The Madison Avenue Bridge having been opened for public travel, has been found to be a great convenience to the traveling public; the paving of the southerly approach, as well as the paving, regulating and grading of Madison avenue, will render this a convenient and pleasant outlet into the annexed district.

A small force has been employed in pointing and trimming, and the work is virtually completed.

The amount of work done on the approaches is as follows :

7,400 cubic yards of filling,  
1,000 cubic yards of dredging,  
253 cubic yards of masonry,

The machinery of the Third avenue Bridge over the Harlem river has been repaired.

The Department has requested General John Newton, Engineer-in-Chief, U. S. A., General George B. McClellan, and Hon. William J. McAlpine, to examine the plans for a bridge over Harlem river, at not more than a half mile above the High Bridge, and give to this Department their opinions as to the merits of the several plans.

The old building standing on Riverside Drive at One Hundred and Twelfth street has been ordered to be taken down and the material stored on the Central Park; the booths on the Third Avenue Bridge approaches have been ordered to be removed.

Permission has been granted to the Trustees of the American Museum of Natural History to enlarge the lecture-room in the museum building.

An application has been made to the Board of Aldermen for permission to erect by private contract on the Central Park a building for the accommodation of skaters.

The Board of Estimate and Apportionment having made an appropriation for this purpose, the Department has prepared plans and procured estimates for doing the work, and so soon as the necessary authority is obtained the work will be proceeded with. This building will supply a want long felt; the temporary provision which has been made from year to year has been totally inadequate to the wants of the immense throngs of people who visit the Central Park during the skating season.

The music on the Central Park, the Battery and East River Parks has been a great success.

The musical entertainment which was heretofore given on the Mall on the Central Park on Saturday afternoons was, in conformity with the wishes of many, changed to Sunday afternoons; the programmes have been carefully guarded, in order that the selection of pieces to be performed would in no respect prove objectionable to the most fastidious persons; selections from hymns, oratorios and old songs, with particular pieces by request, have been the main feature of these concerts.

The wisdom of this change is evident from the immense throngs of people who gather to listen to the rendering of this sweet music beneath the majestic elms of the Mall, and removed from the close confines of city life.

These concerts have been a great boon to the class of people who are less fortunate than others, and who with their families are dependent upon Sunday and the Central Park for a day of rest and a breath of pure air.

A marked characteristic of these performances has been the perfect order that has been maintained, with a mass of people numbering at times 70,000, listening with marked attention; the police returns for the day have shown not a single arrest.

These concerts have been commended by the people and the press, and the Commissioners of the Department hope to be able to continue them during the coming year, as well as to be able to furnish music at the Battery, East River and other parks.

The subject of endeavoring to secure a supply of water for the use of Central Park has received much attention; tests have and are now being made with hopes of success; if this water can be obtained in a supply sufficient to water the roads, lawns and plants, supply the lakes and ponds, it will not only tend at a small cost to beautify the park, but will at a large cost save millions of gallons of Croton water for the use of the city.

The Gas Commission have been requested to include in their estimate for 1885, money sufficient where-with to light with electric light Mount Morris Park, Bryant Park, and the east drive of Central Park, from Fifty-ninth street to One Hundred and Tenth street.

The Comptroller has been requested to issue bonds for the construction of bridges over the Harlem river to an amount not exceeding \$100,000.

In accordance with law the Department has prepared and transmitted to the Comptroller the Departmental Estimate for 1885.

The refreshment building, on the site of old Mount St. Vincent, Central Park, has been completed and thrown open to the public. The carriage sheds in the rear of this building are now nearly ready for occupancy.

The old building on Riverside Drive has been repaired and leased to Mr. P. A. Bernard, for the purpose of being opened as a first-class place of refreshment.

The stone-work for the seven bays and four entrances at Morningside Park has been completed; plans, specifications and forms of contract for the erection of granite steps, capping, iron railing, brick arches, etc., for these bays and entrances are in course of preparation.

#### CENTRAL PARK.

The work of maintaining the Central and City Parks has received marked attention. In the Central Park the roads and drives have been picked, graded and gravelled; the bridle roads have been cleaned and the surface relaid with fine gravel.

