DEPARTMENT OF HEALTH

Report for Week Ending January 11, 1913

DISCONTINUANCE OF THE FREE ADMINISTRATION OF DIPHTHERIA ANTITOXIN.

The free administration of antitoxin in diphtheria and the performance of intubation by the Inspectors of the Department of Health of The City of New York was begun in 1895, the objects in view being not only the cure and prevention of the spread of the disease, but also the education of the medical profession and the general public. These ends have been accomplished. The death rate of the disease in Manhattan and The Bronx has fallen from 159 per 10,000 of population in 1894 to 2.2 in 1912. In 1894 twenty-nine out of every one hundred cases reported died. In 1912 less than nine cases out of every hundred died. Since 1895 almost 40,000 cases have been injected with antitoxin furnished by the Department of Health, and of these less than 6 per cent. proved fatal. Finally, the records show that at the present day practically every case of diphtheria receives antitoxin.

On and after February 1, 1913, therefore, the present system of free administration by Inspectors of the Department of Health of diphtheria antitoxin and performance of intubation at the homes of patients, at the request of the attending physician, will be discontinued. After that date, when it becomes necessary for the Department of Health to administer antitoxin or perform intubation in any case of diphtheria the patient will be at once removed to one of the hospitals of the Department for further observation and treatment. Diphtheria antitoxin may still be obtained free of charge by physicians from supply stations at drug stores for use, where payment for the same by the patient would be a hardship.

REPORTING OF VENEREAL DISEASES.

The Department of Health has undertaken an extensive study of the venereal diseases in New York City and is desirous of obtaining as full information as possible as to the prevalence of these diseases. By virtue of the resolution of the Board of Health of The City of New York, dated February 20, 1912, the Superintendents of all public institutions have been required since May 1, 1912, to report promptly all cases of syphilis, chancroid or gonorrhoeal infection coming under observation. All physicians were requested to furnish similar information concerning their private patients (omitting name and address), but no attempt was made at that time to reach every physician in the city.

Cases reported by private physicians will be filed by case number, which will be given the physician for future identification, when his report is acknowledged.

A supply of report cards to be used for this purpose will be forwarded on request. All information is regarded as absolutely confidential and is not accessible to the public nor are the records deemed public records.

DIAGNOSIS OF VENEREAL DISEASES.

The Department of Health, makes, without charge, the Wassermann test for the diagnosis of syphilis, and also provides facilities for the free bacteriological examination of discharges for the diagnosis of gonorrhoeal infections.

Outfits, with full directions for obtaining specimens, can be had free at any of the Department supply stations, a list of which will be mailed on application.

A diagnosis clinic for venereal diseases is held daily between 9 and 10 a. m. at the central office of the Department of Health at Centre and Walker streets, where patients may be referred by physicians for the performance of the Wassermann reaction and for examination of fresh specimens for the presence of treponema. No patients are examined unless referred by physicians (excepting those who have no physicians), and under no circumstances are the results of examinations reported to the patients. A similar clinic is held at 307 West 33d street on Wednesday evenings, between 8 and 9 p. m., for the benefit of applicants unable to attend during the day.

For further information application should be made to the Department of Health, Division of Communicable Diseases, Centre and Walker streets, New York City.

IMMUNIZATION AGAINST TYPHOID FEVER.

Immunization against typhoid fever, or the inoculation of a healthy person with sterilized typhoid cultures, in order to prevent infection with typhoid fever, has passed beyond the experimental stage and has become established as a prophylactic measure of proved efficiency.

Practically all authorities now agree that the practice confers a notable immunity against typhoid infection and reduces by three-quarters the number of cases in localities where it is adopted.

Under similar conditions typhoid fever occurring in immunized persons is, approximately, only one-half as fatal as in persons not so protected.

Typhoid fever thus is less apt to occur, and when it does occur, runs a milder course among the sick who have been immunized than among those who have not.

Feeling that its wider use, under proper precautions, is called for, the Board of Health of The City of New York on December 10, 1912, authorized the performance of immunization against typhoid fever by its Inspectors, under conditions similar to those governing the free administration of diphtheria antitoxin. Beginning January 1, 1913, inoculations will be made at the homes of applicants or at the Central Office of the Department, Centre and Walker streets, Borough of Manhattan; or the culture will be furnished free to physicians for their own use. All requests for immunization must be made or approved by the attending physician.

Requests for inoculation can be made by telephone or letter to the Division of Communicable Diseases of the Department of Health.

Immunization will be offered to all other members of every family in which a case of typhoid fever occurs.

As at least 10 per cent. of the cases of typhoid fever occurring in New York City are thought to be due to contact, immediate or indirect, with a preceding case in the same locality, and not to infected water or milk, it is hoped that widespread immunization of the members of all such families will sensibly reduce the occurrence of typhoid fever in New York City.

