(ENTERED AS SECOND-CLASS MATTER, POST OFFICE AT NEW YORK CITY.)

VOL. XXX.

NEW YORK, THURSDAY, OCTOBER 2, 1902.

### BOROUGH OF BROOKLYN.

#### JOINT MEETING LOCAL BOARD, PROSPECT HEIGHTS DISTRICT AND FLATBUSH DISTRICT.

Thursday, May 8, 1902.

Meeting in Borough Hall at 3 p. m.  
The roll was called, and the following members answered to their names:

Hon. J. Edward Swanstrom, President of the Borough; Alderman Tebbetts, 56th Aldermanic District; Alderman Seebeck, 57th Aldermanic District; Alderman Wentz, 61st Aldermanic District; Alderman Wirth, 62d Aldermanic District; Alderman McInnes, 63d Aldermanic District.

The President submitted the following:

No. 10A.

Petition for grading and paving Prospect avenue from Fort Hamilton avenue to a point near Eleventh avenue.

The following report from the Engineer of the Bureau of Highways:

(Copy.)

Estimate for Grading and Paving No. 38.

City of New York, Borough of Brooklyn,  
Office of Commissioner of Public Works,  
Bureau of Highways, Chief Engineer's Office,  
Municipal Building, April 7, 1902.

Mr. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I return herewith the petition for regulating and grading with granite blocks or asphalt Prospect avenue, from Fort Hamilton avenue to a point near Eleventh avenue, where it winds and turns, and as said avenue is laid down on the map of The City of New York. The items are as follows:

25,000 cubic yards of grading;  
4,400 linear feet of curb;  
12,240 square yards of pavement;  
20,600 square feet of cement sidewalk.

The estimated cost is, for asphalt, \$44,800, and for granite, \$39,600. The assessed valuation is \$70,300. It will be noticed that in both of these estimates the estimated cost is more than one-half of the assessed valuation.

The street is legally opened from Fort Hamilton avenue to the old City line, and proceedings are pending for the remainder of the distance, the title having been vested October 3, 1901.

Sewers have either been built or are under construction at the present time. No sewer basins, however, have been constructed. These basins should be put in before the street is paved. Water and gas mains have been laid between Fort Hamilton avenue and Vanderbilt street.

In considering the improvement of this street, it should be understood that Prospect avenue passes under Seely street, the difference in grade being 15.7 feet. Seely street now is about 10 feet above the proposed grade of Prospect avenue. If these proceedings were carried out it would mean that Seely street, now paved with cobble, would have to be raised about 6 feet, graded to the new grade and repaved. A bridge would also be required over Prospect avenue. The cost of this regrading and repaving and bridge construction is not included in the estimate given herewith. I am uncertain as to what fund the cost of the bridge construction and regrading should be charged. It does not seem, however, that it should be charged to the adjoining property, as Prospect avenue will be a thoroughfare connecting all of the section south and west of the Park with South Brooklyn. This improvement is very necessary and it seems to me that it would be proper for the City at large to pay the extra cost over and above one-half of the assessed valuation.

Respectfully,  
(Signed) GEO. W. TILLSON, Principal Assistant Engineer.

The following resolutions were offered:

Resolved, That the Local Board of the Flatbush and Prospect Heights districts, Borough of Brooklyn, after hearing had this 8th day of May, 1902, hereby determines to initiate proceedings to regulate, grade and pave Prospect avenue with granite block pavement between Fort Hamilton avenue and a point near Eleventh avenue where it winds and turns, in the Borough of Brooklyn, and to set or reset curb, and pave sidewalks of said street with cement where not already done, and furthermore recommends that the extra cost over and above one-half of the assessed valuation be borne by The City of New York.

Resolved, That this resolution be forwarded to the Board of Estimate and Apportionment for its approval.

Which was decided in the affirmative by the following vote:

Affirmative—The President and Aldermen Tebbetts, Seebeck, Wentz, Wirth and McInnes.

No. 10B.

Petition for the construction of sewer in Franklin avenue between Montgomery street and Union street.

The following report from the Superintendent of Sewers:

(Copy.)

City of New York, Borough of Brooklyn,  
Office of Commissioner of Public Works,  
Bureau of Sewers, Superintendent's Office,  
Municipal Building, April 11, 1902.

Hon. WILLIAM C. REDFIELD, Commissioner of Public Works:

Dear Sir—I herewith return a communication, which you referred to me, the same being addressed to the Bureau of Sewers by the Secretary of the President of the Borough under date of April 3, 1902; also a petition, in relation to the construction of a sewer in Franklin avenue, between Montgomery and Union streets.

The Chief Engineer of Sewers, Borough of Brooklyn, reports to me as follows:

"I beg to state that the estimated cost for the above-mentioned improvement is \$7,940, and the assessed valuation of the real estate within the probable area of assessment is \$175,810.

"In regard to outlet sewers, information of which is requested in above-mentioned communication, I beg to state that one will be required in Montgomery street, between Franklin and Bedford avenues, the estimated cost of which is \$4,600, and the assessed valuation of the real estate within the probable area of assessment is \$198,955.

