made and subscribed to by all the parties interested.*

In case a bid shall be submitted by or in behalf of any corporation, it must be signed in the name of such corporation by some duly authorized officer or agent thereof, who shall also subscribe his own name and office. If practicable, the seal of the corporation should also be affixed.

Each estimate shall be accompanied by the consent, in writing, of two householders or freeholders in the City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person or persons making the estimate, they will, upon its being so awarded, become bound in the sum of five thousand five hundred (\$5,500) dollars as his or their sureties for its faithful performance; and that if said person or persons shall omit or refuse to execute the contract, they will pay to the Corporation of the City of New York any difference between the sum to which said person or persons would be entitled upon its completion and that which said Corporation may be obliged to pay to the person to whom the contract may be awarded at any subsequent letting, the amount in each case to be calculated upon the estimated amount of the work to be done by which the bids are tested. The consent above-mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same, that he is a householder or freeholder in the City of New York, and is worth the amount of the security required for the completion of the contract, over and above all his debts of every nature, and over and above his liabilities as bail, surety and otherwise, and that he has offered himself as surety in good faith and with the intention to execute the bond required by law. The adequacy and sufficiency of the security offered will be subject to approval by the Comptroller of the City of New York after the award is made and prior to the signing of the contract.

No estimate will be received or considered unless accompanied by either a certified check upon one of the State or National banks of the City of New York, drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate-box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited to and retained by the City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid the amount of the deposit will be returned to him.

Bidders are informed that no deviation from the specifications will be allowed, unless under the written instructions of the Commissioner of Street Cleaning.

No estimate will be accepted from, or contract awarded to, any person who is in arrears to the Corporation, upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

In case there are two or more bids at the same price, which price is the lowest price bid, the contract, if awarded, will be awarded by lot to one of the lowest bidders.

**THE RIGHT TO DECLINE ALL THE ESTIMATES IS RESERVED IF DEEMED FOR THE INTEREST OF THE CORPORATION OF THE CITY OF NEW YORK.**

Bidders are requested, in making their bids or estimates, to use the blank prepared for that purpose by the Department, a copy of which, together with the form of the agreement, including specifications, and showing the manner of payment for the work, can be obtained upon application therefor at the office of the Department.

CHARLES H. T. COLLIS, Commissioner of Public Works.

**PERMIT ISSUED BY THE DEPARTMENT OF PUBLIC WORKS OF THE CITY OF NEW YORK TO THE EIGHTH AVENUE RAILROAD COMPANY AND THE METROPOLITAN STREET RAILWAY COMPANY, AS ITS LESSEE, TO OPEN CERTAIN STREETS, FOR CHANGE OF MOTIVE POWER.**

DEPARTMENT OF PUBLIC WORKS, COMMISSIONER'S OFFICE, NEW YORK, April 6, 1897.

**PERMISSION IS HEREBY GIVEN TO THE** Eighth Avenue Railroad Company and the Metropolitan Street Railway Company, as its lessee, to take up the pavements and excavate such portions of the streets, avenues and highways along the line of railroad of the Eighth Avenue Railroad Company as now constructed and operated in the City of New York, that is to say, Macomb's Dam road, between Harlem river and One Hundred and Forty-ninth street, Eighth avenue, between Harlem river and Hudson street, and Hudson street, between Eighth avenue and Canal street, and Canal street, between Hudson street and Broadway, and West Broadway, between Canal street and Vesey street, and Vesey street, between West Broadway and Church street, as may be necessary for the purpose of converting said line of railroad from horse railroad to an electric railroad, operated by an underground current of electricity; under and pursuant to the authority given by the Board of Railroad Commissioners of the State of New York, by its order or consent, dated 19th March, 1897, after due hearing had; and it appearing that the owners of more than one-half in value of the property bounded on said line of railroad, with respect to which said change of motive power from horses to an underground current of electricity is desired to be made as aforesaid, have consented thereto.

This permit is granted and accepted subject to construction of said electric railroad, in accordance with the plans thereof, filed by said Eighth Avenue Railroad Company and the Metropolitan Street Railway Company, upon their application for this permit, with the Department of Public Works, and such modifications of said plans as have been or may be required by the Commissioner of Public Works, and also subject to the following terms, conditions and provisions, besides such further special conditions and restrictions as may be hereafter from time to time imposed by the Commissioner of Public Works, in the public interests.

1. The construction and operation of the said railroad shall be subject to the terms of the charters of said companies, and to the laws of the State of New York and ordinances of the City of New York heretofore or hereafter enacted or adopted.

2. The said companies shall obey and fulfill all the terms and conditions imposed by the ordinances of the Board of Aldermen, granting permission to lay tracks and carry traffic over said streets, avenues or highways, and any violation of the same shall work a revocation of this permit, which the Commissioner of Public Works may enforce on forty-eight hours' notice.