A circular of information regarding immunization against typhoid fever has been issued, and (together with a leaflet of information regarding the new Diagnostic Clinics for Venereal Diseases of the Department of Health) has been sent to every physician in New York City. These circulars will be supplied to any citizen upon request.

THE HEALTH OF THE CITY IN 1912.

The number of deaths reported during the year ending 12 m., December 31, 1912, was 73,008, with a death rate of 14.11 per 1,000 of the population. This number is less by 2,415 deaths reported during the year 1911, and 16,857 deaths less than the average of the immediately preceding decennium, corrected to correspond to increase

in population during the previous ten years. It is hardly necessary to say that this is the lowest death rate that the City of New York has ever experienced, and while the figures of the large cities of the world are not yet at hand, it is probable that this rate will compare very favorably with that of any other large city in the world, including London, Paris, Berlin, Vienna, Chicago and Philadelphia.

Mortality Compared With the Decennial Average.

In order to make a fair comparison the mortality from different causes for the year 1912 has been compared with the corrected decennial averages of the years 1902 to 1911, inclusive. We find that the death rate from typhoid fever has decreased 34 per cent.; smallpox, 95 per cent.; measles, 30 per cent.; scarlet fever, 38 per cent.; diphtheria and croup, 48 per cent.; tuberculosis of the lungs, 17 per cent.; other forms of tuberculosis, 11 per cent.; pneumonia (lobar- and broncho-) showed a decrease of 2,678 deaths, compared with the decennial average.

The greatest gain in lives has resulted from the reduced mortality from diarrhoeal diseases under five years of age, the average for the decennium being 6,805, while during the year 1912 the number of deaths reported from this cause was 4,148, a decrease of 2,657 deaths.

Cirrhosis of the liver showed a decrease of 266 deaths, Bright's disease and nephritis, 1,114 deaths; puerperal diseases, 206 deaths; accidental deaths, 687; suicide, 174. Appendicitis showed a slightly decreased mortality of 15 deaths less, cerebro-spinal meningitis, 604 deaths; bronchitis (acute and chronic), 1,042 deaths.

The only causes which showed an increased mortality were cancer, an increase of 295 deaths; homicides, an increase of 57 deaths; organic heart diseases, an increase of 1,455 deaths. This latter increase, however, is offset by a decrease of 1,449 deaths from apoplexy and diseases of the arteries, due to more accurate certification, so that the only two causes that really showed an increased mortality during the year were those of the cancerous and homicidal deaths.

Viewed from the point of age grouping, we find that the mortality was decreased at all ages. The deaths of children under one year of age showed a decrease of 5,159 deaths; of children under five years of age, 8,463 deaths; between the ages of five and sixty-five years, 7,570 deaths; sixty-five years of age and over, 824 deaths.

The decrease among the females reached 20 per cent., whilst that of the males was about 18. The mortality among the colored population was stationary. There were 28,242 deaths reported in the various institutions of the City, a decrease of 658 compared with the decennial average. Deaths reported in tenement houses numbered 30,579, a tremendous decrease of 12,781 deaths being shown in comparison with the decennial average. The death rate for the previous decennium was 17.37, that of the year 1912 being 14.11, giving a decreased rate of 3.26 per 1,000 of the population.

The infant mortality during the year was the lowest ever recorded in the City, 14,289 deaths being reported, which gives a rate of 10½ per cent., or, as it may be stated, 105 deaths occurred out of every 1,000 children born during the year. This is considerably lower than any of the large cities of the world, with the exception of the City of Paris; not that the credit of lowest infant mortality, however, should be given to this latter city, since the procedure there is to regard as still-born any infant who does not live longer than three days. Another factor in the low mortality of Paris infants is that a considerable number are placed in institutions and homes outside of the city limits, the deaths occurring among these infants not being included among the mortality rates of the city.

Births and Marriages.

The number of births reported during the year was 135,625, an increase of 1,083 compared with the returns for the year 1911, but while the returns show an increase in the absolute numbers, still the birth rate for the year, 26.22 per 1,000, is the lowest rate since the year 1906. On the other hand, the number of marriages reported was 52,391, with a rate of 10.13, this being the highest marriage rate in five years.

The number of still-births reported was 6,617, a decrease of 1,379 compared with the decennial averages.

Franchise Matters.