The planting in all of the parks has received careful attention; all of the plantations have been cleared of dry wood.

Hardy herbaceous plants to the number of two thousand have been placed in Stuyvesant Square. Similar plants were also placed along the shore of the lake in Central Park, in the vicinity of the Bow Bridge; low evergreen shrubs have been planted along the West Drive, near Eighty-third street.

The laying of tar walks has been completed at Mount Morris Park. Nearly all the walks in the Third Division of Central Park, between the east and west drives, above One Hundred and

Fourth street, have been graded and laid with tar pavement; also from the Loch up to Mount St. Vincent, and thence to the tool-room at One Hundred and Fifth street.

A great amount of repairing has also been done to the tar asphalt walks in the different parks.

#### RIVERSIDE PARK IMPROVEMENT.

##### From Seventy-second to Eighty-sixth street.

The work done upon this portion has been receiving the material and shaping in the vicinity of Seventy-ninth street.

The work done is as follows:

7,000 cubic yards of filling, received from exterior sources without cost.

1,000 cubic yards of top soil or mold.

433 cubic yards of stone for plaza.

3 acres of ground shaped.

##### From Ninety-sixth to One Hundred and Twentieth street.

The work done on this portion is:

930 cubic yards of earth excavation for walks.

6,000 cubic yards of filling received from exterior sources without cost.

74 cubic yards of stone filling in walks.

80 lineal feet of stone sluices built.

$\frac{1}{2}$  acre of shaping in connection with walks.

##### From One Hundred and Twentieth to One Hundred and Twenty-ninth street.

The main portion of the force employed upon the entire park has been employed upon this portion. The regulating and grading of the extension of the Riverside avenue, the laying of the stone foundation for roadway, and the drainage in connection therewith has been in progress.

The work done has been as follows:

9,450 cubic yards of earth excavation.

5,883 square yards of stone foundation for drive.

374 lineal feet of brick sewer built, 3' 6" by 2'.

1,986 lineal feet of drain pipe laid, in sizes from 6" to 20".

2 surface basins built.

12 road basins built.

A small force also has been employed in restoring the old "Claremont House."

The work of perfecting the drainage of Riverside avenue in the vicinity of One Hundred and Fifteenth street has been as follows:

2 receiving-basins built.

30 lineal feet of 12" pipe laid.

The usual work of caring for the drive, grass-plots, gravel-walks and shrubbery has been carried on; the watering of the drive, the cleaning of basins, and the repairing of gravel-walks after rains, etc., has required and received constant attention.

The masons have been employed in building basins, paving of gutters and resetting of curb in the different divisions of Central Park; the laying of curbs and gutters around the new refreshment building; flagging around entrances, and in building steps and platform on the south side; also repairing basins and curbs in transverse roads, relaying pavements in cottages and repairing drains, with general repairs of walls, drains, painting, etc.

Several of the statues in the different parks have been cleaned off, and the marble bases, etc., neatly pointed.

The old bridges over the Harlem River require constant care and attention.

The floor of Central Bridge was relaid in several places, and preparations have been made to give the truss-work, railing and flooring a thorough overhauling; a new floor has been laid on the Bow Bridge over the lake in Central Park.

The ladies' cottage on Union Square has been repaired, a new platform, piazza and steps have been built, and the same painted.

The work at Paradise Park is nearly completed.

In consequence of a want of funds, nothing has been done towards the improvement of Jeanette Park at Coenties Slip.

The railing around the equestrian statue on Union Square has been painted and repaired and the statue itself cleaned.

The iron-work and flag-staffs at the north end of Union Square have been repaired and painted. All the tools, implements and rolling stock have been repaired and painted, 850 settees have been cared for, and 250 foot-rests have been put on settees.

The Plaza at Fifty-eighth and Fifty-ninth streets and Fifth avenue, and Circle at Fifty-ninth street and Eighth avenue entrances to Central Park have long been a source of annoyance in consequence of the low grades at both points, causing the water to stand in wet weather, and rendering the neighborhood adjacent to both objectionable from dust in dry weather.