"For outlets beyond this point reference is made to my letters of February 7th, 1902, 60th street, from 14th avenue to 19th avenue, etc., etc.; Flatbush avenue, from Foster avenue to Bedford avenue, etc.; and February 8th, 1902, Bedford avenue, from Montgomery street to Flatbush avenue.

"In regard to streets which are legally open, I beg to state that Franklin avenue within above limits is open and paved.

"Montgomery street was declared open, from Franklin avenue to the city line, March 20, 1893.

"From City line (just west of Bedford avenue), to East New York avenue. Commissioners for opening were appointed September 18, 1899 ("City Record," page 7,852 for the year 1900)."

Yours respectfully,  
(Signed) JOHN THATCHER,  
Superintendent of Sewers, Borough of Brooklyn.

Following report from the Engineer of the Bureau of Highways:

(Copy.)

City of New York, Borough of Brooklyn,  
Office of Commissioner of Public Works,  
Bureau of Highways, Chief Engineer's Office,  
Municipal Building, April 8, 1902.

N. P. LEWIS, Chief Engineer:

Mr. Henry R. Asserson, Chief Engineer, Bureau of Sewers.

Dear Sir—In response to yours of April 4, regarding the condition of Franklin avenue, between Montgomery and Union streets, and Montgomery street, between Franklin avenue and Bedford avenue, as regards their being opened, I would say that Franklin avenue is opened between the points mentioned.

Montgomery street, from Franklin avenue to the city line, which is a short distance only west of Franklin avenue, was declared open by resolution of the Common Council March 20, 1893.

From the city line extending east to New York avenue proceedings are now pending for the opening of Montgomery street, the final maps having been sent on the 12th of March, 1902.

Yours truly,  
(Signed) GEO. W. TILLSON, Principal Assistant Engineer.

The following resolution was offered:

Resolved, That the Local Board of the Flatbush and Prospect Heights districts, Borough of Brooklyn, after hearing had this 8th day of May, 1902, deeming it for the public interest so to do, hereby determines to initiate proceedings to construct sewer in Franklin avenue, between Montgomery street and Union street, and outlet sewer in Montgomery street, between Franklin avenue and Bedford avenue, in the Borough of Brooklyn.

Resolved, that this resolution be forwarded to the Board of Estimate and Apportionment for its approval.

Which was decided in the affirmative by the following vote:

Affirmative—The President and Aldermen Tebbetts, Seebeck, Wentz, Wirth and McInnes.

Adjournment.

JUSTIN MCCARTHY, Jr., Secretary.

Changing lines of East One Hundred and Sixty-second street, between River and Walton avenues.

Petition of George H. Huber and others was read, as was also the following report:

August 25, 1902.

Mr. JOSIAH A. BRIGGS, Chief Engineer of the Borough of The Bronx:

Sir—In accordance with the suggestions made by the Local Board of Morri-

sania, laying out East One Hundred and Sixty-second street, from River avenue to Walton avenue, at a width of 70 feet, Borough of The Bronx, the map which was submitted was corrected.

By this arrangement the City can dispose of 17,526 square feet in the block between Gerard avenue and Walton avenue, and will have to acquire for the 70 foot street 25,737 square feet, which leaves only 8,211 square feet to be acquired if an exchange can be made between the City and the owner of the land adjoining East One Hundred and Sixty-second street.

In the block between Gerard avenue and River avenue the City can dispose of 13,869 square feet, because it owns One Hundred and Sixty-second street, which is laid out at a width of 100 feet, and because the new street lies entirely within the old 100-foot street.

It will be seen, therefore, that the City can dispose of 31,395 square feet lying within the old lines of the 100-foot street, and has to acquire 25,737 square feet for the ramp between Gerard avenue and Walton avenue.

In addition, it is proposed to close the drainage street between Walton avenue and East One Hundred and Sixty-second street, which covers an area of 7,414 square feet, to which the City, however, has not taken title as yet.

Respectfully,

(Signed) P. GREIFFENBERG,  
Principal Assistant Topographical Engineer.

Establishment of Street Lines in Edenwald.

The following communication was read and referred to the Chief Engineer of the Borough of The Bronx for report:

Land Company "C" of Edenwald,  
No. 14 East Forty-second Street.

July 30, 1902.

Hon. LOUIS F. HAFFEN, President, Borough of The Bronx:

Dear Sir—I beg to request that in the matter of the proposed layout of streets in and about the section known as Edenwald, such streets to be opened be made to conform as far as possible to the streets now in use. Much money has been expended by the Edenwald Land Companies in building the streets, and you will find upon investigation that due care has been taken regarding the topography of Edenwald in opening these streets, and also to have them harmonize with the layout of Wakefield. I desire also to call your attention to a bit of nature in Edenwald which fully equals on a smaller scale Bronx Park—this should be preserved. The building of streets through it would bankrupt the Bronx, as mountains would have to be taken down and ravines built up. This letter was authorized by L. Napoleon Levy, President, and the Board of Directors of all the Edenwald companies.