3. The construction of said railroad shall be so prosecuted as to cause as little inconvenience to public travel as practicable. Approaches and crossings on the line of the work shall be constructed in such a manner and of such material, and at such places as may be required to relieve and facilitate public travel and business along and across the line. All surplus materials, earth, sand, rubbish and stones, shall be removed from the line of the work, block by block, as rapidly as the work progresses. Any piles or surfaces of earth shall be kept sufficiently sprinkled with water to lay and prevent inconvenience from dust, when required by the Water Purveyor. All the old blocks of paving stones shall be delivered by said companies at corporation yards of the Department of Public Works, as designated therefor by the Water Purveyor.

4. The electric system for the said railroad shall be so established and maintained as to prevent as far as possible, and by the best means available, from time to time, the transmission or return of the electric current from the conductors intended therefor to and through water-pipes, gas-pipes, and other underground pipe systems; and the said companies shall be responsible to the owners of said pipes for all damage to said pipes from electrolysis caused by said electric system, and will repair the same or pay the cost thereof upon demand.

Any dynamo used as a generator of electricity shall be of such pattern and construction as to be capable of producing a continuous current without appreciable pulsation.

5. The conduit for the conductors of electricity shall be so constructed as to admit of easy examination of and access to the conductors contained therein, and their insulators and supports; and also, with all sumps for drainage, shall be so constructed as to be readily cleared of accumulation of dust or other debris; and no such accumulation shall be permitted to remain therein; and also shall be laid to such grades and so connected to sewers as to be automatically cleared of water without danger of the water reaching the level of the conductors; and each such connection with the sewers of the said conduit and of sumps for drainage shall be properly trapped so as to be made air tight; and there shall be paid by said companies to the Department of Public Works for each such connection an amount equal to the usual charge for house connections.

6. Tests and investigation shall be made daily during the operation of said electric railroad to ascertain as to any leakage of current before or after the hours of running, when the line is fully charged; and if, at any time, it shall be found that the leakage current exceeds half an ampere per mile of railroad, such leak shall be localized and removed as soon as practicable, and the use of the electric current for the running of the cars shall be stopped, unless such leak is localized and removed within twenty-four hours.

7. The tracks, switches and turnouts shall be laid with grooved rails on the lines and grades approved by the Commissioner of Public Works, and all rails, switches, frogs, conduits, special work and all details as to construction of said electric system, shall be of a pattern to be submitted to and approved by the Commissioner of Public Works before being laid or constructed.

The said companies shall submit detailed drawings of all switches, frogs, crossovers, turnouts, conduits and special work to the Commissioner of Public Works for acceptance, and no detail of this work shall project more than three-eighths of an inch above the tread of the rail.

8. The work of construction of said railroad shall be done so as not to interfere with the water-mains or service connections, nor with the sewers or house connections, nor with connections in said streets, avenues or highways hereafter to be made with the water-mains or sewers; and whenever required the said companies shall furnish the labor and materials at their own expense and reconstruct and readjust the sewers, lay and relay water-pipes and gas-pipes, in accordance with the requirements and under the supervision of the Commissioner of Public Works.

All water mains that are laid under and along the line of the conduits and tracks of said electric railroad shall be relaid by the said companies at least eighteen inches outside of the outer rails of said railroad. No sump for drainage shall be built over any line of water or gas-mains crossing said conduits and tracks. Wherever water mains or sewers or connections therewith are encountered, the work at such points shall be stopped until proper plans and specifications are prepared and submitted to and approved by the Commissioner of Public Works for necessary changes in the same, before entering on the work; and any changes required in said pipes and connections shall be made in all respects in accordance with the specifications of the Department of Public Works.

9. Whenever, in the judgment of the Commissioner of Public Works, the safety, health or convenience of the public shall require the construction of manholes outside of the line of conduits and tracks of said electric railroad, to give access to and connecting with sewers under or between the conduits and tracks of said electric railroad, such manholes shall be constructed of brick, in a good, substantial and workmanlike manner, and the labor and materials therefor shall be furnished by and at the cost and expense of said companies, at such points and at as many points as may be required by and under the direction of the Commissioner of Public Works, and in all respects in accordance with the plans and specifications thereof of the Department of Public Works.

10. All the frames and heads for sewer manholes and for Croton water stop-cocks, on the line of the work, shall be reset or new ones furnished and set if required, on a level with the new pavement, by the said companies, and only noiseless manhole covers and plates shall be used over any openings to sewers and to the electric conduits, and to sumps for drainage, and to water stop-cocks.