The companies owning the railroad tracks at both points have been notified to raise their tracks to an established grade, and the Department has commenced the work of remedying the objections complained of; the laying of a macadam pavement is now in progress.

Delivery will be required to be made from time to time, and in such quantities as may be directed by the said Commissioners.

Any bidder for the contract must be known to be engaged in and well prepared for the business, and must have satisfactory testimonials to that effect; and the person or persons to whom the contract may be awarded will be required to give security for the performance of the contract by his or their bond, with two sufficient sureties, in the penal amount of fifty (50) per cent. of the estimated amount of the contract.

Each bid or estimate shall contain and state the name and place of residence of each of the persons making the same; the names of all persons interested with him or them therein; and if no other person be so interested, it shall distinctly state that fact; also that it is made without collusion or fraud; and that no member of the Common Council, Head of a Department, Chief of a Bureau, Deputy thereof, or Clerk therein, or other officer of the Department, is directly or indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party or parties making the estimate, that the several matters stated in his or their estimate are true. Where more than one person is interested, it is requisite that the verification be made and subscribed by all the parties interested.

Each bid or estimate shall be accompanied by the consent, in writing, of two householders or freeholders in the City of New York, with their respective places of business or residence, to the effect that if the contract be awarded to the person making the estimate, they will, on its being so awarded, become bound as his or her sureties for its faithful performance; and that if he shall omit or refuse to execute the same, they shall pay to the Corporation any difference between the sum to which he would be entitled on its completion and that which the Corporation may be obliged to pay to the person or persons whom the contract may be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the work by which the bids are tested. The consent above mentioned shall be accompanied by the oath or affirmation, in writing, of each of the persons signing the same that he is a householder or freeholder in the City of New York, and is worth the amount of the security required for the completion of this contract, over and above all his debts of every nature, and over and above his liabilities, as bail, surety, or otherwise; and that he has offered himself as a surety in good faith and with the intention to execute the bond required by section 12 of the Revised Ordinances of the City of New York, if the contract shall be awarded to the person or persons for whom he consents to become surety. The adequacy and sufficiency of the security offered to be approved by the Comptroller of the City of New York.

No bid or estimate will be considered unless accompanied by either a certified check upon one of the NATIONAL BANKS of the City of New York, drawn to the order of the Comptroller, or money, to the amount of five per centum of the amount of the security required for the faithful performance of the contract. Such check or money must not be enclosed in the sealed envelope containing the estimate, but must be handed to the officer or Clerk of the Department at the City of New York, and no estimate can be deposited in said box until such check or money has been examined by said officer or clerk and found to be correct. All such deposits, except that of the successful bidder, will be returned to the persons making the same, with three days after the contract is awarded. If the successful bidder shall refuse or neglect, within five days after notice that the contract has been awarded to him, to execute the same, the amount of the deposit made by him shall be forfeited to and retained by the City of New York, as liquidated damages for such neglect or refusal; but, if he shall execute the contract within the time aforesaid, the amount of his deposit will be returned to him.

Should the person or persons to whom the contract may be awarded neglect or refuse to accept the contract within five days after written notice that the same has been awarded to his or their bid or proposal, or if he or they accept but do not execute the contract and give the proper security, he or they shall be considered as having abandoned it and as in default to the Corporation, and the contract will be readvertised and relet as provided by law.

*The quality of the articles, supplies, goods, wares, and merchandise must conform in every respect to the samples of the same respectively at the office of the said Department. Bidders are cautioned to examine the specifications for particulars of the articles, etc., required, before making their estimates.*

Bidders will state the prices for each article, by which the bids will be tested.

Bidders will write out the amount of their estimates in addition to inserting the same in figures.

Payment will be made by a requisition on the Comptroller, issued on the completion of the contract, or from time to time, as the Commissioners may determine.

Bidders are informed that no deviation from the specifications will be allowed, unless under the written instruction of the Commissioners of Public Charities and Correction.

No bid or estimate will be accepted from, or a contract awarded to, any person who is in arrears to the Corporation upon debt or contract, or who is a defaulter, as surety or otherwise, upon any obligation to the Corporation.

The form of the agreement, including specifications, and showing the manner of payment, can be obtained at the office of the Department.