PUBLIC NOTICE IS HEREBY GIVEN THAT at a meeting of the Board of Estimate and Apportionment held January 9, 1913, the following petition was received:

To the Honorable the Board of Estimate and Apportionment of The City of New York:
The petition of the New York Magnaphone and Music Company, a New York corporation, respectfully shows:

1. That on the 17th day of January, 1912, by Resolution Number 89, this Board granted to the petitioner a franchise to lay, construct, maintain and operate suitable wires under and along the streets and avenues within the territory comprising the Borough of Manhattan and that portion of the Borough of The Bronx lying west of the Bronx River, for the purpose of distributing music and matters of general interest electrically, by means of a magnaphone.

2. Under the terms of said franchise your petitioner is required to place its wires in the conduits or subways and lease such wires or conduits from the company having control thereof under the conditions or rules of law, or from the City, should it succeed such company or companies.

3. The company has duly paid the sum of five thousand dollars, required to be paid by the third paragraph or subdivision of said franchise, as the condition precedent to its exercise of the privileges granted by this Board; and it has duly deposited with the Comptroller of the City \$5,000 in securities, approved by him, for the performance by your petitioner of the terms and conditions of its said franchise.

4. At the time that your petitioner applied for the said franchise, your petitioner planned to utilize spare wires in telephone cables for the purpose of transmitting music to its subscribers. Application was duly made to the telephone company for such wires and, after months of experimenting, your petitioner found that the cables were of such a character that music could not be sent over such spare wires without creating an induced current, thereby transmitting the music to the wires utilized in the telephone service.

5. Your petitioner has found that to carry on its business independent of the telephone company and through independent cables will be impractical on account of the rent imposed for conduits.

6. Your petitioner further shows that it has received no benefits whatever from said franchise or from the payments made to the City in consideration thereof.

7. Your petitioner desires to surrender for cancellation the franchise granted as aforesaid on the 17th day of January, 1912.

Your petitioner, therefore, prays that this Honorable Board consent to the surrender for cancellation and the cancellation of the said franchise upon the payment by your petitioner to the City, for the privileges granted by said franchise, of the sum heretofore accrued under the provisions of subdivision "b" of the third paragraph of said franchise.

Dated New York, December 17, 1912.

PUBLIC SERVICE COMMISSION.**INVITATION TO CONTRACTORS.****PART OF ROUTES NOS. 36 AND 37.**

THE CITY OF NEW YORK, ACTING BY THE Public Service Commission for the First District (hereinafter called "the Commission"), invites proposals to construct Section No. 3 of the Astoria, Woodside and Corona Rapid Transit Railroad.

The points within the City between which the said part is to run and the route or routes to be followed are briefly as follows:

Section No. 3. Beginning at a point on Queens boulevard, in the Borough of Queens, about two hundred and seventy (270) feet northwest of the westerly line of Van Dam street, and extending thence along and over Queens boulevard, Greenpoint avenue, Skillman avenue and Roosevelt avenue to a point over Roosevelt avenue about seventy (70) feet east of the easterly line of Sycamore avenue (Albertus avenue); with local stations at Rawson street, Lowery street, Bliss street, Lincoln avenue, Broadway, 25th street, Elmhurst avenue and Sycamore avenue, and with express stations at Woodside avenue and Junction avenue.

The general plan of construction calls for an elevated railroad. The details of the construction of the railroad and appurtenances are more particularly indicated on the contract drawings.

Bidders will not be required to provide or lay any tracks or any ties, or to provide or lay broken stone or ballast on the reinforced concrete elevated railroad, nor to do station finish work, except such station finish work as is specifically required to be done.

The work of construction under the contract will include the construction of all necessary sewers and connections, along the route of the railroad; also the necessary support, maintenance, readjustment and reconstruction of vaults adjacent to buildings, pipes, tubes, conduits, subways or other subsurface structures; the support and care of all buildings, monuments, surface railroads and other surface, subsurface and overhead structures of any kind, affected by or interfered with during the construction of the work; also the restoration of the sidewalks and roadways.

Bidders must examine the form of contract and the specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated, in the printed form of contract and in the contract drawings therein referred to. Printed copies of the form of contract, bond and contractor's proposal may be had on application at the office of the Commission, No. 154 Nassau street, Borough of Manhattan, City of New York. The contract drawings may be inspected at the same office, and copies thereof may be purchased by prospective bidders on payment of five dollars (\$5). The printed form of contract and the contract drawings are to be deemed a part of this invitation.

Partial payments to the contractor will be made monthly as the work proceeds as provided in the form of contract.

The contractor will be required to complete the work as soon as practicable and within a period of eighteen (18) months from the date of the delivery of this contract.