11. The said companies shall furnish at their own cost and expense all the necessary materials and the labor, and in a good, firm and substantial manner, and strictly in accordance with the specifications of the Department of Public Works, regulate and pave with new granite-block pavement, with concrete foundation of a depth of 6 inches, that portion of said streets, avenues and highways along the line of said railroad, between its tracks, the rails of its tracks, and 2 feet in width outside of its tracks, where stone pavement is now laid; and such pavement shall be toothed or racked from six to eighteen inches outside of the outer rails, in accordance with plans therefor to be prepared and submitted to and approved by the Commissioner of Public Works, before being laid.

The stone blocks shall be of a durable, sound and uniform quality of granite, to be approved by the Commissioner of Public Works, each measuring not less than six nor more than twelve inches in length, and not less than three and one-half nor more than four inches in width, and eight inches in depth; excepting that one-half the number of such blocks as are set between the slot rail and the bearing rails shall be one-half the maximum length above mentioned, and shall be laid alternately with full-sized blocks alongside the slot and bearing rails respectively. The blocks shall be of uniform size, and in accordance with a plan therefor to be filed with the Department of Public Works, and shall be split and dressed at the quarry so as to form when laid, close joints top and bottom, not over one-half inch wide, with fair and true surfaces on top, bottom and ends, and shall be in all respects equal to the specimen blocks at the office of the Commissioner of Public Works.

12. The said companies shall furnish, at their own cost and expense, all the necessary materials and the labor, and in a good, firm and substantial manner, and strictly in accordance with the specifications of the Department of Public Works, regulate and pave with asphalt pavement, on concrete foundation, that portion of said streets, avenues and highways along the line of said railroad, between its tracks, the rails of its tracks, and two feet in width outside of its tracks, where asphalt pavement is now laid.

13. The said companies shall lay and relay crosswalks where now laid, and where required by the Commissioner of Public Works to be laid for street crossings, and shall permanently maintain the said granite and asphalt pavement and crosswalks as above required, in good condition, to the satisfaction of the Commissioner of Public Works, his successors or successors; all the said work to be done in the manner and under the conditions specified in the specifications of the Department of Public Works.

14. In laying and maintaining the pavement the said companies shall furnish and provide, at their own cost and expense, new material therefor, and shall at all times maintain the same in such repair that the pavement will not be depressed or raised more than one-quarter of an inch above or below the tracks where it joins the tracks; nor shall any stone in the pavement be raised or depressed more than one-quarter of an inch above the neighboring stone; and that after a lapse of forty-eight

hours from any notice served on any of their agents or employees in this city, the said Commissioner shall make such repairs as he finds necessary, and the said companies shall pay to the Department of Public Works all costs incurred for labor and material in making such repairs. And if there should be any rut, lump or sunken place in the adjacent pavement, the pavement shall be relaid over such places to whatever distance from the rail of said companies that it may be necessary, so as to avoid any abrupt slopes, ridges or uneven pavement.

15. The Commissioner of Public Works shall designate City Surveyors or Civil Engineers who shall attend the giving of lines and grades, and Electrical Engineers who shall supervise the electrical work, for the construction of said railroad, whose compensation shall be paid by said companies, but will be determined and regulated by the Commissioner of Public Works, from whom alone their instructions will be received.

All the work from the time the excavation is commenced to the time the pavement is laid shall also be under the supervision of Inspectors, who shall be appointed by and receive their instructions from the Commissioner of Public Works, and whose salaries shall be paid by said companies.

16. If any contractor, foreman or mechanic, or laborer is insolent or negligent in carrying out any instructions given by any properly authorized representative of the Department of Public Works he shall be forthwith discharged and not re-employed on the work without the consent of the Commissioner of Public Works.

A notice or order given to any contractor or foreman in charge of any work shall be considered a notice to the said companies.

17. Wherever, in consequence of the weather or any process of law or other unexpected obstacle, the work of constructing said railroad shall be stopped for so long a time that the public travel shall be obstructed, the street or avenue shall be refilled and repaved as if the work contemplated in this permit was actually completed.

18. The said companies shall place sufficient and proper guards for the prevention of accidents, and shall put up and keep at night suitable and sufficient lights, and they shall indemnify and save harmless the City of New York, its officers, agents and servants against and from all damages, costs and expenses which they may suffer, or to which they may be put by reason of injury to the person or property of another, resulting from carelessness or negligence on the part of said companies. The work shall be carried on only in such places and for such distances as the Commissioner of Public Works or his representative shall from time to time designate, by separate permit; but the said companies shall prosecute the work with all necessary force of labor, at such times and places as the said Commissioner may from time to time require.

19. The said companies shall give forty-eight hours' notice to the Water Purveyor of their desire to commence work at any point, and shall not disturb the pavement, commence work or deposit material anywhere until the Inspectors are on the ground to give the necessary instructions, and shall apply twenty-four hours in advance to the General Inspector for separate permits for each section to be opened.