Sincerely yours,

C. WAITE TUBBS,

Secretary Edenwald Land Companies "A," "B" and "C."

No. 246.

Locating of Clason's Point Road on the Lines of Existing Road Now in Use.

The petition of Clinton Stephens, Matthew A. Husson, Andrew Dewitt and others was read, as was also the following report:

September 12, 1902.

The petition presented to the President of the Borough of The Bronx requests that in the locating and plotting of the Clason's Point road on the new map the general direction and location of the same, southerly from the proposed Eastern Boulevard, remain as at present laid out, except as to the general scheme of widening thereof, and the minor straightening thereof incident to such widening.

The petition also requests a reduction of widths of streets. In relation to above petition I beg to report that I coincide with the views of the petitions relative to the new location of Clason's Point road; the road can be widened to 100 feet without detriment to the general design of the street system.

A plan has been started to revise the street system on which due consideration will be given to the request of the petitioners.

The width of some of the 100-foot avenues will probably be modified also.

The communication of the Secretary of the President of the Borough of The Bronx in this matter is herewith returned.

Respectfully,

F. GREIFFENBERG,

Principal Assistant Topographical Engineer.

Approved September 16, 1902.

JOSIAH A. BRIGGS, Chief Engineer of the Borough of The Bronx.

Mr. M. A. Husson of Clason Point appeared in favor. No one appeared in opposition.

No. 231.

Columbus Avenue, Changing of Width, from West Farms Road to Bear Swamp Road, from 100 Feet to 60 Feet.

Petition of Fred Eisen and others was read, as was also the following report of the Chief Engineer of the borough, viz.:

"August 9, 1902.

"Columbus avenue is shown on the tentative plan of the street system, east of the Bronx river, as a 100 foot street, and the easterly part of the same is shown on section 41 of the Final Maps, which was filed December 31, 1901.

"Columbus avenue is the street next to and parallel with White Plains road, which is 100 feet in width, and runs only from West Farms road to the New York, New Haven and Hartford Railroad, near Westchester Station.

"It does not seem to be necessary that this street be laid out 100 feet, but I would recommend that it be made 80 feet in width, because it runs in the same direction as all the other wide streets.

"A revision of the street plan is in preparation on which this reduction of width to eighty (80) feet is suggested.

"Respectfully,

"F. GREIFFENBERG,

"Principal Assistant Topographical Engineer."

Approved August 16, 1902:

JOSIAH A. BRIGGS,

Chief Engineer of the Borough of The Bronx.

The following supplemental report was also read:

"Sept. 16, 1902.

"Hon. LOUIS F. HAFEN, President, Borough of The Bronx:

"Dear Sir—I return herewith communication of Mr. Fred Eisen relative to the width of Columbus avenue, and beg to submit report of Mr. Greiffenberg, the Topographical Engineer, in the matter. This avenue has a large number of sixty feet streets running into it, and it should therefore be made wider than those streets. In view of the effect on some of the property fronting thereon, I would suggest that a width of 70 feet be considered, with 15 foot sidewalks. This would leave a roadway of 40 feet.

"Respectfully,

"JOSIAH A. BRIGGS,

"Chief Engineer of the Borough of The Bronx."

On motion the matter was laid over.

said petition would be submitted by him to the said Local Board, and he has caused a notice to be published in the "City Record" that said petition has been presented to him and is on file in his office for inspection, and of the time when and the place where there would be a meeting of this Local Board at which the said petition would be submitted by him to the said Board, which time was not less than ten days after the publication of this notice; and

Whereas, The said petition was duly submitted thereafter to the said Local Board, which did duly consider the same and give a full hearing thereon; now therefore it is

Resolved, By the Local Board of the Washington Heights District, pursuant to titles 2 and 3 of chapter 10 of the Greater New York Charter, that the said petition be and the same hereby is granted; and it is hereby

Resolved, That this Board does hereby initiate proceedings for the said local improvement, to wit:

That the President of the Borough of Manhattan be authorized, with the consent of the Board of Estimate and Apportionment, to pave the roadway of St. Nicholas avenue, from One Hundred and Twenty-fourth to One Hundred and Fifty-fifth street, with asphalt blocks or bituminous macadam pavement.

#### LESSENE WATER SUPPLY.

NOTICE IS HEREBY GIVEN TO THE houseowners and residents in all those parts of the Borough of The Bronx which are supplied with water from the City's water mains, that on and after October 1, 1902, and during that month, the Old Croton Aqueduct will have to be closed at a point north of the Jerome Park Reservoir, and the operation of the temporary pumping plant which has hitherto pumped from the aqueduct into The Bronx water mains a daily supply of ten million gallons of water, will have to be discontinued during said month, in order to make the connections between the old and the new aqueducts and the new 48-inch water main which will supply the central and lower portions of the Borough, and will, as soon as the connections are completed, increase the water supply at least 50 per cent.

During October the supply will be diminished about one-third, and the pressure in delivery of the water will be correspondingly reduced. The inconveniences which may result from this temporary decrease of supply will be much mitigated if the people will abstain from lavish and wasteful use of water which this Department earnestly requests them to do.