Sealed bids or proposals will be received at the office of the Commission at No. 154 Nassau street, Borough of Manhattan, City of New York, until the 7th day of February, 1913, at twelve (12) o'clock noon, at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

A statement based upon estimate of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required is to be found in the schedule forming a part of the form of Contractor's Proposal. The quantities given in such schedule are approximate only, being given as a basis for the uniform comparison of bids and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

All proposals must, when submitted, be enclosed in a sealed envelope endorsed "Proposal for Constructing Part of Rapid Transit Railroad—Routes Nos. 36 and 37, Section No. 3," and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal, it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check drawn upon a national or state bank or trust company having its principal office in the City of New York, satisfactory to the Commission and payable to the order of the Comptroller of the City of New York for the sum of fifteen thousand dollars (\$15,000). Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract will be made by the Commission as soon as practicable after the opening of the proposals.

Bidders whose proposals are otherwise satisfactory, in case the sureties or securities named by them are not approved by the Commission, may substitute in their proposals the names of other sureties or securities approved by the Commission, but such substitution must be made within five (5) days after notice of disapproval, unless such period is extended by the Commission.

A bidder whose proposal shall be accepted shall, in person or by duly authorized representative, attend at the said office of the Commission within ten (10) days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the contractor will be required to furnish security to the City by giving a bond for fifty thousand dollars (\$50,000). At the option of the successful bidder cash or approved securities may be deposited instead of giving a bond. If securities are deposited in place of a bond under this contract, they must be of the character of securities in which savings banks may invest their funds and must be approved by the Commission.

The contractor's bond must be in the form annexed to the form of contract.

In addition and as further security fifteen (15) per centum of the amounts certified from time to time to be due to the contractor will be deducted until the amounts so deducted and retained shall equal the sum of one hundred thousand dollars (\$100,000). Thereafter there shall be so deducted and retained for such purpose ten (10) per centum of the amounts certified from time to time to be due to the contractor. The contractor may from time to time withdraw portions of the amounts so retained upon depositing in lieu thereof corporate stock of The City of New York equal in market value to the amount so withdrawn.

In case of failure or neglect to execute and deliver the contract or to execute and deliver the required bond or to make the required deposit, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case, the Commission will give notice thereof to such defaulting bidder, and the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interests of the City to contract with, or may by new advertisement invite further proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other contractor over the amount of the bid of such defaulting bidder.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and if the bidder shall fail within ten (10) days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, or to make the required deposit, then the Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damage by it sustained by reason of such failure, and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five (5) days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions in respect of the bond or deposit are complied with.

The right to reject any and all bids is reserved.

NOTICE TO BIDDERS AT SALES OF OLD BUILDINGS, ETC.

TERMS AND CONDITIONS UNDER WHICH BUILDINGS, ETC., WILL BE SOLD FOR REMOVAL FROM CITY PROPERTY.

THE BUILDINGS AND APPURTENANCES thereto will be sold to the highest bidder, who must pay cash or certified check, drawn to the order of the Comptroller of The City of New York, and must also give a certified check or cash in half the amount of the purchase price as security for the faithful performance of the terms and conditions of the sale. Where the amount of the purchase price does not equal or exceed the sum of \$50, the sum of \$50 shall be the amount of the security to be deposited. This security may at any time after the expiration of the contract period be applied by the City to the cost of completing any of the work required under the contract, but unfinished at the expiration of the contract period.

The purchaser shall not lease, occupy, cause or permit the building or buildings, etc., purchased by him to be used or occupied for any purpose other than that of their speedy removal, nor shall he collect any rental or other revenue for the use of either the land or the buildings, etc., situated thereon. The breach of either or any of these conditions shall forthwith void the sale and cause immediate forfeiture of the purchase money and the security deposited for the faithful performance of the conditions of the sale. The placing therein or permitting the occupancy of any such building by any tenant free, for rent or otherwise, excepting the necessary watchmen or the workmen engaged in the actual demolition thereof, shall of itself be a breach of the above conditions of sale.

The sale will be as of the condition of the property on date of delivery thereof to the purchaser. The City of New York will not be responsible for any change or loss which may occur in the condition of the buildings, or their appurtenances between the time of the sale thereof and the time of delivering possession to the purchaser, after being properly vacated of all tenants. The sale and delivery to purchaser will be made as nearly together as the circumstance of vacating the structures of their tenants will permit.

All the material of the buildings, sheds, walks, structures and cellars of whatsoever nature, with their exterior and interior fixtures, appurtenances and foundations of all kinds, except the exterior walls of the buildings and their foundations and the sidewalks and curb in front of said buildings, extending within the described area shall be torn down and removed from the premises. None of the dirt, debris or waste resulting from demolition shall be allowed to remain on the premises, except old mortar or plaster only, which may be left, but not higher at any point than two feet below the curb opposite that point. The exterior walls and their foundations shall be taken down only to a plane whose elevation shall be the level of the curb in front of the building.