The said companies shall give the Health Department twenty-four hours' notice of the time and place of making excavation, under each sectional permit issued from the Department of Public Works, and the said companies shall provide and use such disinfectants as and when required by the Health Department.

20. The companies shall immediately upon any fall of snow, at any time hereafter, remove and carry away the snow from its tracks, and not throw it on either side of the tracks.

21. If the said companies, their contractors or agents shall refuse or neglect to carry out any of the provisions or requirements of this permit, the Commissioner of Public Works shall have the right and power to do the same at the cost and expense of said companies, which they agree to pay upon demand.

The Commissioner of Public Works reserves the right to revoke this permit in case of any violation of its terms and conditions.

It is made a condition of the issuance of this permit that its acceptance, in all its terms, conditions and provisions, is attested hereunder by the President and Secretary of the Eighth Avenue Railroad Company and the Metropolitan Street Railway Company, respectively, and certificates of such acceptance and agreement thereto, in all its terms, conditions and provisions, by resolution of the Boards of Directors of said companies, respectively, shall be filed with the Commissioner of Public Works; and that thereupon this permit shall take effect.

No. 2. FOR PLACING STONE FILLING AND CONCRETE IN THE BOTTOM OF A PORTION OF "THE POOL" NEAR ONE HUNDRED AND SECOND STREET AND EIGHTH AVENUE, IN THE CENTRAL PARK.

The works must be bid for separately and the bids will be tested upon estimates of the work to be done as follows:

No. 1. ABOVE MENTIONED. Bidders are required to state in writing, and also in figures, in their proposals, one price or sum for which they will execute the entire work.

The time allowed for the completion of the whole work will be one hundred and fifty consecutive working days.

The penalty for overtime is fixed at Twenty Dollars per day. The amount of security required is Five Thousand Dollars.

No. 2. ABOVE MENTIONED. 1,000 cubic yards of stone filling in place. 425 cubic yards of concrete in place.

The work to be commenced within ten days after the execution of the contract, and to be fully completed on or before the first day of June, eighteen hundred and ninety-seven, and the damages to be paid by the Contractor for each day that the contract, or any part thereof, may be unfulfilled after the time fixed for the completion thereof has expired, are fixed at Ten Dollars per day.

The amount of security required is Sixteen Hundred Dollars.

Bidders must satisfy themselves by personal examination of the location of the proposed work, and by such other means as they may prefer, as to the nature and extent of the work, and shall not, any time after the submission of an estimate, dispute or complain of such statement, nor assert that there was any misunderstanding in regard to the nature or amount of the work to be done.

The estimates received will be publicly opened by the head of the said Department at the place and hour last above mentioned and read.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same, the names of all persons interested with him or them therein, and if no other person be so interested it shall distinctly state that fact; that it is made without any connection with any other person making an estimate for the same purpose and is in all respects fair and without collusion or fraud, and that no member of the Common Council, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other officer of the Corporation, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate that the several matters stated therein are in all respects true. Where more than one person is interested it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in the City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his sureties for his faithful performance, and that if he shall omit or refuse to execute the same they will pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons to whom the contract may be awarded at any subsequent letting, the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested.

The consent above-mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same that he is a householder or freeholder in the City of New York, and is worth the amount of the security required for the completion of this contract, over and above all his debts of every nature and over and above his liabilities as bail, surety or otherwise, and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 27 of chapter 8 of the Revised Ordinances of the City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety; the adequacy and sufficiency of the security offered to be approved by the Comptroller of the City of New York.

No bid or estimate will be received or considered unless accompanied by either a certified check upon one of the State or National banks of the City of New York,

drawn to the order of the Comptroller, or money to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be inclosed in the sealed envelope containing the estimate, but must be handed to the officer or clerk of the Department who has charge of the estimate-box, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits except that of the successful bidder will be returned to the persons making the same within three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited to and retained by the City of New York as liquidated damages for such neglect or refusal; but if he shall execute the contract within the time aforesaid the amount of his deposit will be returned to him.

N. B.—The prices must be written in the estimate and also stated in figures, and all estimates will be considered as informal which do not contain bids for all items for which bids are herein called or which contain bids for items for which bids are not herewith called for. Permission will not be given for the withdrawal of any bid or estimate. No bid will be accepted from or contract awarded to any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The Department of Public Parks reserves the right to reject any or all the bids received in response to this advertisement if it should deem it for the interest of the City so to do, and to readvertise until satisfactory bids or proposals shall be received, but the contract when awarded will be awarded to the lowest bidder.

Blank forms for proposals, and forms of the several contracts which the successful bidder will be required to execute, can be had, the plans can be seen, and information relative to them can be had at the office of the Department, Arsenal, Central Park.
